Active Markets

Will Republicans win the House in 2026? (CONTROLH-2026-R)

Category: politics | Closes: 2027-02-01 15:00 UTC

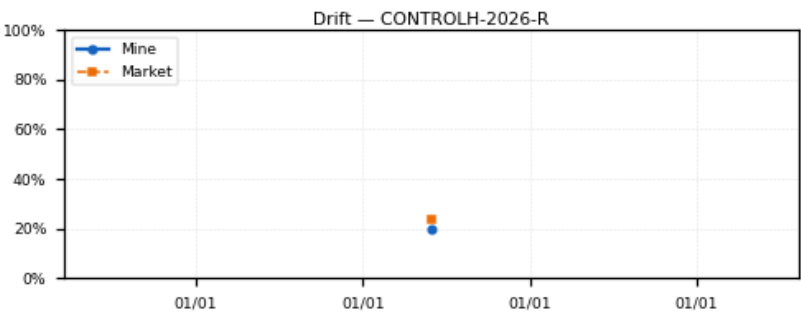

My prob: **20.0%** Confidence: **medium** Market: **23.5%** Edge: **-3.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV +\$0.01/contract)

Rationale: President's party loses the House in 18/20 midterms; Trump ~36% approval and a D+6-8 generic ballot project large GOP losses against their 3-seat margin. GOP mid-decade redistricting (+10-15 seats) is a real offset but insufficient, so I sit just below the market.

Key drivers: Trump approval ~36%; D+6-8 generic ballot; 3-seat GOP margin; GOP redistricting offset

Will the Federal Reserve Hike rates by 0bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H0)

Category: economy | Closes: 2026-06-17 17:59 UTC

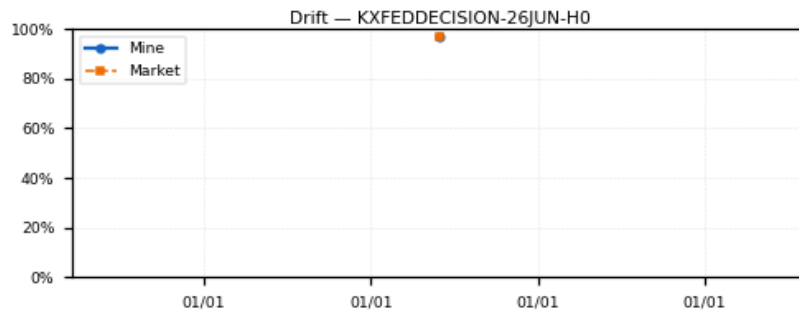

My prob: **97.0%** Confidence: **high** Market: **96.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: A rate hike at a single meeting during an established hold cycle is essentially unprecedented absent a crisis; Fed held in April with no hike signal, CPI ~3.8% and unemployment 4.3% are not emergency triggers, and futures imply ~99% no-hike.

Key drivers: Fed held in April; no hike signal; CPI 3.8% not emergency; futures ~99% hold

Will there be a recession in 2026? (KXRECSSNBER-26)

Category: economy | Closes: 2027-01-31 13:25 UTC

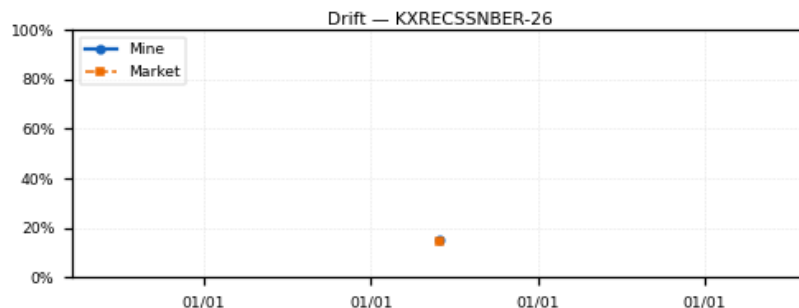

My prob: **15.0%** Confidence: **medium** Market: **14.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: Resolution needs two consecutive negative GDP quarters; Q1 2026 (+1.6%) and Q2 (~+3.8% GDPNow) are positive and 2025 had none, so YES requires both Q3 and Q4 2026 negative — a sharp H2 reversal. Institutional models (~19-35%) are broader than this strict rule, so I land near the market.

