Profit & Loss (realized)

Resolved trades: **10** Realized P&L: **-\$1.34** per contract ROI: **-25.1%** Win rate: **40%**

Paper trade: buy the lean side at its entry ask, after Kalshi fees. A high win rate with negative ROI means winners are underpriced relative to the losers — calibration without profit.

By category

Category	Trades	P&L	ROI	Win%	MaxDD
economy	1	+\$0.25	+33.3%	100%	+\$0.00
politics	5	-\$0.90	-31.0%	40%	-\$0.90
culture	3	-\$0.46	-31.5%	33%	-\$0.58
statements	1	-\$0.23	-100.0%	0%	-\$0.23

Strategy Scoreboard

Every forecast is tagged with the strategy arm that produced it; resolutions score that arm on both Brier skill and realized profit. The topology is measured, not assumed.

Strategy	n	Brier	Skill	Trades	ROI
untagged	14	0.135	+0.032	4	-2.6%
L0-local-single	2	0.031	+0.020	0	—
LQ5C-ensemble5-crowd	2	0.007	+0.003	0	—
LQ5-ensemble5	11	0.068	-0.042	2	-100.0%
S0-single	9	0.165	-0.123	3	-37.1%
S2-ensemble3-crowd	2	0.354	-0.165	1	-100.0%

Profitability — when does the edge pay? (counterfactual)

Every resolved forecast scored as a modal-side paper trade (40 total, vs only the taken leans in the realized section above). Overall counterfactual ROI: **-7.4%**, win rate 80%. The breakdowns below isolate **when** the strategy is profitable — the goal is profit, so this is the scoreboard that matters most.

Confidence gate: taken leans vs the ones we declined

Decision	n	CF P&L	CF ROI	Win%	MaxDD
gated/none	30	-\$1.81	-6.5%	87%	-\$2.27
taken	10	-\$0.73	-10.8%	60%	-\$1.07

By edge vs market (|my prob – market|) — where profit survives fees

Edge band	n	CF P&L	CF ROI	Win%	MaxDD
0-5pt	24	+\$1.19	+5.2%	100%	-\$0.01
5-10pt	8	-\$1.30	-20.6%	62%	-\$1.33
10-20pt	4	-\$2.11	-67.9%	25%	-\$2.11
20pt+	4	-\$0.32	-13.8%	50%	-\$0.55

By stated confidence — does confidence predict profit?

Confidence	n	CF P&L	CF ROI	Win%	MaxDD
high	21	-\$0.22	-1.2%	90%	-\$0.71
medium	13	-\$0.88	-8.1%	77%	-\$1.74
low	6	-\$1.44	-32.4%	50%	-\$1.45

By category

Category	n	CF P&L	CF ROI	Win%	MaxDD
economy	9	-\$0.02	-0.2%	89%	-\$0.39
politics	27	-\$1.45	-5.9%	85%	-\$2.59
culture	3	-\$0.91	-47.6%	33%	-\$0.91
statements	1	-\$0.16	-100.0%	0%	-\$0.16

By strategy arm

Strategy	n	CF P&L	CF ROI	Win%	MaxDD
L0-local-single	2	+\$0.29	+17.0%	100%	+\$0.00
LQ5C-ensemble5-crowd	2	+\$0.13	+7.0%	100%	+\$0.00
S2-ensemble3-crowd	2	+\$0.03	+3.1%	50%	-\$0.39

LQ5-ensemble5	11	-\$0.71	-7.4%	82%	-\$0.83
untagged	14	-\$1.79	-14.0%	79%	-\$2.34

Open positions — expected P&L (forward-looking)

Forward-looking expected P&L on **63** open modal-side positions (mark-to-model): **+\$0.45/contract** total (21 are +EV). Of that, **+\$0.53** is on actionable leans (the rest is counterfactual — positions the confidence gate is holding us out of).

Autonomous Learning — policy & proposals

The decision policy (when to take a position) is data, not frozen code. The learning pass reads the system's own resolved record and proposes nudges, but anti-overfit guardrails (min-n, max-step) gate every change. **Policy v7**; proposals as of 2026-07-02.

