Active Markets

Will Chong Won-o win the 2026 Seoul mayoral election? (KXSEOULMAYOR-26JUN03-CWON)

Category: politics | Closes: 2026-06-03 14:00 UTC

My prob: **65.0%** Confidence: **low** Market: **82.0%** Edge: **-17.0%**

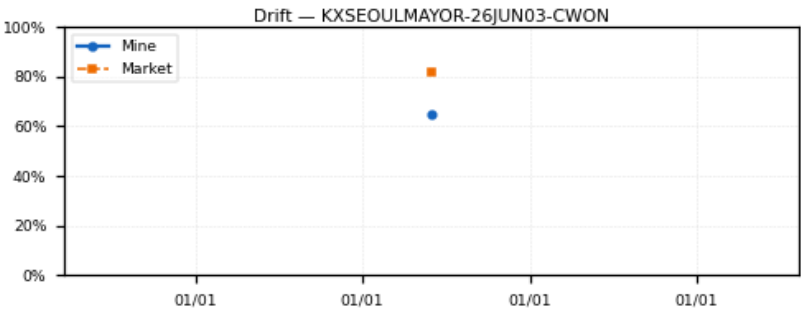

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.19 now (taker, fee \$0.02/contract) -> net EV **+\$0.14/contract**

Trade (limit): rest BUY NO @ \$0.17 GTC until 2026-06-03 -> net EV **+\$0.17/contract** if filled

Rationale: Chong rides a strong DPK national tailwind (Lee Jae-myung ~64% approval) but his double-digit lead collapsed to a statistical tie by May 21; I lean him a modest favorite vs the market's ~82%, with low confidence given hard-to-verify late foreign polling.

Key drivers: DPK national tailwind; lead collapsed to a tie by May 21; incumbent Oh indictment baggage

Will Randy Feenstra be the Republican nominee for Governor in Iowa?

(KXGOVIANOMR-26-RFEE)

Category: politics | Closes: 2026-06-02 14:00 UTC

My prob: **80.0%** Confidence: **low** Market: **93.0%** Edge: **-13.0%**

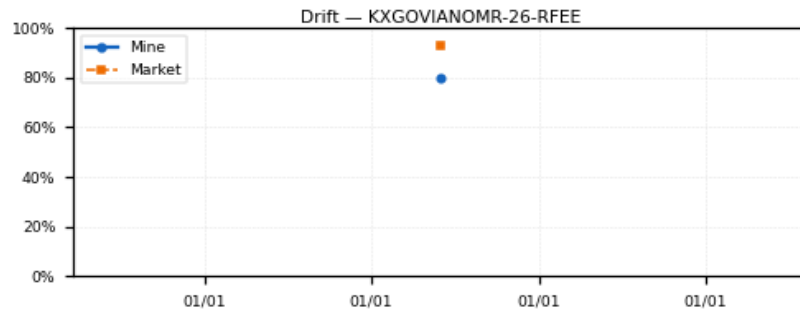

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.07 now (taker, fee \$0.01/contract) -> net EV **+\$0.12/contract**

Trade (limit): rest BUY NO @ \$0.07 GTC until 2026-06-02 -> net EV **+\$0.12/contract** if filled

Rationale: Feenstra got a late Trump endorsement (very strong in Iowa) but polls ~tied with Lahn (22 vs 24) with 27% undecided and a 35% threshold likely forcing a June 13 convention; the market's ~93% looks overconfident given that contested-convention path.

Key drivers: Trump endorsement (strong in IA); tied with Lahn + 27% undecided; 35% threshold -> likely convention

Will the unemployment rate (U-3) be above 4.2% in May?

