Active Markets

Will the unemployment rate (U-3) be above 4.2% in May? (KXU3-26MAY-T4.2)

Category: economy | Closes: 2026-06-05 14:00 UTC

My prob: **88.0%** Confidence: **high** Market: **72.5%** Edge: **15.5%**

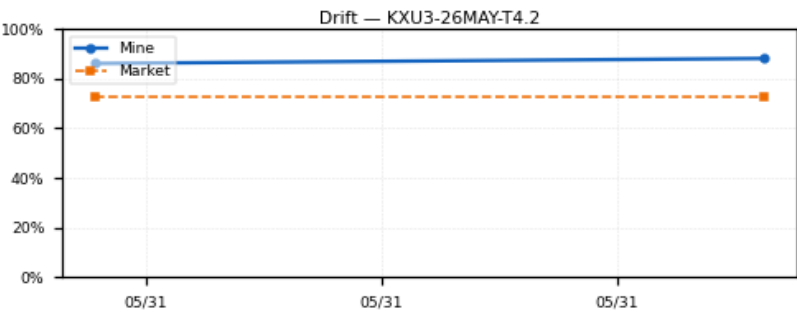

Lean: **YES** Conviction: **high**

Trade (spot): BUY YES @ \$0.73 now (taker, fee \$0.02/contract) -> net EV **+\$0.13/contract**

Trade (limit): rest BUY YES @ \$0.72 GTC until 2026-06-05 -> net EV **+\$0.14/contract** if filled

Rationale: U-3 has printed >=4.3% all of 2026 and Bloomberg's May-30 consensus is 4.3% with low jobless claims and only ~89K payroll consensus; >4.2% is well-supported vs the market's ~72%.

Key drivers: 2026 prints all >=4.3%; Bloomberg consensus 4.3%; low claims + soft payrolls

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **32.0%** Confidence: **medium** Market: **40.5%** Edge: **-8.5%**

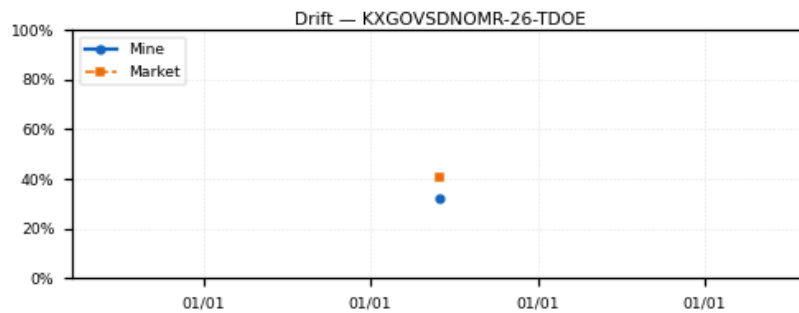

Lean: **NO** Conviction: **medium**

Trade (spot): BUY NO @ \$0.60 now (taker, fee \$0.02/contract) -> net EV **+\$0.06/contract**

Trade (limit): rest BUY NO @ \$0.59 GTC until 2026-06-30 -> net EV **+\$0.07/contract** if filled

Rationale: Doeden leads one poll (26%) but trails 17-34 in another; with no Trump endorsement, a likely runoff favors the establishment (Johnson's 113-lawmaker bloc) consolidating against the outsider. Market's ~40% looks rich.

Key drivers: poll divergence (26% vs 17%); no Trump endorsement; runoff consolidation favors establishment

Will a reconciliation bill passed the Senate before Jun 6, 2026?