Key drivers: Q1 +1.6% and Q2 ~+3.8% positive; rule needs Q3+Q4 both negative; labor softening not broken

Will LeBron James announce his retirement in 2026? (KXLBJRETIRE-26)

Category: statements | Closes: 2026-10-31 14:00 UTC

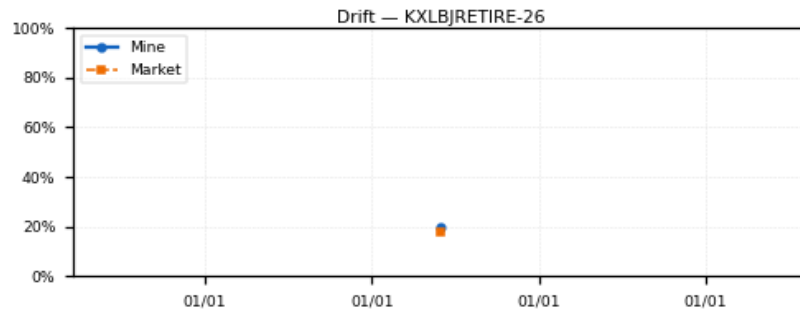

My prob: **20.0%** Confidence: **medium** Market: **17.5%** Edge: **2.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV +\$0.00/contract)

Rationale: LeBron (41, unrestricted FA) faces real retirement uncertainty, but the pull to keep playing with Bronny, still-useful production (20.9 PPG), and a stated July/August decision timeline make signing the more likely outcome before the season tips off; health (sciatica) keeps retirement a live minority.

Key drivers: Bronny pairing motivation; still 20.9 PPG at 41; stated Jul/Aug decision; sciatica health risk

Will Netflix's takeover of Warner Brothers succeed Before July 2027? (KXTAKEOVERACQWB-27JUN30-NFLX)

Category: culture | Closes: 2027-07-01 03:59 UTC

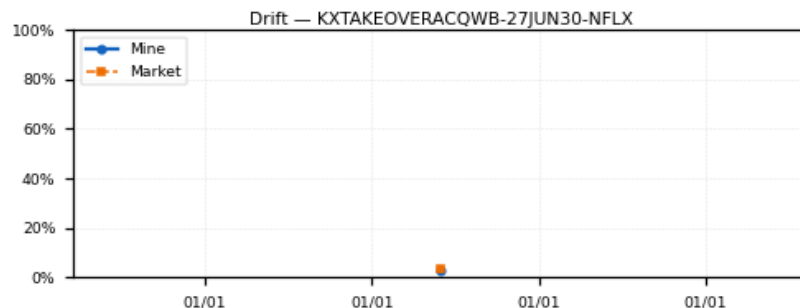

My prob: **3.0%** Confidence: **high** Market: **3.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: Netflix's Dec-2025 bid for Warner Bros. Discovery collapsed: facing a Paramount Skydance counter-bid and a DOJ second request, WBD signed a definitive merger with Paramount in Feb 2026 and Netflix withdrew, making a completed Netflix takeover before July 2027 near-impossible.

Key drivers: Netflix withdrew its bid; WBD signed definitive deal with Paramount; DOJ second request; bipartisan opposition

Will Graham Platner be the Democratic nominee for the Senate in Maine?

(KXSENATEMED-26-GRA)

Category: politics | Closes: 2026-11-03 15:00 UTC

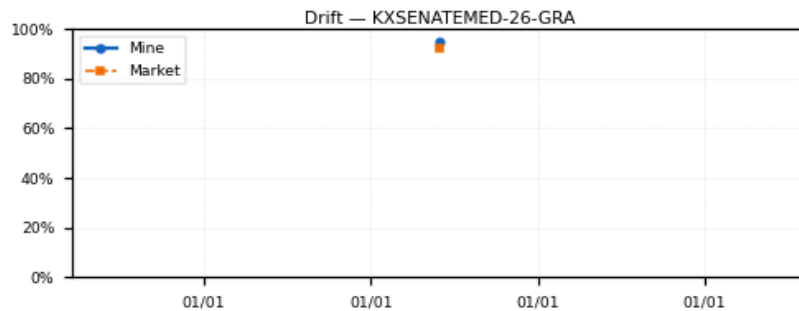

My prob: **95.0%** Confidence: **high** Market: **92.0%** Edge: 2.9%

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV +\$0.02/contract)

Rationale: Graham Platner leads the June 9, 2026 Maine Democratic Senate primary at ~76% after Gov. Mills suspended her campaign; his only opponent is a fringe candidate, he holds Sanders/Warren endorsements, and with 9 days left there is little room for a disqualifying event.