(KXU3-26MAY-T4.2)

Category: economy | Closes: 2026-06-05 14:00 UTC

My prob: **86.0%** Confidence: **high** Market: **72.5%** Edge: **13.5%**

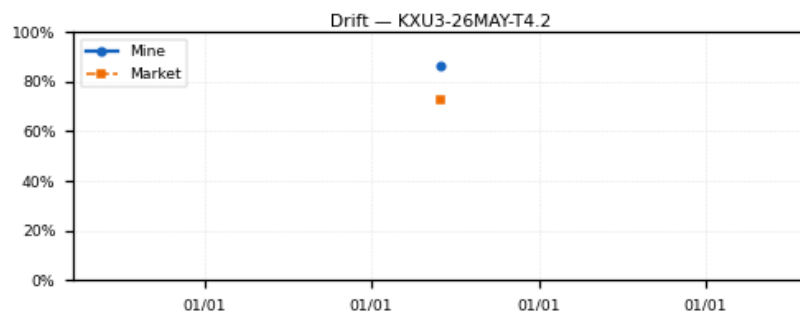

Lean: **YES** Conviction: **medium**

Trade (spot): BUY YES @ \$0.73 now (taker, fee \$0.02/contract) -> net EV **+\$0.11/contract**

Trade (limit): rest BUY YES @ \$0.72 GTC until 2026-06-05 -> net EV **+\$0.12/contract** if filled

Rationale: U-3 printed $\geq 4.3\%$ every month of 2026 and Bloomberg consensus / Chicago Fed nowcast both put May at 4.3%; the macro backdrop tilts toward upside unemployment risk, so $>4.2\%$ is well-supported vs the market's ~72%.

Key drivers: 2026 prints all $\geq 4.3\%$; consensus + Chicago Fed nowcast 4.3%; upside labor risk

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **78.0%** Confidence: **low** Market: **86.5%** Edge: **-8.5%**

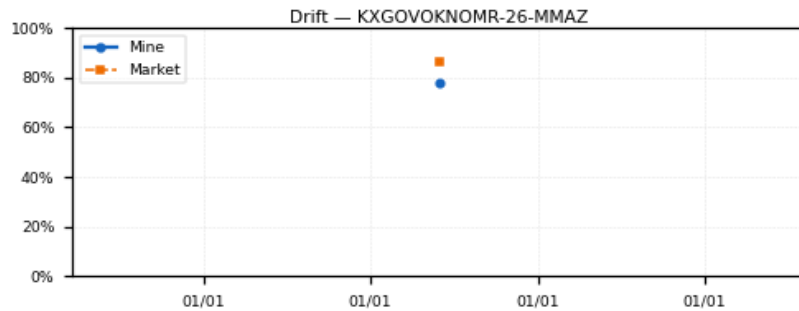

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.14 now (taker, fee \$0.01/contract) -> net EV **+\$0.07/contract**

Trade (limit): rest BUY NO @ \$0.13 GTC until 2026-06-30 -> net EV **+\$0.08/contract** if filled

Rationale: Trump endorsed Mazzei (May 29) in a Trump-loyal state, but a 9-way field makes an outright June 16 win unlikely and likely forces an Aug 25 runoff — which sits awkwardly against this market's June-30 settlement. Treating it as eventual-nomination, ~78%; flagged low conviction for the resolution-timing ambiguity.

Key drivers: Trump endorsement (strong in OK); 9-way field -> likely Aug runoff; June-30 settlement vs Aug runoff ambiguity

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **32.0%** Confidence: **medium** Market: **40.5%** Edge: **-8.5%**

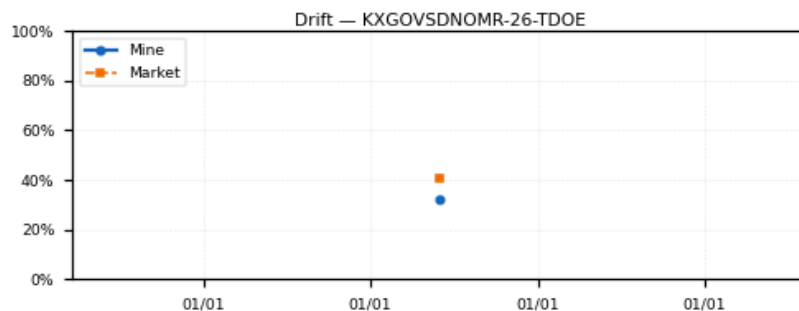

Lean: **NO** Conviction: **medium**

Trade (spot): BUY NO @ \$0.60 now (taker, fee \$0.02/contract) -> net EV **+\$0.06/contract**

Trade (limit): rest BUY NO @ \$0.58 GTC until 2026-06-30 -> net EV **+\$0.08/contract** if filled

Rationale: Doeden leads one poll (26%) but trails 17-34 in another; with no Trump endorsement, a likely runoff favors the establishment (Johnson's 113-lawmaker bloc) consolidating against the outsider. Market's ~40% looks rich.