(KXSENATEREC-26MAY-JUN06)

Category: politics | Closes: 2026-06-14 14:00 UTC

My prob: **15.0%** Confidence: **medium** Market: **23.0%** Edge: **-8.0%**

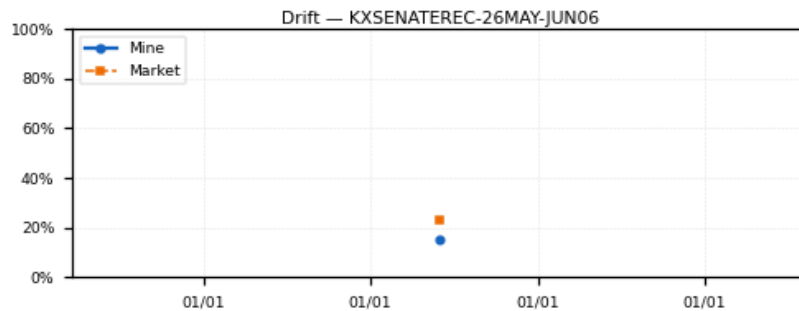

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.78 now (taker, fee \$0.02/contract) -> net EV **+\$0.05/contract**

Trade (limit): rest BUY NO @ \$0.76 GTC until 2026-06-14 -> net EV **+\$0.07/contract** if filled

Rationale: The Senate reconciliation (ICE/CBP) bill missed its pre-recess deadline amid intra-GOP disputes; the Senate returns June 1 with no reconciliation vote scheduled and unfinished text, making passage in ~5 days unlikely.

Key drivers: missed pre-recess deadline; no vote scheduled June 1; text/parliamentarian unresolved

Who will win the first round of the Los Angeles mayoral election? (KXLAMAYOR1R-26-SPRA)

Category: politics | Closes: 2026-06-02 14:00 UTC

My prob: **21.0%** Confidence: **medium** Market: **25.5%** Edge: **-4.5%**

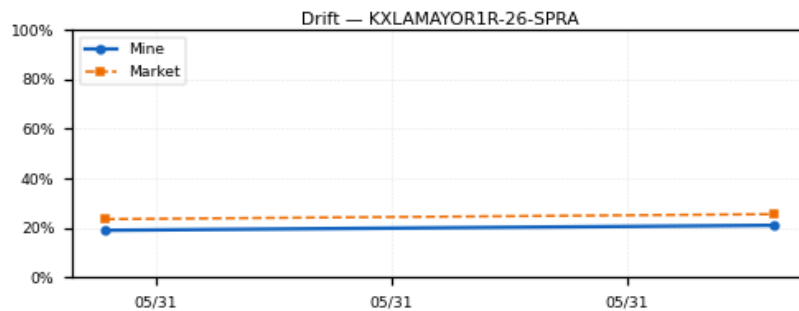

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.75 now (taker, fee \$0.02/contract) -> net EV **+\$0.02/contract**

Trade (limit): rest BUY NO @ \$0.74 GTC until 2026-06-02 -> net EV **+\$0.03/contract** if filled

Rationale: CORRECTED (was 0.25 chasing one outlier poll): the McLaughlin poll showing Pratt 1st is a single partisan survey; the polling AVERAGE still has Bass ahead with Pratt 2nd/3rd. Small update from 0.19 to ~0.21 for a genuinely close race, no more.

Key drivers: most polls still Bass-ahead (aggregate); lone outlier poll discounted; close 3-way race

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

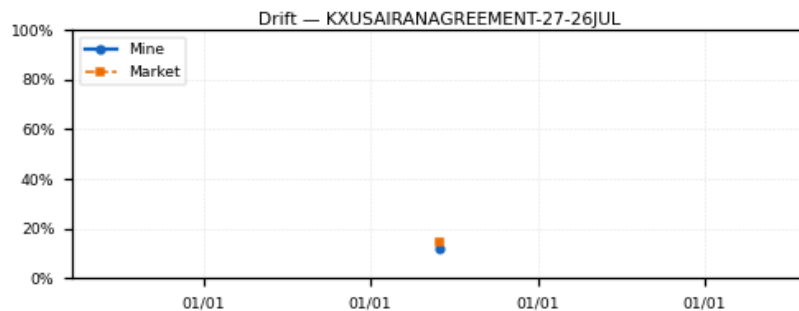

My prob: **12.0%** Confidence: **medium** Market: **14.5%** Edge: **-2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 12%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast). (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: A tentative US-Iran MOU to launch 60-day nuclear talks is unsigned; a full nuclear deal (the resolution bar) is downstream with unresolved enrichment/sanctions issues — unlikely within 30 days.