Key drivers: Mills withdrew Apr 30; Platner ~76% primary polling; fringe-only opposition; Sanders/Warren endorsements; 9 days out

Who will win Los Angeles Mayoral Election? (KXMAYORLA-26-SPRA)

Category: politics | Closes: 2027-06-02 14:00 UTC

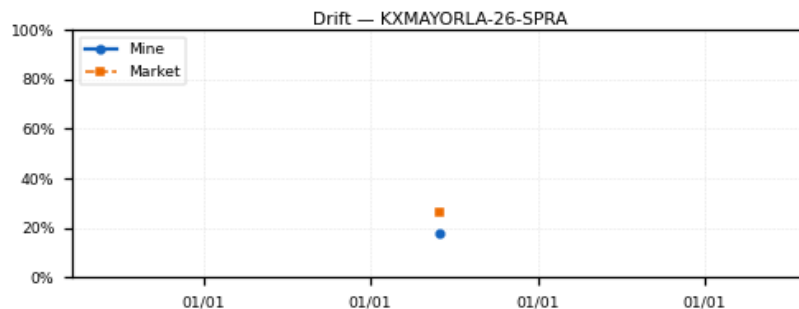

My prob: **18.0%** Confidence: **medium** Market: **26.5%** Edge: -8.5%

Lean: **NO** Conviction: **medium**

Profitability: NO — net EV **+\$0.06/contract** (fee \$0.02, ask \$0.74), conviction medium

Rationale: Pratt polls ~22% and has a real shot at the top-two primary, but winning the general in a D+30 city against incumbent Bass is a steep climb; combining ~75% advance x ~25% conditional win gives ~18%, below the market.

Key drivers: post-fire anger at Bass; Pratt ~22% primary polling; D+30 city + incumbent

Will Republicans win the Senate race in Texas? (SENATETX-26-R)

Category: politics | Closes: 2027-11-03 15:00 UTC

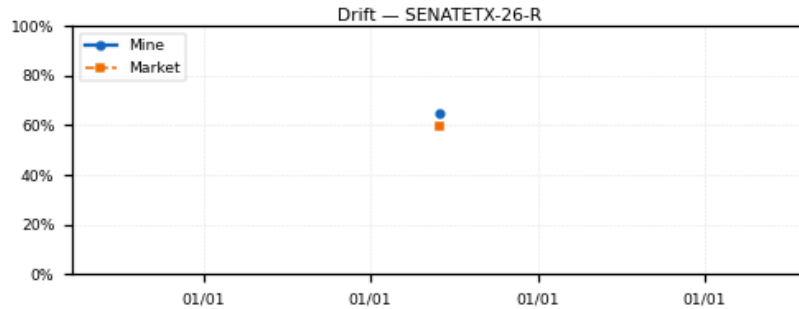

My prob: **65.0%** Confidence: **medium** Market: **59.5%** Edge: **5.5%**

Lean: **YES** Conviction: **low**

Profitability: YES — net EV **+\$0.03/contract** (fee \$0.02, ask \$0.60), conviction low

Rationale: Texas hasn't elected a Democrat statewide since 1994 (R+14 in 2024), a large structural buffer, but nominee Ken Paxton is uniquely damaged (-19 net favorability, Talarico funding edge, polls tied); net ~65%, above the near-tossup market.

Key drivers: Texas R+14 structural lean; Paxton toxicity (-19 net fav); Talarico funding + polling

Donald Trump out before 2027? (KXTRUMPOUT27-27-DJT)

Category: politics | Closes: 2027-01-01 15:00 UTC

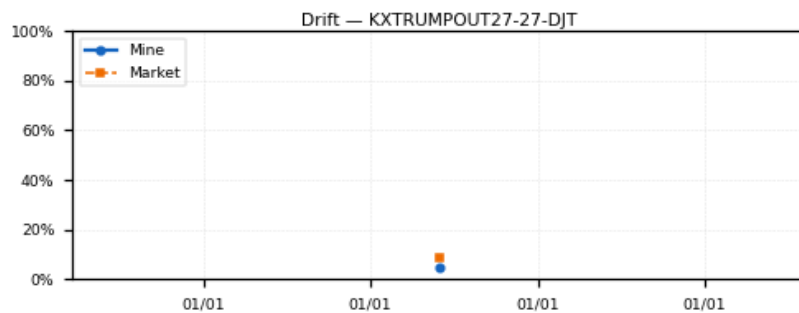

My prob: **5.0%** Confidence: **medium** Market: **8.5%** Edge: **-3.5%**

Lean: **NO** Conviction: **low**

Profitability: NO — net EV **+\$0.02/contract** (fee \$0.01, ask \$0.92), conviction low

Rationale: Dominant pathway is actuarial: ~3% death probability for an 80-year-old over 7 months; political removal is near-zero with a loyal GOP Senate and Cabinet. Combined ~5%, below the market's fat-tail premium.