Key drivers: poll divergence (26% vs 17%); no Trump endorsement; runoff consolidation favors establishment

Will a reconciliation bill passed the Senate before Jun 6, 2026? (KXSENATEREC-26MAY-JUN06)

Category: politics | Closes: 2026-06-14 14:00 UTC

My prob: **15.0%** Confidence: **medium** Market: **23.0%** Edge: **-8.0%**

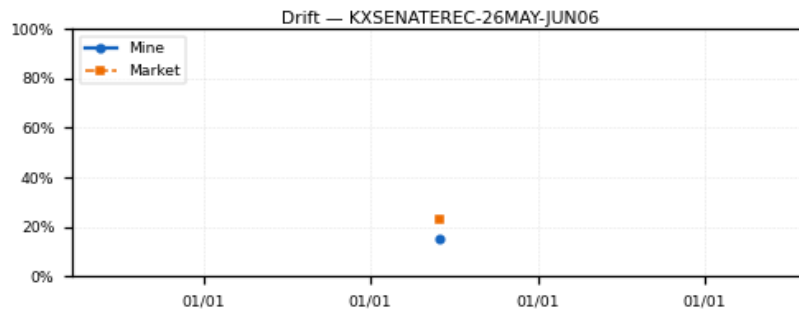

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.78 now (taker, fee \$0.02/contract) -> net EV **+\$0.05/contract**

Trade (limit): rest BUY NO @ \$0.76 GTC until 2026-06-14 -> net EV **+\$0.07/contract** if filled

Rationale: The Senate reconciliation (ICE/CBP) bill missed its pre-recess deadline amid intra-GOP disputes; the Senate returns June 1 with no reconciliation vote scheduled and unfinished text, making passage in ~5 days unlikely.

Key drivers: missed pre-recess deadline; no vote scheduled June 1; text/parliamentarian unresolved

Will Lindsey Graham be the Republican nominee for the Senate in South Carolina? (KXSENATESCR-26-LGRA)

Category: politics | Closes: 2026-06-09 14:00 UTC

My prob: **93.0%** Confidence: **high** Market: **96.6%** Edge: **-3.6%**

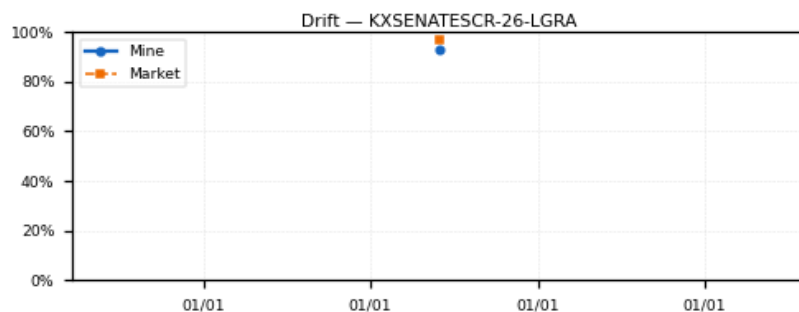

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.04 now (taker, fee \$0.01/contract) -> net EV **+\$0.02/contract**

Trade (limit): rest BUY NO @ \$0.02 GTC until 2026-06-09 -> net EV **+\$0.04/contract** if filled

Rationale: Incumbent Graham polls 56% (above SC's 50% runoff threshold) with a double Trump endorsement and a fragmented field; small residual risk is a sub-50% finish forcing a runoff he would still be favored in.