Key drivers: MOU unsigned; deal downstream of 60-day talks; JCPOA took 3 months

Will the Federal Reserve Hike rates by 0bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H0)

Category: economy | Closes: 2026-06-17 17:59 UTC

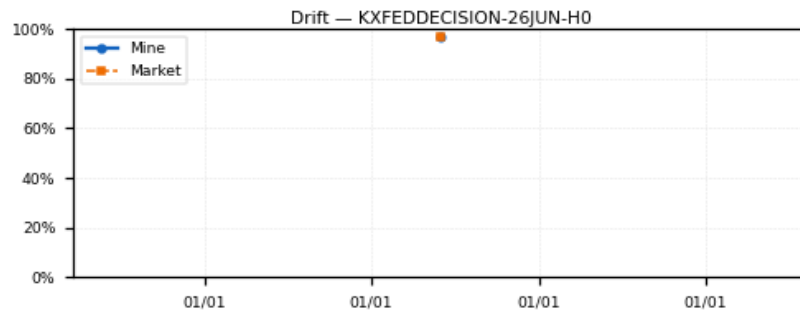

My prob: **97.0%** Confidence: **high** Market: **96.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 97%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: A hike at a single meeting in an established hold cycle is essentially unprecedented absent a crisis; CPI ~3.8% is not an emergency trigger and futures imply ~99% no-hike.

Key drivers: no tightening posture; CPI not emergency; FedWatch ~99% hold

Will the Federal Reserve Cut rates by >25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C26)

Category: economy | Closes: 2026-06-17 18:05 UTC

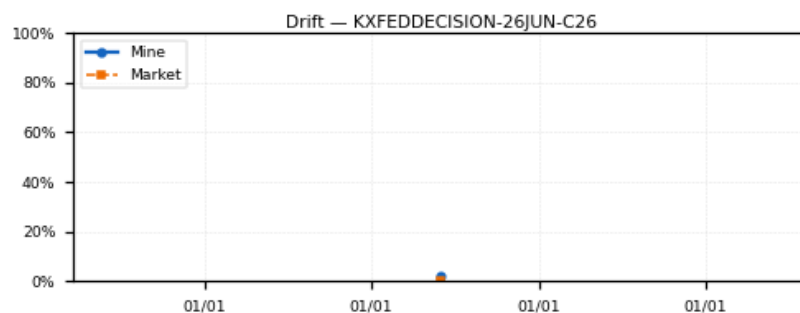

My prob: **2.0%** Confidence: **high** Market: **0.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: A 50bp+ cut has no precedent with inflation near 4%; only a financial crisis in the 17-day window could trigger it. FedWatch ~0%.

Key drivers: no precedent for 50bp+ at ~4% inflation; FedWatch ~0%; no crisis signal

Will Vinnie Brand be the Republican nominee for Senate in New Jersey?

(KXSENATENJR-26-VBRA)

Category: politics | Closes: 2026-06-09 14:00 UTC

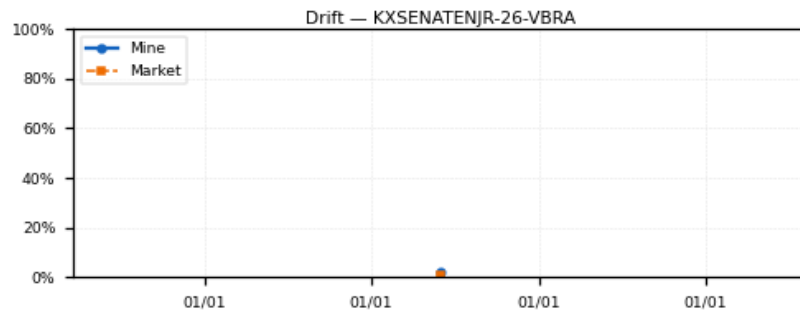

My prob: **2.0%** Confidence: **high** Market: **0.6%** Edge: **1.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Vinnie Brand declined to run in March 2026 and is not on the ballot; only a write-in could deliver YES. Negligible.

