Structural Edge — the money engine (paper)

Live forward record of the history-learned market-calibration edge (*lib/atlas*: mid-liquidity longshot fades, +EV after fee & half-spread). The **conservative** column is the official number: a rec counts only if the rec-time orderbook snapshot proves the limit was marketable, and it fills at the real ask. The legacy cohort predates fill evidence and is provisional only. **All positions are PAPER — no live trading until the verification bar passes and the user signs off (constraint 2026-07-17).**

Cohort	Resolved	Scored	No-fill	Win rate	P&L	Deployed	ROI	Beat mkt
VERIFIED (conservative — official)	8	8	0	6/8 (75%)	-\$1.09	\$7.09	-15.4%	6/8
legacy (optimistic — fills unverified)	14	14	0	14/14 (100%)	+\$2.90	\$11.10	+26.1%	14/14

Verification bar (precommitted, PLAN_FOR_OPUS \$A4) — passing unlocks the live-trading *conversation* only: **NOT PASSED**

Criterion	Target	Current	Pass
n_verified_fills	40	8	—
conservative_roi	0.08	-0.154	—
roi_ci_excludes_zero	>0 at 90% CI	[-0.433, +0.120]	—
positive_cells	3	0	—
tail_survival	tail hit absorbed w/ ROI>0, or stress P(loss)<10%	tail_hits=2, stress_p_loss=0.0	PASS
hit_rate_consistent	observed loss-rate <= calibrated + 2σ	expected=0.014, observed=0.25	—

Tail stress (Monte Carlo, 100 future recs × 5000 trials, calibrated probabilities as truth): P(ROI<0) = **0.0%**; ROI mean +9.7% (p5 +6.3% / p95 +12.8%); expected max drawdown -1.06 units; break-even win rate 86.7%. A 13-0 start does NOT survive this section unexamined: one tail hit erases 3–8 wins.

Per-cell record (verified cohort — the kill-switch view: a cell dies at n≥15 with ROI<0)

Cell	Scored	Win rate	P&L	ROI
statements 5-15c mid	8	75%	-\$1.09	-15.4%

Paper broker (resting-limit simulation, D1 sizing on a notional \$1000): 37 orders (filled 7, resting 3, settled 2, skipped 25). Settled P&L \$-16.50 on \$38.50 (ROI -42.9%); no-fill rate 0%; equity \$983.50, deployed \$176.35, drawdown -1.7%.

Open recommendations (paper basket — correlated longshot fade; size small & equal; one thematic position)

Open positions — expected P&L (forward-looking)

Forward-looking expected P&L on **75** open modal-side positions (mark-to-model): **+\$0.32**/contract total (22 are +EV). Of that, **+\$0.53** is on actionable leans (the rest is counterfactual — positions the confidence gate is holding us out of).

Autonomous Learning — policy & proposals

The decision policy (when to take a position) is data, not frozen code. The learning pass reads the system's own resolved record and proposes nudges, but anti-overfit guardrails (min-n, max-step) gate every change. **Policy v10**; proposals as of 2026-07-19.

Knob (decision threshold)	Value
min profitable EV (\$/contract)	0.020
max market-fade gap (no-high-conf)	0.050
conviction medium / high EV	0.05 / 0.12
low confidence never leans	True
adversarial veto binding	True

Pending proposals (from the system's own outcomes)

Knob	Current → Proposed	n	Guardrail	Rationale
max_market_disagreement	0.05 → None	48	INSUFFICIENT_DATA	No coherent 'wider fades lose' ladder yet (signal not monotone / tail band
hard_gap_ceiling	0.2 → None	48	INSUFFICIENT_DATA	No catastrophic wide-fade band yet — the absolute ceiling stays put.
min_confidence_for_lean	medium → high	48	AUTO_OK	medium-confidence ROI -14% (n=15) while high-confidence profits 0% (n
adversarial_veto_binding	True → None	8	INSUFFICIENT_DATA	Veto precision becomes learnable once vetoed/revised positions resolve;

INSUFFICIENT_DATA = directionally real but too few samples to trust; HUMAN_GATE = change too large to auto-apply; AUTO_OK = guardrail-cleared, auto-applied. Nothing auto-applies until the record is large enough.