Key drivers: ~3% 7-month actuarial death risk; no viable removal path (loyal Senate/Cabinet); no resignation propensity

Will "SAVE Act" (H.R. 22) becomes law before Jan 4, 2027? (KXSAVEACT-27-JAN04)

Category: politics | Closes: 2027-01-04 15:00 UTC

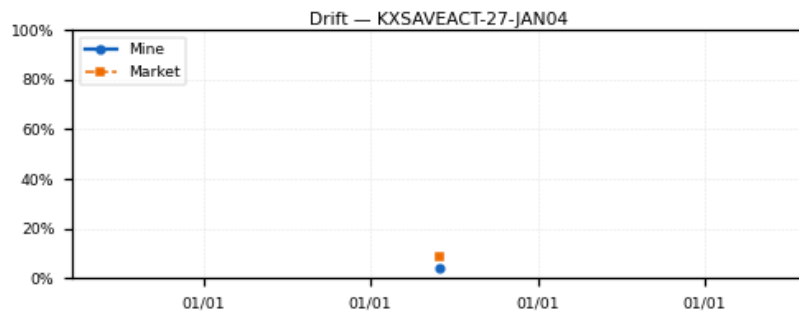

My prob: **4.0%** Confidence: **high** Market: **8.8%** Edge: **-4.8%**

Lean: **NO** Conviction: **low**

Profitability: NO — net EV **+\$0.04/contract** (fee \$0.01, ask \$0.91), conviction low

Rationale: The SAVE Act needs 60 Senate votes; the GOP holds 53, zero Democrats support it, and a reconciliation workaround already failed 48-50 with four GOP defectors plus a Byrd-Rule barrier. ~4%.

Key drivers: 60-vote filibuster wall vs 53 GOP seats; reconciliation workaround failed 48-50; Byrd Rule bars election law

Will James Fishback be the Republican nominee for Governor in Florida? (KXGOVFLNOMR-26-JFIS)

(KXGOVFLNOMR-26-JFIS)

Category: politics | Closes: 2026-11-03 15:00 UTC

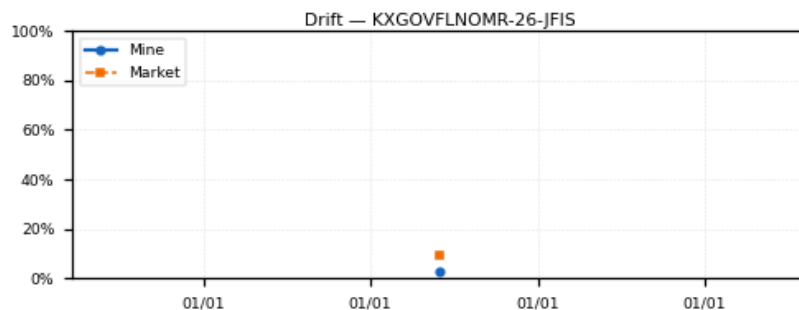

My prob: **3.0%** Confidence: **high** Market: **9.7%** Edge: **-6.7%**

Lean: **NO** Conviction: **medium**

Profitability: NO — net EV **+\$0.05/contract** (fee \$0.01, ask \$0.91), conviction medium

Rationale: Byron Donalds leads the FL GOP primary ~46-54% with Trump's endorsement; Fishback sits ~9% and faces a residency/eligibility challenge. Single-digit challengers vs an endorsed frontrunner win ~2-5%.

Key drivers: Donalds ~46-54% + Trump endorsement; Fishback ~9%; Fishback eligibility challenge

Will the U.S. confirm that aliens exist before 2027? (KXALIENS-27)

Category: politics | Closes: 2027-01-01 15:00 UTC

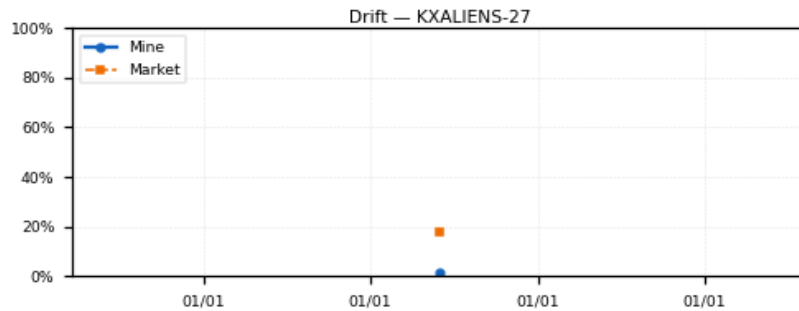

My prob: **1.5%** Confidence: **high** Market: **17.6%** Edge: **-16.1%**

Lean: **NO** Conviction: **high**

Profitability: NO — net EV **+\$0.14/contract** (fee \$0.02, ask \$0.82), conviction high

Rationale: The base rate of an official US government confirmation of extraterrestrial life is zero across history; current UAP/Mars-biosignature news is explicitly framed as inconclusive. ~1.5% vs a market badly overpricing the lottery ticket at ~18%.