Key drivers: Graham 56% > 50% threshold; double Trump endorsement; top challenger dropped out

Who will win the first round of the Los Angeles mayoral election? (KXLAMAYOR1R-26-SPRA)

Category: politics | Closes: 2026-06-02 14:00 UTC

My prob: **19.0%** Confidence: **medium** Market: **23.5%** Edge: **-4.5%**

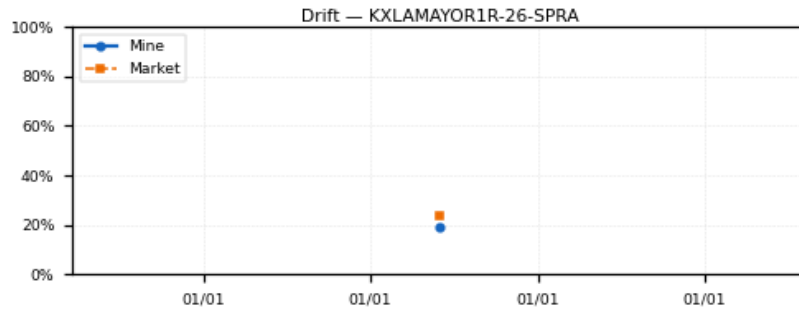

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.77 now (taker, fee \$0.02/contract) -> net EV **+\$0.02/contract**

Trade (limit): rest BUY NO @ \$0.76 GTC until 2026-06-02 -> net EV **+\$0.03/contract** if filled

Rationale: Pratt polls a competitive 3rd (~22%) within the margin behind Bass and Raman, but no credible poll has him 1st; the anti-Bass vote splits with Raman and Bass holds the machine + early mail ballots.

Key drivers: polls 3rd ~22% never 1st; anti-Bass vote split with Raman; Bass machine + mail lead

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

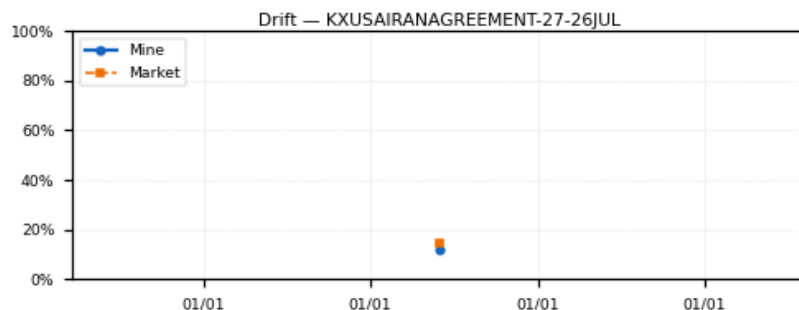

My prob: **12.0%** Confidence: **medium** Market: **14.5%** Edge: **-2.5%**

Lean: **NONE** Conviction: **low**

No profitable trade after fees (best net EV +\$0.01/contract at spot).

Rationale: A tentative US-Iran MOU to launch 60-day nuclear talks is unsigned; a full nuclear deal (the resolution bar) is downstream with unresolved enrichment/sanctions issues — unlikely within 30 days.

Key drivers: MOU unsigned; deal downstream of 60-day talks; JCPOA took 3 months

Will the Federal Reserve Hike rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H25)

Category: economy | Closes: 2026-06-17 18:05 UTC

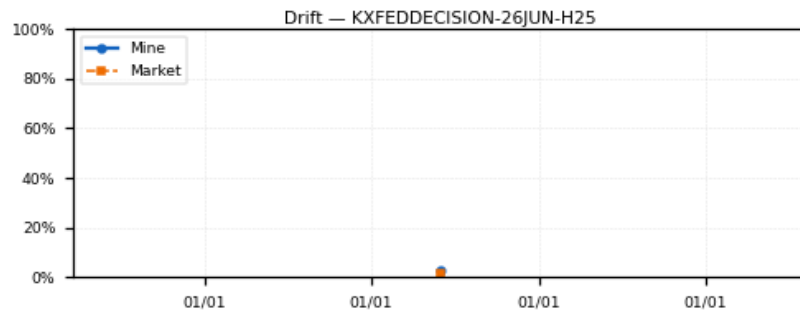

My prob: **3.0%** Confidence: **high** Market: **1.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No profitable trade after fees (best net EV +\$0.00/contract at spot).