Active Markets

Will Francesca Hong be the Democratic nominee for Governor in Wisconsin?

(KXGOVWINOMD-26-FHON)

Category: politics | Closes: 2026-08-31 14:00 UTC

My prob: **48.2%** Confidence: **medium** Market: **64.5%** Edge: **-16.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: 16pt gap vs a liquid market without high confidence — more likely my error than edge (Indicative raw EV +\$0.14/contract at my probability, not recommended.)

Rationale: There is currently no significant evidence or public information suggesting that Francesca Hong is a major contender for the Democratic nomination for Governor in Wisconsin. The absence of direct mentions in reputable news sources and the lack of prior political prominence for Hong suggest a low probability. However, the situation could change if new information emerges.

Key drivers: Current political prominence of Francesca Hong; Recent developments in Wisconsin Democratic Party leadership; Public endorsements or campaign activity

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)
Category: politics | Closes: 2026-06-30 14:00 UTC
My prob: 69.3% Confidence: high Market: 81.5% Edge: -12.2%
Lean: NONE Conviction: low

No actionable lean: ADVERSARIAL VETO: The position is not supported by the evidence, and the divergence from the market is not justified. The forecaster appears overconfident in a position that lacks sufficient reasoning and contradicts the market's higher confidence in the YES (Indicative raw EV +\$0.10/contract at my probability, not recommended.)

Rationale: Mike Mazzei has advanced to the Republican runoff for Oklahoma Governor in 2026, as confirmed by multiple reputable sources between June 16 and June 25, 2026. However, the outcome of the runoff remains uncertain due to key uncertainties such as campaign strategies, voter preferences, and the influence of national figures like Trump. The base rate suggests that runoff elections are common in Oklaho

Key drivers: Mazzei's advancement to the runoff as a Trump-backed candidate.; The influence of national political figures like Trump on the race.; The competitive nature of the runoff and the potential for shifting voter preferences.

Will Mandela Barnes be the Democratic nominee for Governor in Wisconsin?

(KXGOVWINOMD-26-MBAR)
Category: politics | Closes: 2026-08-31 14:00 UTC
My prob: 3.8% Confidence: high Market: 5.0% Edge: -1.1%
Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 4%, modal NO) — staying out. (Indicative raw EV +\$0.00/contract at my probability, not recommended.)

Rationale: The evidence suggests that Mandela Barnes is not currently identified as a candidate in the Wisconsin gubernatorial race. David Crowley has reentered the race with significant endorsements, while Sara Rodriguez has dropped out, creating a dynamic but not necessarily favorable environment for Barnes. No direct evidence links Barnes to the race, and the base rate of multiple candidates in Wisconsin

Key drivers: David Crowley's reentry into the race; Sara Rodriguez's exit; Lack of direct evidence linking Mandela Barnes to the race

The Odyssey Rotten Tomatoes score? (KXRT-ODY-90)

Category: culture | Closes: 2026-07-20 14:00 UTC
My prob: 100.0% Confidence: high Market: 99.5% Edge: 0.5%
Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 100%, modal YES) — staying out.

Rationale: Multiple credible sources (TODAY.com, IMDb, Forbes, Rotten Tomatoes, The Daily Beast) consistently report that 'The Odyssey' has a 98% Rotten Tomatoes score. The score is noted as a record for Christopher Nolan, and the film is widely acclaimed as a masterpiece. Although there are mentions of a few negative reviews, none of the sources indicate any significant deviation from the 98% score. The bas

Key drivers: Multiple reputable sources explicitly state the 98% score.; Consistency across different sources and media outlets.; Contextual support from Nolan's historical performance on Rotten Tomatoes.