Key drivers: Brand declined; not on ballot; no write-in campaign; 5 other candidates running

Will the Federal Reserve Cut rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C25)

Category: economy | Closes: 2026-06-17 17:59 UTC

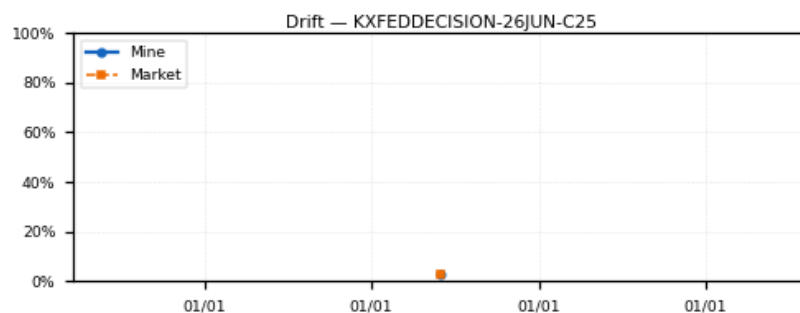

My prob: **3.0%** Confidence: **high** Market: **2.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 3%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: With CPI ~3.8% and an 8-4 April hold under new chair Warsh, a June cut is highly unlikely; FedWatch ~2-3%.

Key drivers: CPI 3.8%; April 8-4 hold; FedWatch ~2-3%

Will the Federal Reserve Hike rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H25)

Category: economy | Closes: 2026-06-17 18:05 UTC

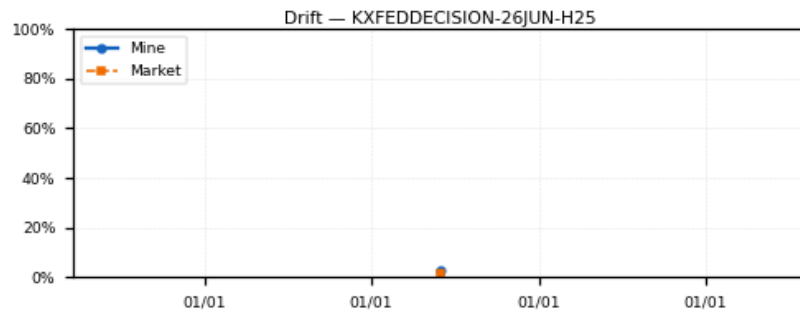

My prob: **3.0%** Confidence: **high** Market: **1.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 3%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: A 25bp hike requires a tightening pivot with no telegraphing; April was an 8-4 hold with no member favoring a hike and FedWatch prices ~0.6%.

Key drivers: no member favors a hike; FedWatch ~0.6%; new-chair first meeting

Who will advance from California's top-two primary for governor?

(KXGOVCAPRIMARYPARTY-26-2R)

Category: politics | Closes: 2026-06-30 14:00 UTC

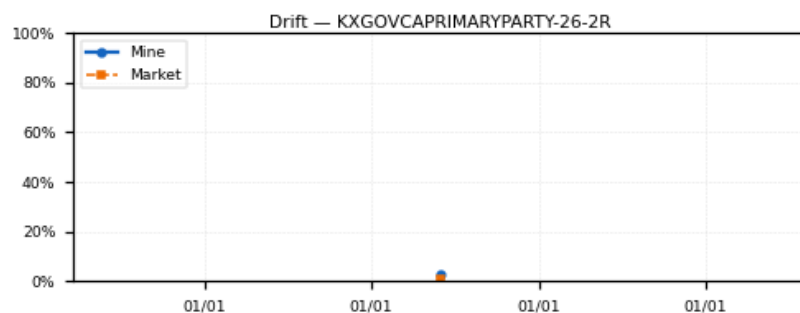

My prob: **3.0%** Confidence: **high** Market: **0.6%** Edge: **2.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 3%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Combined GOP polling (~33%) is far below the combined Democratic field (~55%); CA has never sent two Republicans out of a top-two gov primary. Near-zero.