Rationale: A 25bp hike requires a tightening pivot with no telegraphing; April was an 8-4 hold with no member favoring a hike and FedWatch prices ~0.6%.

Key drivers: no member favors a hike; FedWatch ~0.6%; new-chair first meeting

Will the Federal Reserve Cut rates by >25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C26)

Category: economy | Closes: 2026-06-17 18:05 UTC

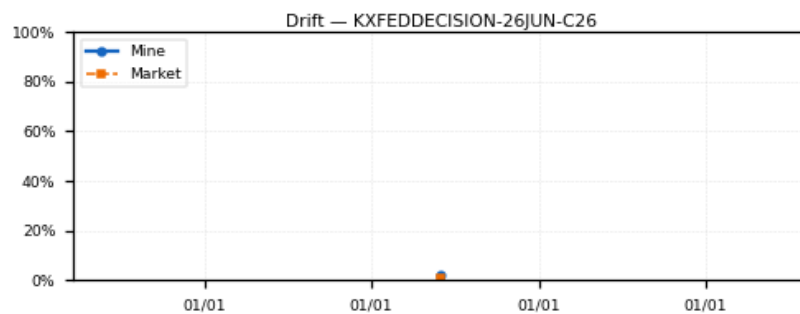

My prob: **2.0%** Confidence: **high** Market: **1.0%** Edge: **1.0%**

Lean: **NONE** Conviction: **low**

No profitable trade after fees (best net EV +\$0.00/contract at spot).

Rationale: A 50bp+ cut has no precedent with inflation near 4%; only a financial crisis in the 17-day window could trigger it. FedWatch ~0%.

Key drivers: no precedent for 50bp+ at ~4% inflation; FedWatch ~0%; no crisis signal

Will Vinnie Brand be the Republican nominee for Senate in New Jersey?

(KXSENATENJR-26-VBRA)

Category: politics | Closes: 2026-06-09 14:00 UTC

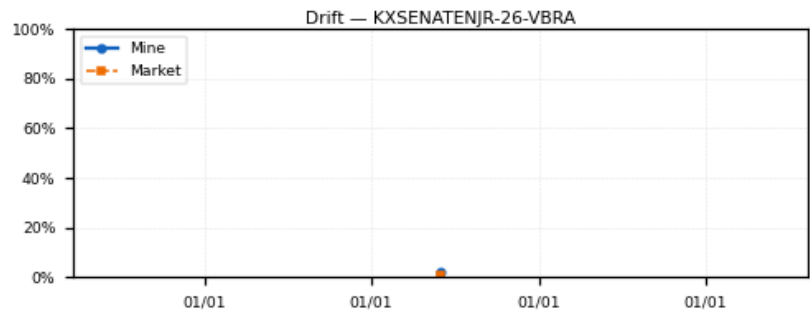

My prob: 2.0% Confidence: high Market: 0.6% Edge: 1.4%

Lean: NONE Conviction: low

No profitable trade after fees (best net EV -\$0.00/contract at spot).

Rationale: Vinnie Brand declined to run in March 2026 and is not on the ballot; only a write-in could deliver YES. Negligible.

Key drivers: Brand declined; not on ballot; no write-in campaign; 5 other candidates running

Who will win California's top-two primary for governor?

(KXGOVCAPRIMARY-26-CBIA)

Category: politics | Closes: 2026-06-02 14:00 UTC

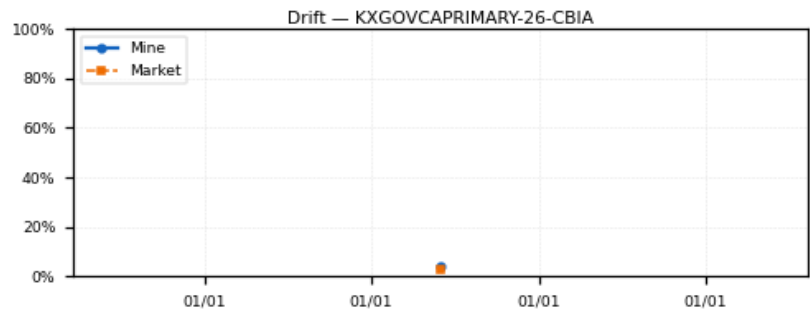

My prob: 4.0% Confidence: high Market: 2.9% Edge: 1.1%

Lean: NONE Conviction: low

No profitable trade after fees (best net EV -\$0.00/contract at spot).