Will it be confirmed that Graham Platner is the Democratic nominee for U.S. Senate in Maine on July 31, 2026? (KXMEDNOMJUL-26AUG01-GPLA)

Category: politics | Closes: 2026-08-08 14:00 UTC
My prob: 0.0% Confidence: high Market: 0.5% Edge: -0.5%
Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: Multiple credible sources from July 14-17, 2026, confirm that Graham Platner has withdrawn from the Senate nomination, with Maine Democrats actively seeking a replacement. While the exact timeline of his withdrawal is unclear, the consensus across multiple reputable outlets indicates that he is no longer the nominee. The base rate of candidates withdrawing and being replaced by party members suppo

Key drivers: Multiple independent sources confirming Graham Platner's withdrawal from the Senate nomination.; Maine Democrats actively seeking a replacement; indicating Platner is no longer the nominee.; Base rate of candidate withdrawals in Senate elections.

Will it be confirmed that Dan Kleban is the Democratic nominee for U.S. Senate in Maine on July 31, 2026? (KXMEDNOMJUL-26AUG01-DKLE)

Category: politics | Closes: 2026-08-08 14:00 UTC

My prob: **0.0%** Confidence: **medium** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: As of July 17, 2026, there is no definitive evidence confirming Dan Kleban as the Democratic nominee for U.S. Senate in Maine by July 31, 2026. While multiple reputable news sources were consulted, none provided direct confirmation of Kleban's nomination status. The lack of explicit confirmation suggests that the nomination process may still be ongoing or uncertain, and thus the probability is mod

Key drivers: Absence of direct confirmation from reputable sources; Uncertainty in nomination timeline; No prior confirmation in evidence notes

Will it be confirmed that Jordan Wood is the Democratic nominee for U.S. Senate in Maine on July 31, 2026? (KXMEDNOMJUL-26AUG01-JWOO)

Category: politics | Closes: 2026-08-08 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: Jordan Wood has relaunched his Senate bid following Graham Platner's exit, suggesting he is a serious contender. However, there are multiple Democratic candidates running for the seat, and no evidence yet confirms that Wood will be the nominee. The uncertainty around the primary process and the difficulty in replacing Platner indicate that the outcome is not yet clear.

Key drivers: Jordan Wood's re-entry into the race following Graham Platner's exit; Multiple Democratic candidates are vying for the nomination; The primary process is ongoing and the final nominee is uncertain

Will I Knew It, I Knew You be 1 on the Billboard Hot 100 in July 2026?

(KXRANKLIST1SONG-26JUL25-IKN)

Category: culture | Closes: 2026-07-25 14:00 UTC

My prob: 0.0% Confidence: high Market: 0.5% Edge: -0.5%

Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The song 'I Knew It, I Knew You' by Taylor Swift was at No. 1 on the Billboard Hot 100 for the second week as of June 22, 2026, which suggests strong momentum. However, there is no direct confirmation of its position as of July 19, 2026. The fact that 'Choosin' Texas' by Ella Langley remained at No. 1 for the 13th week as of July 13, 2026, indicates that long-running hits can maintain chart domina

Key drivers: Taylor Swift's historical success on the Billboard Hot 100.; Current chart position of 'I Knew It; I Knew You' as of June 2026.; Longevity of Ella Langley's 'Choosin' Texas' on the chart.; Uncertainty around the July 18

How many 2026 FIFA World Cup matches will Donald Trump attend this season?

(KXTRUMPWORLDCUP-26-DJT-2)

Category: politics | Closes: 2026-07-20 14:00 UTC

My prob: 0.9% Confidence: high Market: 0.5% Edge: 0.4%

Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 1%, modal NO) — staying out.

Rationale: Multiple credible and independent sources (Yahoo Sports, The Guardian, Rolling Stone, Deadline, Fox News, and bolavip.com) confirm that Donald Trump attended the 2026 FIFA World Cup final in New Jersey, including arriving by helicopter, attending the national anthem performance, being present during the halftime show and closing ceremony, and presenting the trophy to the winner. These multiple, cr

Key drivers: Multiple independent sources confirm Trump's attendance at the World Cup final.; No evidence is provided for attendance at any other matches.; No conflicting reports or denials are present in the evidence.

Will it be confirmed that Nirav Shah is the Democratic nominee for U.S. Senate in Maine on July 31, 2026? (KXMEDNOMJUL-26AUG01-NSHA)

Category: politics | Closes: 2026-08-08 14:00 UTC

My prob: **6.5%** Confidence: **high** Market: **6.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 6%, modal NO) — staying out.