Key drivers: GOP ~33% vs Dem ~55%; no precedent for 2 R in CA top-two; Becerra near-certain to advance

Who will win California's top-two primary for governor? (KXGOVCAPRIMARY-26-CBIA)

Category: politics | Closes: 2026-06-02 14:00 UTC

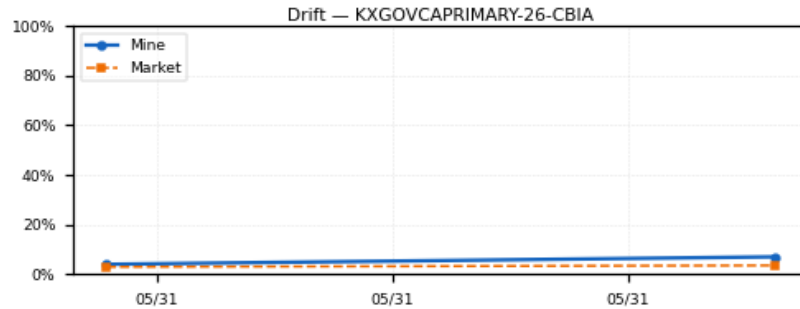

My prob: **7.0%** Confidence: **high** Market: **3.6%** Edge: **3.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 7%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Final polls (Emerson May 27-28) confirm Bianco ~12% in 4th, ~9 pts behind Hilton for the lone GOP slot; Republican vote is consolidating to Hilton (59% vs 29%). No path to top-two in 2 days.

Key drivers: Bianco ~12% 4th in final polls; 9pt behind Hilton; GOP consolidating to Hilton

Will Lindsey Graham be the Republican nominee for the Senate in South Carolina? (KXSENATESCR-26-LGRA)

(KXSENATESCR-26-LGRA)

Category: politics | Closes: 2026-06-09 14:00 UTC

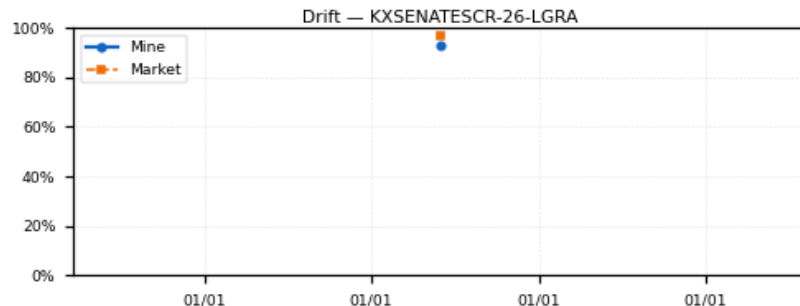

My prob: **93.0%** Confidence: **high** Market: **97.0%** Edge: **-4.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 93%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Incumbent Graham polls 56% (above SC's 50% runoff threshold) with a double Trump endorsement and a fragmented field; small residual risk is a sub-50% finish forcing a runoff he would still be favored in.

Key drivers: Graham 56% > 50% threshold; double Trump endorsement; top challenger dropped out