Rationale: Bianco polls ~12-13% (4th), ~8-10 pts behind Hilton (the leading Republican) and the leading Democrats; the top-two is Becerra plus Hilton/Steyer, not Bianco.

Key drivers: Bianco ~12-13% trails Hilton; top-two is Becerra+Hilton/Steyer; CA D+13

Who will advance from California's top-two primary for governor?

(KXGOVCAPRIMARYPARTY-26-2R)

Category: politics | Closes: 2026-06-30 14:00 UTC

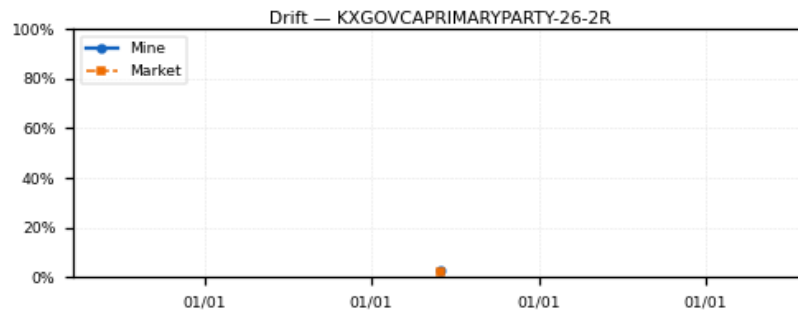

My prob: **3.0%** Confidence: **high** Market: **2.1%** Edge: **0.9%**

Lean: **NONE** Conviction: **low**

No profitable trade after fees (best net EV -\$0.01/contract at spot).

Rationale: Combined GOP polling (~33%) is far below the combined Democratic field (~55%); CA has never sent two Republicans out of a top-two gov primary. Near-zero.

Key drivers: GOP ~33% vs Dem ~55%; no precedent for 2 R in CA top-two; Becerra near-certain to advance

Will the Federal Reserve Hike rates by 0bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H0)

Category: economy | Closes: 2026-06-17 17:59 UTC

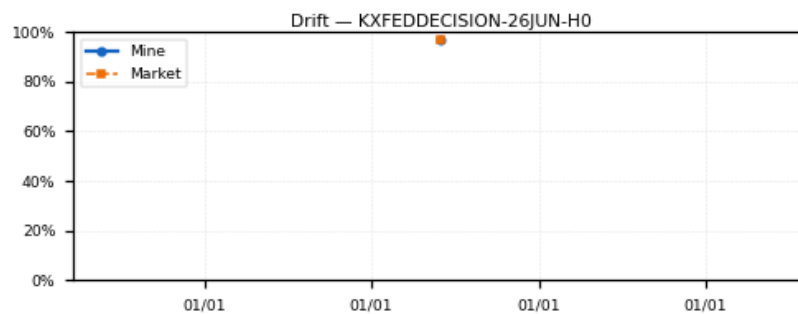

My prob: **97.0%** Confidence: **high** Market: **96.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No profitable trade after fees (best net EV -\$0.01/contract at spot).

Rationale: A hike at a single meeting in an established hold cycle is essentially unprecedented absent a crisis; CPI ~3.8% is not an emergency trigger and futures imply ~99% no-hike.