Rationale: Nirav Shah is currently identified as a U.S. Senate candidate in Maine, but there is no evidence to confirm he will be the Democratic nominee by July 31, 2026. The political landscape in Maine is highly competitive, with multiple candidates vying for the nomination following Graham Platner's exit. The confirmation process depends heavily on primary elections and party conventions, and the current

Key drivers: Outcome of primary elections and party conventions; Level of support Nirav Shah receives from key voter groups and party leaders; Impact of ongoing debates and candidate positioning on voter preferences

Who will win the 2026 South Carolina Republican Senate special primary? (KXSCRENS-26-RFRY)

Category: politics | Closes: 2026-08-11 14:00 UTC

My prob: **8.5%** Confidence: **high** Market: **8.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 8%, modal NO) — staying out.

Rationale: The evidence indicates that the South Carolina Republican Senate special primary is highly competitive, with multiple candidates in the running and active interest from prediction markets. While there is no clear frontrunner, the base rate suggests that special elections are often influenced by local dynamics and campaign momentum. The key uncertainties include voter preferences, campaign strategi

Key drivers: Competitiveness of the special primary with multiple candidates; Active prediction market interest indicating uncertainty; Potential influence of local voter preferences and campaign strategies; Possibility of procedural delays affecting the timeline

Will it be confirmed that Troy Jackson is the Democratic nominee for U.S. Senate in Maine on July 31, 2026? (KXMEDNOMJUL-26AUG01-TJAC)

Category: politics | Closes: 2026-08-08 14:00 UTC

My prob: **88.5%** Confidence: **high** Market: **88.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 88%, modal YES) — staying out.

Rationale: The evidence indicates that Graham Platner has withdrawn, and the Maine Democratic Party is actively considering multiple candidates to replace him. Troy Jackson is not mentioned as a contender in any of the sources provided, and no confirmation of his nomination has been reported. The absence of any direct mention of Jackson in the evidence, combined with the active search for a replacement, sugg

Key drivers: Graham Platner's withdrawal has created an open race with multiple candidates being considered.; Troy Jackson is not named in any of the sources as a potential replacement or nominee.; The Maine Democratic Party is still in the process of selecting a nominee.

Will Genter Drummond be the Republican nominee for Governor in Oklahoma? (KXGOVOKNOMR-26-GDRU)

(KXGOVOKNOMR-26-GDRU)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **17.2%** Confidence: **medium** Market: **15.0%** Edge: **2.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 17%, modal NO) — staying out.

Rationale: The evidence is sparse and lacks direct information about Genter Drummond's likelihood of securing the Republican nomination for Governor in Oklahoma. While multiple news sources were consulted, no explicit statements or developments regarding his candidacy were identified. This makes it difficult to update from a base rate, which suggests that the probability of any single individual becoming a g

Key drivers: Lack of direct evidence about Drummond's campaign or support; No clear signals from sources consulted

Will David Crowley be the Democratic nominee for Governor in Wisconsin?

(KXGOVWINOMD-26-DCRO)

Category: politics | Closes: 2026-08-31 14:00 UTC

My prob: **20.2%** Confidence: **high** Market: **20.5%** Edge: **-0.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 20%, modal NO) — staying out.

Rationale: David Crowley is not currently a well-known figure in Wisconsin politics, and there is no evidence in the search results indicating that he is a prominent candidate or has made significant moves to position himself as the Democratic nominee. The absence of direct mentions of Crowley in reputable news sources suggests he is not a frontrunner. The reference class for underdog candidates in state-level

Key drivers: Lack of media presence or coverage of David Crowley; No indication of strong grassroots support or endorsements; No prior political prominence in Wisconsin

Who will win the 2026 South Carolina Republican Senate special primary?

(KXSCRESENS-26-DNOR)

Category: politics | Closes: 2026-08-11 14:00 UTC

My prob: **67.5%** Confidence: **high** Market: **67.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 68%, modal YES) — staying out.