Key drivers: zero historical base rate; UAP files framed 'make up your own minds'; Mars findings 'potential not proof'

Will House Control be Republican AND Senate Control be Republican for Feb 2027? (KXBALANCEPOWERCOMBO-27FEB-RR)

Category: politics | Closes: 2027-02-01 15:00 UTC

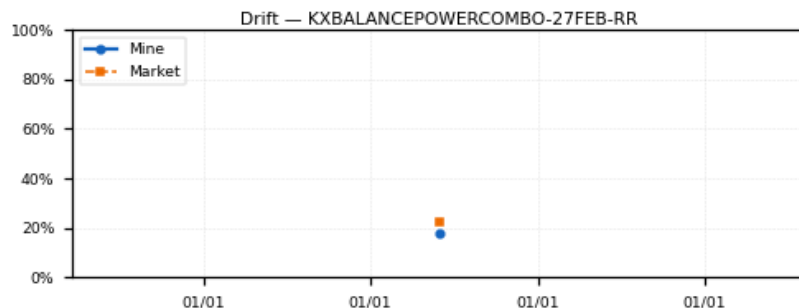

My prob: **18.0%** Confidence: **medium** Market: **22.5%** Edge: **-4.5%**

Lean: **NO** Conviction: **low**

Profitability: NO — net EV **+\$0.02/contract** (fee \$0.02, ask \$0.78), conviction low

Rationale: Joint hold: the House is a likely GOP loss (~37% approval, D+7 generic ballot) while the Senate map is friendlier (~62% hold). Positively correlated, so the joint ~18% — consistent with my House (0.20) and Senate (0.62) views.

Key drivers: House likely flips (D+7 generic); Senate map friendlier; positive correlation lowers joint

Who will win the governorship in California? (KXGOVCA-26-CBIA)

Category: politics | Closes: 2027-11-03 15:00 UTC

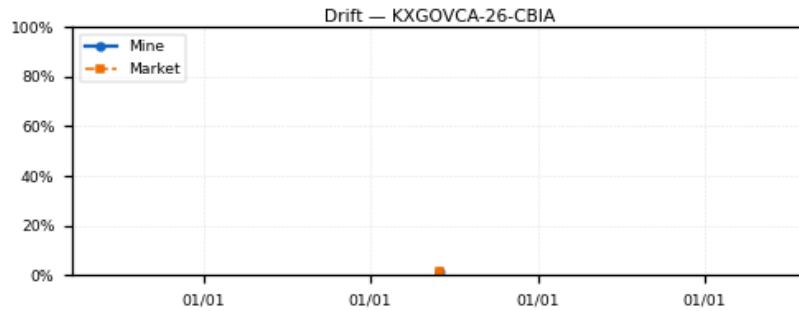

My prob: **1.5%** Confidence: **high** Market: **1.8%** Edge: **-0.3%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: Bianco polls ~13% (4th-5th) and likely fails to even advance past the top-two primary behind Hilton; California has not elected a Republican statewide since 2006. Joint ~1.5%.

Key drivers: Bianco ~13% trails Hilton for GOP slot; no CA statewide R win since 2006; D+13 lean

Will the Federal Reserve Cut rates by 25bps at their June 2026 meeting? (KXFEDDECISION-26JUN-C25)

(KXFEDDECISION-26JUN-C25)

Category: economy | Closes: 2026-06-17 17:59 UTC

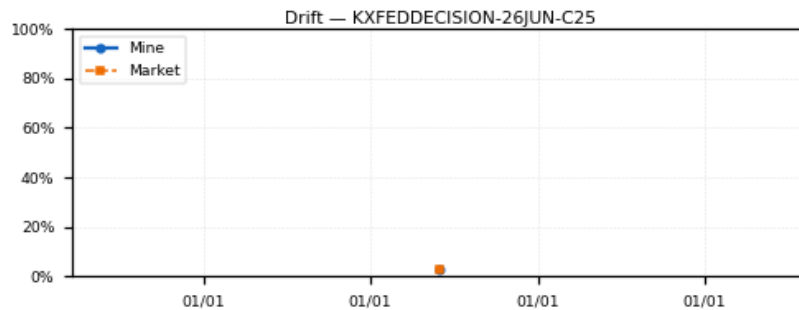

My prob: **3.0%** Confidence: **high** Market: **2.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: With CPI ~3.8%, an 8-4 hold in April, and new chair Warsh's first meeting, a June cut is highly unlikely; CME FedWatch prices ~2% and the data argues for a hold. ~3%.