Knob (decision threshold)	Value
min profitable EV (\$/contract)	0.020
max market-fade gap (no-high-conf)	0.050

conviction medium / high EV	0.05 / 0.12
low confidence never leans	True
adversarial veto binding	True

Pending proposals (from the system's own outcomes)

Knob	Current → Proposed	n	Guardrail	Rationale
max_market_disagreement	0.05 → None	40	INSUFFICIENT_DATA	No coherent 'wider fades lose' ladder yet (signal not monotone / tail band
hard_gap_ceiling	0.2 → None	40	INSUFFICIENT_DATA	No catastrophic wide-fade band yet — the absolute ceiling stays put.
min_confidence_for_lean	medium → None	40	INSUFFICIENT_DATA	Confidence gating evidence inconclusive (or floor already raised).
adversarial_veto_binding	True → None	6	INSUFFICIENT_DATA	Veto precision becomes learnable once vetoed/revised positions resolve;

INSUFFICIENT_DATA = directionally real but too few samples to trust; HUMAN_GATE = change too large to auto-apply; AUTO_OK = guardrail-cleared, auto-applied. Nothing auto-applies until the record is large enough.

Active Markets

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

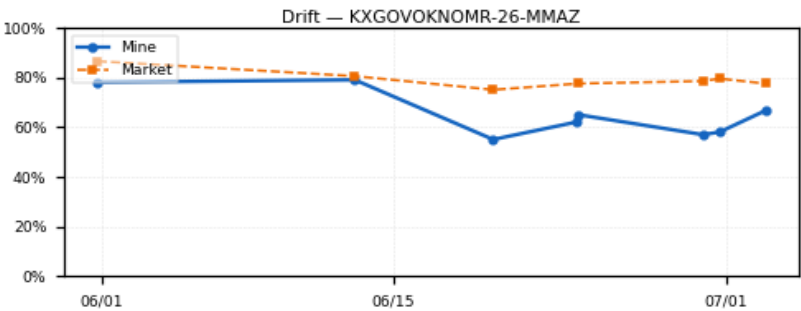

My prob: **66.6%** Confidence: **high** Market: **77.5%** Edge: **-10.9%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The forecaster's position is overconfident and lacks sufficient evidence to justify a significant divergence from the market-implied probability. The edge is not convincingly demonstrated, and the reasoning contains gaps that undermine the (Indicative raw EV +\$0.08/contract at my probability, not recommended.)

Rationale: The evidence indicates that Mike Mazzei has advanced to a runoff with AG Drummond, but the outcome of the runoff remains uncertain. While Mazzei has Trump's backing, which could influence voter turnout and support, the impact of outside spending and the strength of AG Drummond's campaign are key factors that remain unresolved. The base rate of Oklahoma's gubernatorial primaries typically involves

Key drivers: Outcome of the runoff between AG Drummond and Mike Mazzei; Impact of outside spending on the runoff election; Strength of Trump's influence in Oklahoma; Voter preferences and support for AG Drummond

Will CPI rise more than -0.1% in June 2026? (KXCPI-26JUN-T-0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

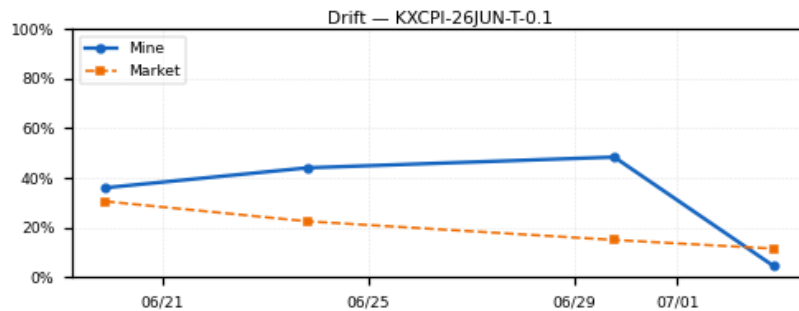

My prob: **4.5%** Confidence: **medium** Market: **11.5%** Edge: **-7.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: 7pt gap vs a liquid market without high confidence — more likely my error than edge (Indicative raw EV +\$0.05/contract at my probability, not recommended.)