Rationale: The evidence indicates that the South Carolina Republican Senate special primary is highly competitive with multiple candidates vying for the seat. Prediction markets are active, but no single candidate has emerged as a clear favorite. The base rate for Senate vacancies being filled through special elections suggests a dynamic and unpredictable process. While there is public interest and analysis,

Key drivers: High competition among candidates; Active prediction markets reflecting public sentiment but no clear favorite; Uncertain voter preferences and campaign strategies

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: 10.3% Confidence: medium Market: 5.7% Edge: 4.6%

Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 10%, modal NO) — staying out.

Rationale: There is currently no direct evidence in the search results about Toby Doeden's status in the 2026 South Dakota Republican gubernatorial primary. The lack of specific information means that the probability is based on a low base rate for any single candidate in a primary race without clear indicators of support or opposition. The search results consulted are reputable but do not mention Doeden, su

Key drivers: Lack of direct evidence about Toby Doeden's involvement or support in the primary; No information in reputable sources about his candidacy

Edge Overview

Profitable Leans (after fees)

No profitable leans after fees this run — markets are efficiently priced for our estimates.

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 \cdot p \cdot (1-p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

WIN: locked entry p~0.95 beat market (Brier 0.0025 vs 0.0121); Trump attended an event he publicly committed to — high base rate, correct direction. Critic's low-base-rate 'miss' rejected as directionally confused (Defender). Upheld process note: even on confident forecasts near the market price, log an explicit CI and cite >=3 independent sources with a one-line divergence justification.

Brier (mine): 0.0025 | Brier (market): 0.0121 | [beat market](#)

Fading an over-priced CPI strike is the right trade, but keep the tail floor: monthly CPI prints have surprised by 0.1pp+ often enough that sub-1% forecasts on an adjacent strike are miscalibrated even when they win.

2026-07-18 | resolution | KXCPI-26JUN-T0.0 | economy [\[cpi-strike-fade\]](#)

Brier (mine): 0.1600 | Brier (market): 0.0156 | [lost to market](#)

The YoY strike fade with an acknowledged data gap was well-reasoned; keep documenting why the market's higher tail is unjustified — that justification is what separated this from the T0.0 critique.

2026-07-18 | resolution | KXECONSTATCPIYOY-26JUN-T3.9 | economy [\[cpi-strike-fade\]](#)

Brier (mine): 0.0900 | Brier (market): 0.0272 | [lost to market](#)

Same family as T3.9 but forecast 0.0002 — the zero-tail habit repeats across CPI strikes. Set a standing floor (≥ 0.005) for any single-print macro strike regardless of distance.

2026-07-18 | resolution | KXECONSTATCPIYOY-26JUN-T4.1 | economy [\[zero-probability-tail\]](#)
Brier (mine): 0.0400 | Brier (market): 0.0004 | lost to market

Crisis-suppressed logistics series revert slowly; citing the suppression mechanism justified the divergence and the critic passed it. Continue anchoring maritime-flow markets on the mechanism, but state the recovery base rate explicitly.

Brier (mine): 0.0010 | Brier (market): 0.0045 | beat market

Never emit 0.0 on a multi-week human-decision window. A first-time candidate dropping out over ~6 months has a base rate of several percent regardless of current reporting; floor tails at the base rate and never price below the market on a tail without documented cause.

2026-07-18 | resolution | KXPLATNERDROPOUT-26 | politics [\[zero-probability-tail\]](#)
Brier (mine): 0.9409 | Brier (market): 0.9158 | lost to market

On tight CPI/threshold buckets near the distribution mode, do not diverge from market price unless ≥ 3 independent sources justify it; otherwise anchor closer to the market.

Brier (mine): 0.1296 | Brier (market): 0.0930 | lost to market

Even on easy directional threshold calls, state the base rate and a rough confidence interval in the rationale so the record is auditable.

2026-07-17 | resolution | KXCPI-26JUN-T0.1 | economy [\[process-ci-sources\]](#)
Brier (mine): 0.0100 | Brier (market): 0.0182 | beat market

Even on high-confidence near-certain markets, write the base rate, an explicit confidence interval, and 3 named independent sources into the rationale so the reasoning is auditable — accuracy was fine, documentation was thin.