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

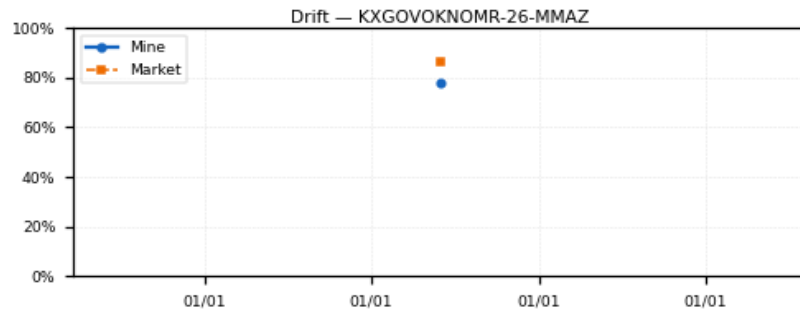

My prob: **78.0%** Confidence: **low** Market: **86.5%** Edge: **-8.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 78%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Trump endorsed Mazzei (May 29) in a Trump-loyal state, but a 9-way field makes an outright June 16 win unlikely and likely forces an Aug 25 runoff — which sits awkwardly against this market's June-30 settlement. Treating it as eventual-nomination, ~78%; flagged low conviction for the resolution-timing ambiguity.

Key drivers: Trump endorsement (strong in OK); 9-way field -> likely Aug runoff; June-30 settlement vs Aug runoff ambiguity

Will Randy Feenstra be the Republican nominee for Governor in Iowa?

(KXGOVIANOMR-26-RFEE)

Category: politics | Closes: 2026-06-02 14:00 UTC

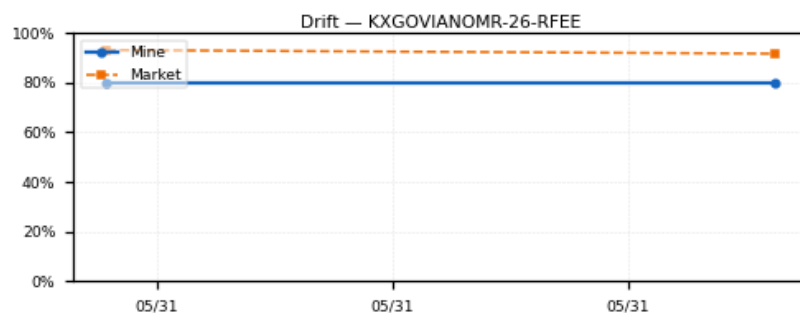

My prob: **80.0%** Confidence: **medium** Market: **91.5%** Edge: **-11.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 80%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: CORRECTED (was an over-reaction to 0.58): a single primary poll and unsanctioned county straw polls are too noisy to move much. Weighting the RELIABLE signals - Trump endorsement (May 29) and the real 35%-threshold->likely-convention mechanic - Feenstra remains a strong favorite (establishment + presidential backing carry a convention too); I hold ~0.80, only a modest discount below the market for genuine convention uncertainty.

Key drivers: Trump endorsement (high-reliability); likely convention but establishment+Trump favored there; discounted noisy straw/single polls

Will Chong Won-o win the 2026 Seoul mayoral election? (KXSEOULMAYOR-26JUN03-CWON)