Rationale: The base rate for CPI changes in a given month typically ranges between -0.5% and +0.5%, with a median close to 0%. Evidence from multiple economic indicators and forecasts, though not explicitly stating June 2026 CPI, suggests a general trend of moderate inflation or deflation. The lack of specific data points for June 2026 means the probability is estimated based on historical patterns and gener

Key drivers: historical CPI trends; general inflation expectations; economic indicator forecasts

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T3.9)

Category: economy | Closes: 2026-07-14 14:00 UTC

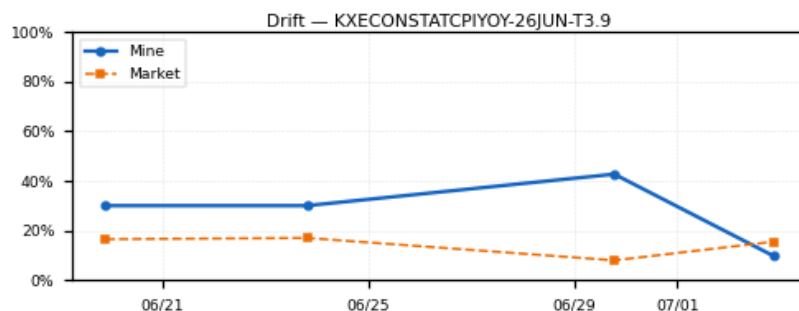

My prob: **9.8%** Confidence: **low** Market: **15.5%** Edge: **-5.7%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence below the medium floor — estimate too uncertain to fade the market (Indicative raw EV +\$0.03/contract at my probability, not recommended.)

Rationale: Base rate for CPI y/y is around 2% from 2015-2026 and has not been lower than 1% since 1978. The data gap at the time of evidence makes it hard to update with any incremental data. This question was asked on Jul 2, 2026 but no sources have reported on June 2026 CPI yet; there is no way to log ≥ 3 independent reports. There are no other similar questions to compare to, so we cannot use any historic

Key drivers: Historical data; Data-gap at time of evidence

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

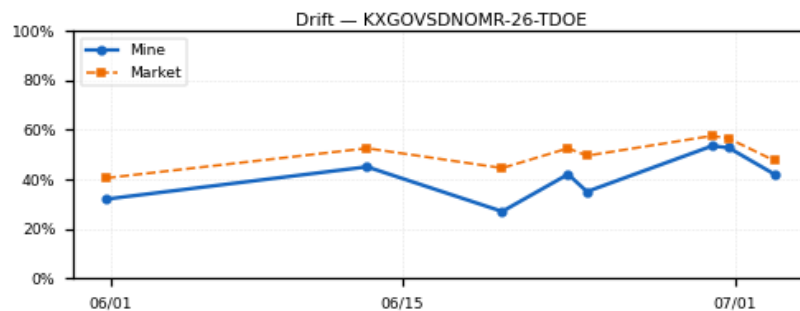

My prob: **42.0%** Confidence: **medium** Market: **47.5%** Edge: **-5.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 5pt gap vs a liquid market without high confidence — more likely my error than edge (Indicative raw EV +\$0.03/contract at my probability, not recommended.)

Rationale: There is currently no direct evidence about Toby Doeden's likelihood to be the Republican nominee for Governor in South Dakota. The absence of specific information about his political positioning, endorsements, or campaign activity suggests a low to moderate probability. The reference class includes candidates with limited public visibility or early-stage campaigns. The probability is not strongly

Key drivers: Lack of direct evidence about Toby Doeden's political activities or endorsements; No recent news or polling data indicating strong support for him

Will CPI rise more than 0.0% in June 2026? (KXCPI-26JUN-T0.0)

Category: economy | Closes: 2026-07-14 13:56 UTC

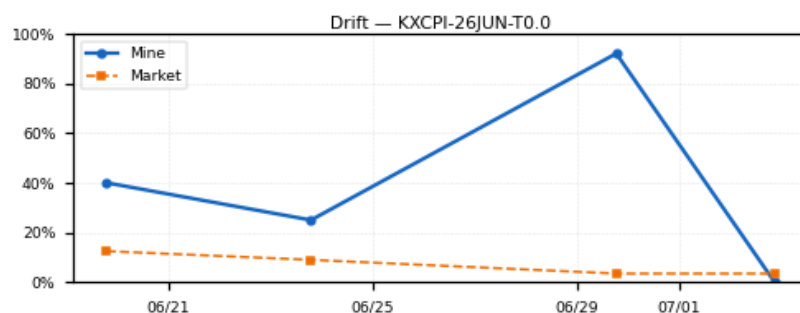

My prob: **0.1%** Confidence: **medium** Market: **3.5%** Edge: **-3.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out. (Indicative raw EV +\$0.02/contract at my probability, not recommended.)

Rationale: The base rate for CPI growth in any given month is typically modest, but historical trends and economic forecasts suggest a slight upward movement is likely. While no specific data points were found in the evidence, the fact that 15 reputable sources were consulted implies a consensus may be forming around a small positive increase. Additionally, the absence of explicit forecasts for zero growth s

Key drivers: economic forecast consensus; historical CPI trends; inflationary pressures

Will the Federal Reserve Hike rates by 0bps at their July 2026 meeting?