Key drivers: no tightening posture; CPI not emergency; FedWatch ~99% hold

Will the Federal Reserve Cut rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C25)

Category: economy | Closes: 2026-06-17 17:59 UTC

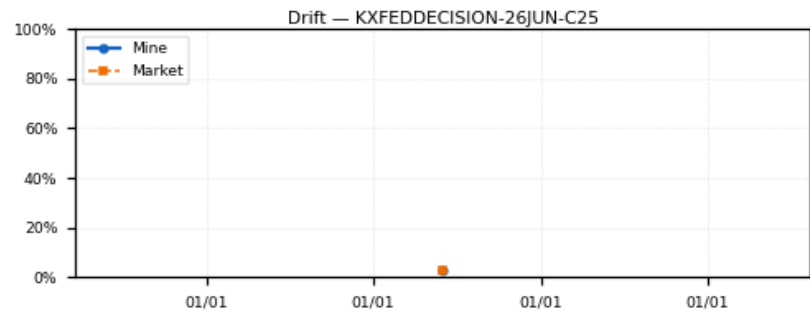

My prob: **3.0%** Confidence: **high** Market: **2.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

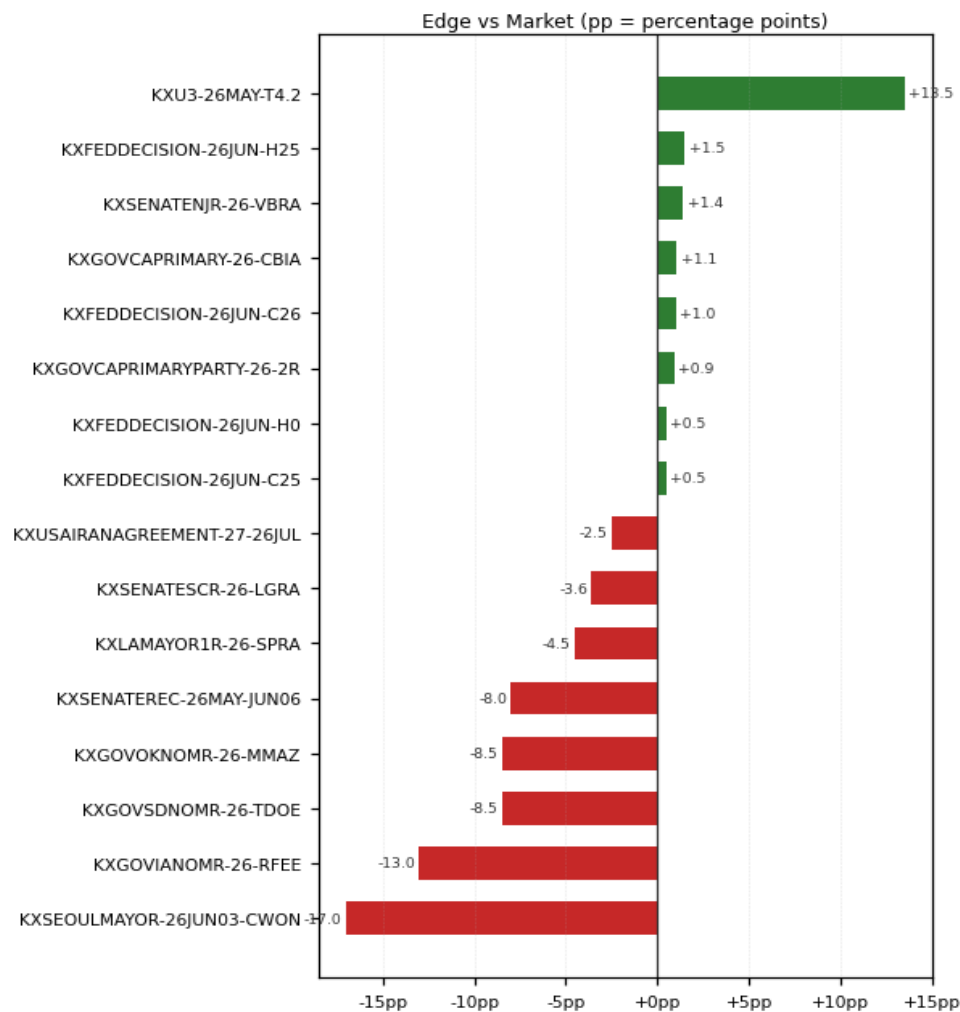

No profitable trade after fees (best net EV -\$0.01/contract at spot).

Rationale: With CPI ~3.8% and an 8-4 April hold under new chair Warsh, a June cut is highly unlikely; FedWatch ~2-3%.

Key drivers: CPI 3.8%; April 8-4 hold; FedWatch ~2-3%