Key drivers: CPI 3.8% above target; April 8-4 hold; Warsh first meeting precedent; FedWatch ~2%

Will the Fed cut rates 0 times? (KXRATECUTCOUNT-26DEC31-T0)

Category: economy | Closes: 2027-01-01 04:59 UTC

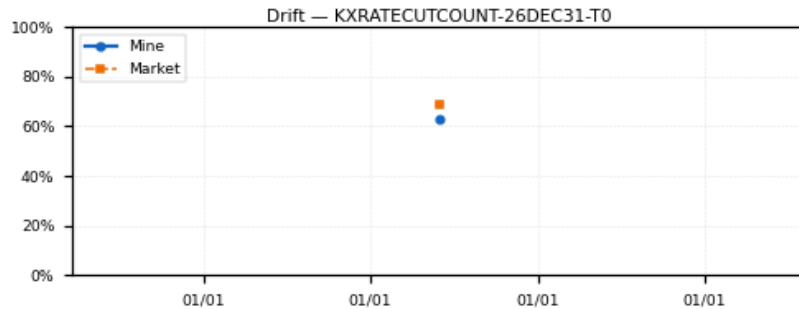

My prob: **63.0%** Confidence: **medium** Market: **68.8%** Edge: **-5.8%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV +\$0.02/contract)

Rationale: The Fed held at all three 2026 meetings so far and inflation is reaccelerating (core PCE 3.3%), supporting zero cuts; but 5 meetings remain and a 7-7 dot-plot split plus an H2 data surprise could unlock a cut. ~63%.

Key drivers: 3 holds so far in 2026; core PCE reaccelerating to 3.3%; 7-7 dot plot + 5 meetings left

Will the Federal Reserve hike rates by June 30, 2026? (FEDHIKE-26JUN30)

Category: economy | Closes: 2026-07-01 03:59 UTC

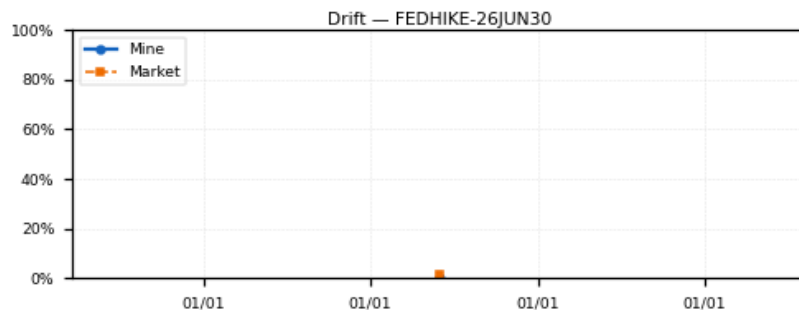

My prob: **0.5%** Confidence: **high** Market: **1.5%** Edge: **-1.0%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV -\$0.01/contract)

Rationale: The Fed has held for five straight meetings with no member advocating a hike; FedWatch prices ~0.6% and a surprise hike at a new chair's first meeting has no modern precedent. ~0.5%.

Key drivers: 5 straight holds; no FOMC member favoring a hike; FedWatch ~0.6%

Will GameStop announce acquisition of eBay before Jan 1, 2027?

(KXACQANNOUNCEEBAY-27JAN01-JAN01)

Category: statements | Closes: 2027-01-01 04:59 UTC

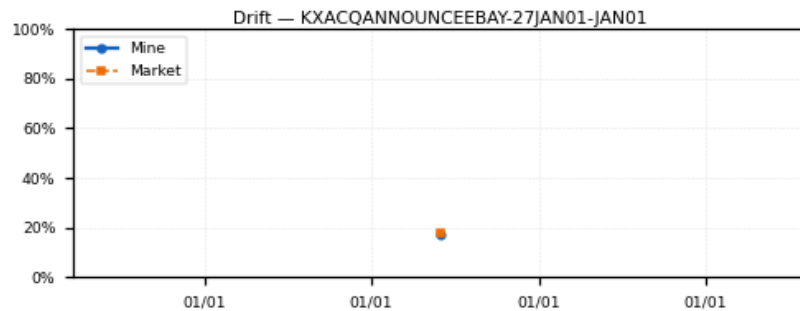

My prob: **17.0%** Confidence: **medium** Market: **17.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

Profitability: no profitable edge after fees (best net EV $-\$0.01/\text{contract}$)

Rationale: GameStop proposed a $\sim\$55\text{B}$ acquisition of eBay on May 3 and built a 5% stake, but eBay's board rejected it twice as 'not credible'; a signed definitive agreement within ~ 7 months faces financing and resistance hurdles. $\sim 17\%$.