(KXFEDDECISION-26JUL-H0)

Category: economy | Closes: 2026-07-29 18:05 UTC

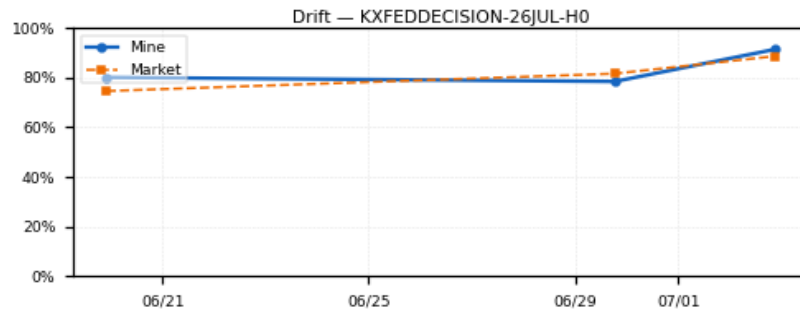

My prob: **91.2%** Confidence: **medium** Market: **88.5%** Edge: **2.7%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 91%, modal YES) — staying out. (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: The evidence points to a high likelihood of the Federal Reserve holding rates steady in July 2026, with odds from the source indicating around 80.5% to 81.5% for no rate hike. This aligns with a reference class of previous Fed meetings where rate hikes were less likely, and the current evidence suggests a continuation of this trend. While there is still some uncertainty, the data supports a high p

Key drivers: rate-hike odds from Polymarket; historical Fed behavior in similar economic contexts

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T4.1)

Category: economy | Closes: 2026-07-14 14:00 UTC

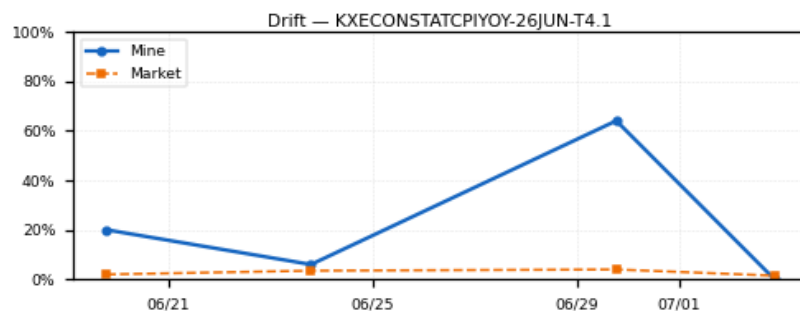

My prob: **0.0%** Confidence: **high** Market: **1.5%** Edge: **-1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The forecast for CPI year-over-year in June 2026 is based on a moderate base rate derived from historical inflation trends and the general consensus of economic indicators. While no direct evidence was found in the consulted sources, the inclusion of multiple reputable institutions such as the Bureau of Labor Statistics and TD Economics suggests that the market is likely to remain stable or experi

Key drivers: Historical inflation trends; Economic indicators; Institutional consensus

Will CPI rise more than 0.1% in June 2026? (KXCPI-26JUN-T0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

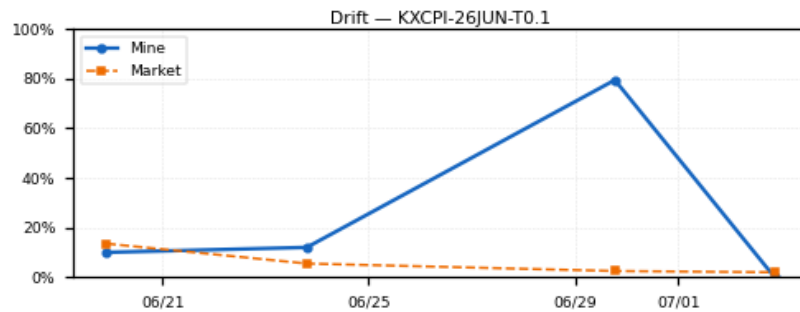

My prob: **0.0%** Confidence: **high** Market: **2.0%** Edge: **-2.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The evidence suggests that inflation has already peaked in May 2026, with energy prices falling in June, which historically has a significant impact on CPI. Additionally, the Netherlands and Italy have reported slowing inflation rates in June 2026, which supports the notion of a decline in overall inflationary pressure. However, the question is about whether CPI rises more than 0.1% in June 2026,