Category: politics | Closes: 2026-06-03 14:00 UTC

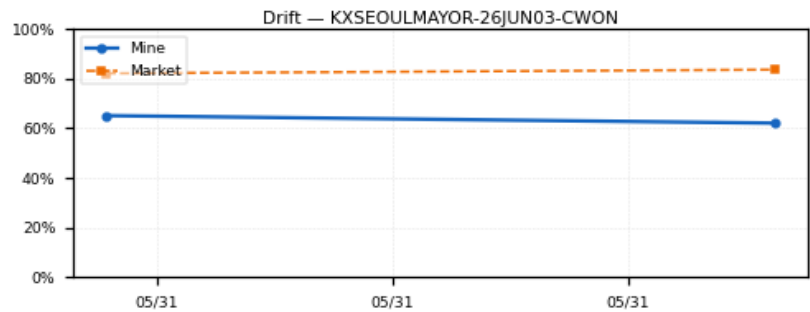

My prob: **62.0%** Confidence: **low** Market: **83.5%** Edge: **-21.5%**

Lean: **NONE** Conviction: **low**

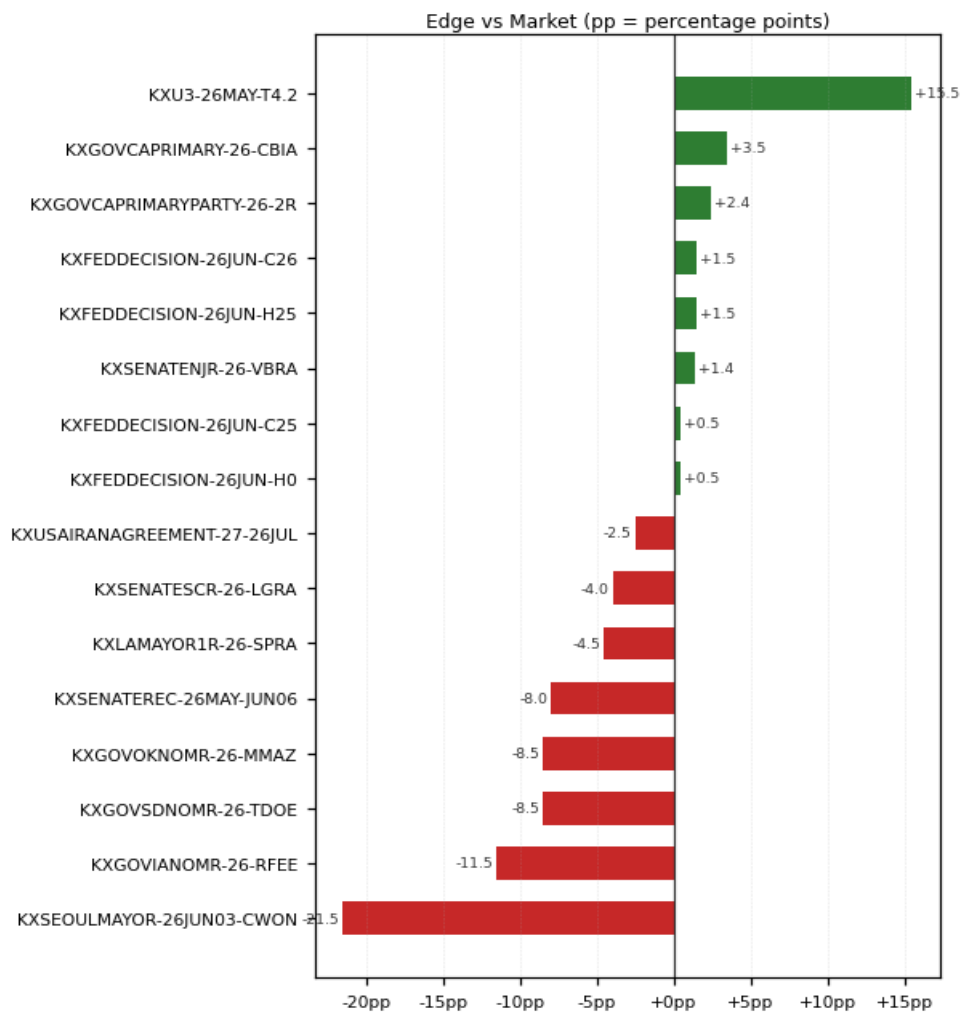

No actionable lean: I lean YES (my prob 62%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Chong (DPK) leads a final-week polling median of ~+5 on a strong national DPK tailwind, but the race tightened sharply with several pollsters showing a tie; I lean him a modest favorite, below the market's ~83%, low confidence given extreme poll dispersion.

Key drivers: DPK national tailwind; median ~+5 but several polls tied; tightening trend + high dispersion

Edge Overview

Profitable Leans (after fees)

Ticker	Side	Spot EV/contract	Limit EV/contract	Conviction
KXU3-26MAY-T4.2	YES	+\$0.13	+\$0.14	high
KXGOVSDNOMR-26-TDOENO		+\$0.06	+\$0.07	medium
KXSENATEREC-26MAY-JUN06		+\$0.05	+\$0.07	low
KXLAMAYOR1R-26-SPRA	NO	+\$0.02	+\$0.03	low

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 * p * (1 - p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.