Key drivers: eBay board rejected bid twice; Cohen 5% stake + escalation intent; financing credibility gap

Will Republicans win the U.S. Senate in 2026? (CONTROLS-2026-R)

Category: politics | Closes: 2027-02-01 15:00 UTC

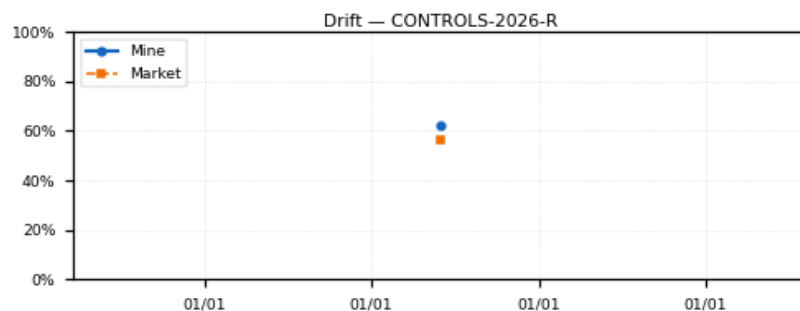

My prob: **62.0%** Confidence: **medium** Market: **56.5%** Edge: **5.5%**

Lean: **YES** Conviction: **low**

Profitability: YES — net EV $+\$0.03/\text{contract}$ (fee $\$0.02$, ask $\$0.57$), conviction low

Rationale: Republicans start 53-47 and Democrats need a tough net +4 (NC+ME+AK+OH) while holding their own; the 2018 precedent shows a friendly map can insulate the majority, though a D+7 environment adds real pressure. $\sim 62\%$, above the market.

Key drivers: GOP 53-47 start; Dems need +4; 2018 map-insulation precedent; D+7 environment pressure

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

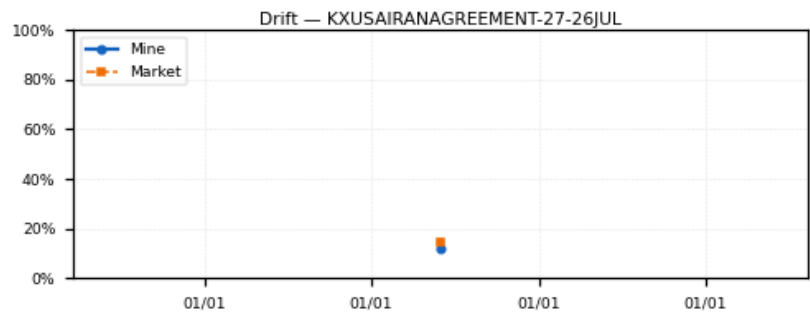

My prob: 12.0% Confidence: medium Market: 14.5% Edge: -2.5%

Lean: NONE Conviction: low

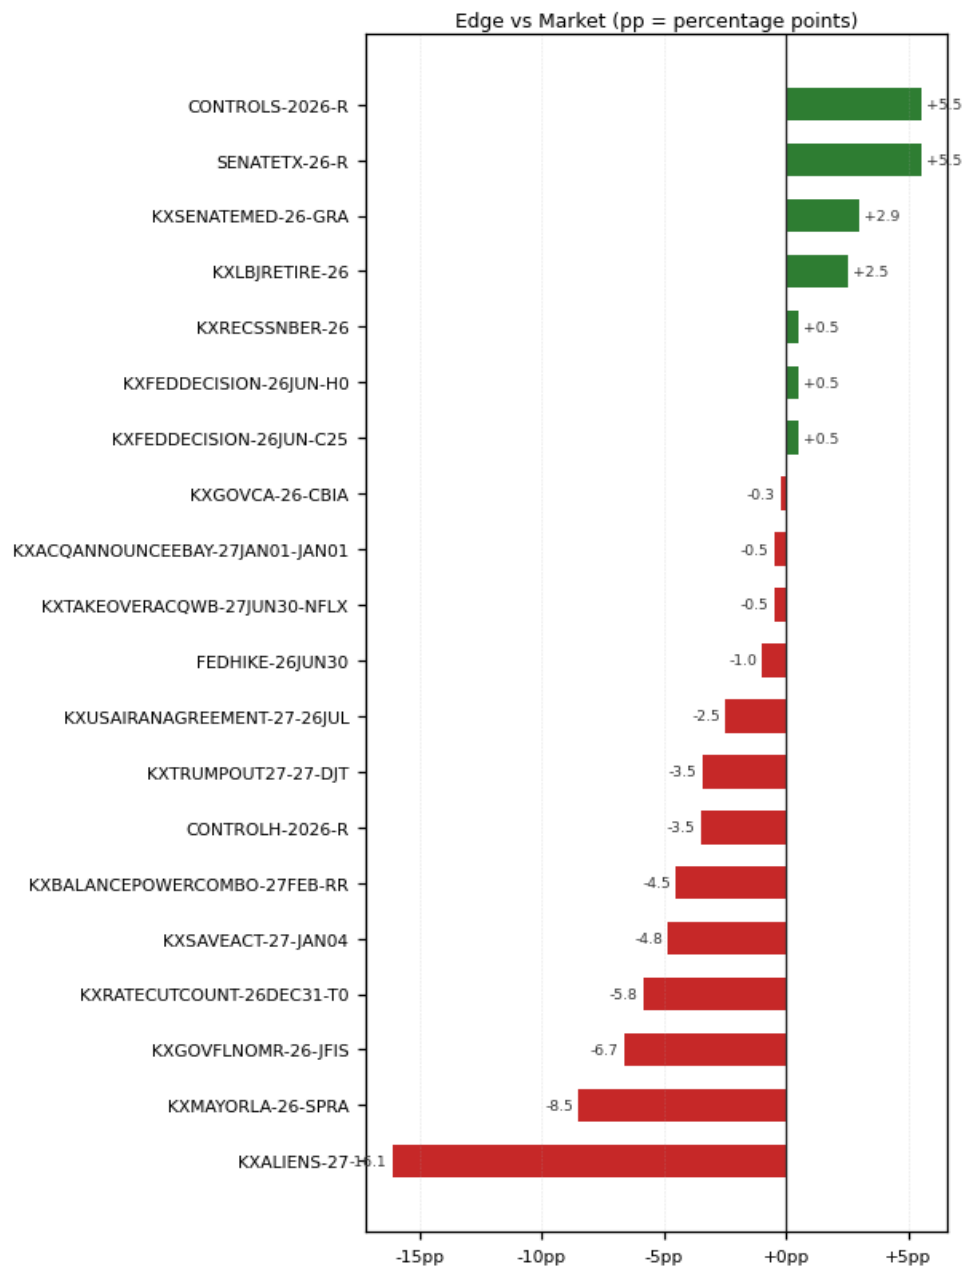

Profitability: no profitable edge after fees (best net EV +\$0.01/contract)

Rationale: A tentative US-Iran MOU to launch 60-day nuclear talks exists but is unsigned, and a full nuclear deal (the resolution bar) is downstream with unresolved enrichment/sanctions issues — unlikely within 30 days. ~12%.

Key drivers: MOU unsigned; Trump sent it back; nuclear deal is downstream of 60-day talks; JCPOA took 3 months framework-to-deal

Edge Overview

Profitable Leans (after fees)

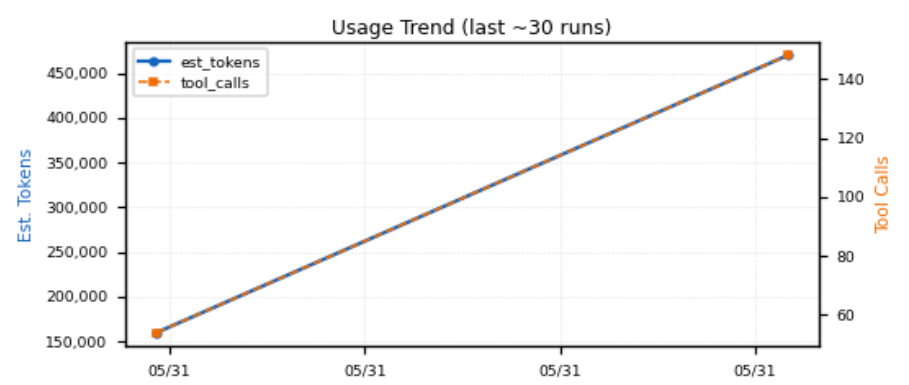

Ticker	Title	Side	Net EV/contract	Conviction
KXALIENS-27	Will the U.S. confirm that aliens exist...	NO	+\$0.14	high