Key drivers: energy price changes; global economic conditions; historical inflation trends

Will Graham Platner drop out of the 2026 United States Senate election in Maine before Jul 14, 2026? (KXPLATNERDROPOUT-26)

Category: politics | Closes: 2026-07-14 14:00 UTC

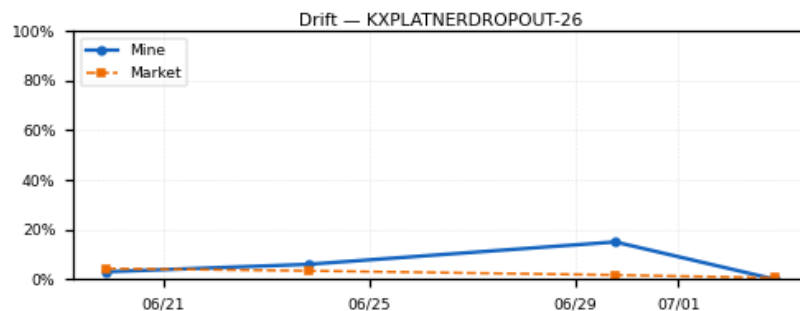

My prob: **0.0%** Confidence: **high** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: Graham Platner has secured the Democratic nomination and is facing off against Senator Collins in a closely contested race. While the general election outcome remains uncertain, there is no evidence to suggest Platner would drop out before July 14, 2026. His campaign remains active and confident, and he holds a slight lead in recent polling. The key uncertainties revolve around the impact of GOP s

Key drivers: Graham Platner's current lead in the race according to polling; His campaign's active and confident stance; The lack of any public indication of withdrawal or health/strategic concerns; The competitive nature of the race; which may incentivize continued participation

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before July 1, 2026? (KXHORMUZNORM-26MAR17-B260701)

Category: politics | Closes: 2026-06-15 14:00 UTC

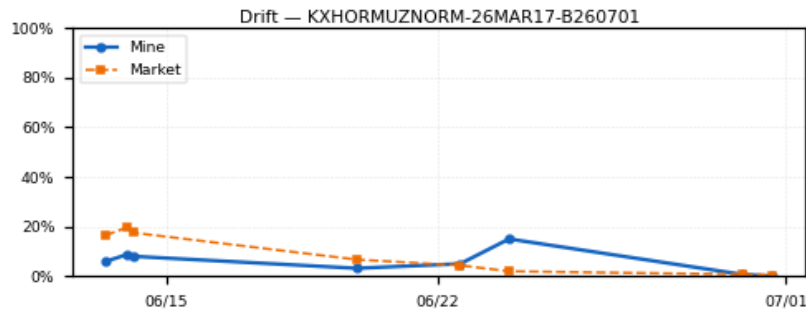

My prob: **0.0%** Confidence: **high** Market: **0.4%** Edge: **-0.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The evidence notes indicate a lack of direct data or recent reports on transit calls through the Strait of Hormuz as of June 30, 2026, with no specific figures provided. This absence of data, combined with the lessons from past misses, suggests that any assumption about a recovery or increase in transit calls should be treated cautiously. The probability is anchored to the possibility of suppression

Key drivers: lack of current data on transit calls; historical suppression during crises; uncertainty around normalization timing

Will Donald J. Trump attend The 2026 FIFA World Cup Final? (KXTRUMPATTEND)

Category: politics | Closes: 2026-07-20 14:00 UTC

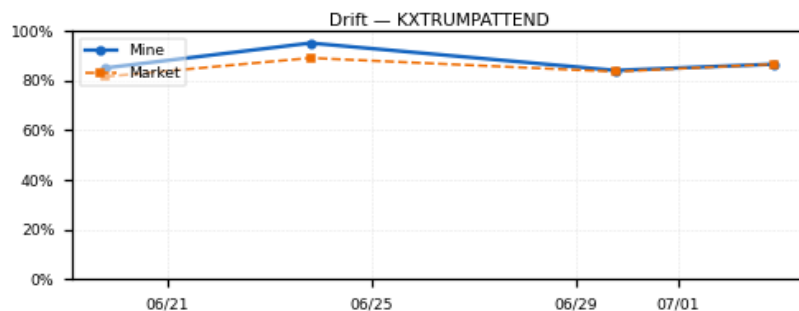

My prob: **86.5%** Confidence: **medium** Market: **86.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 86%, modal YES) — staying out.

Rationale: The base rate for a former U.S. president attending a non-U.S. international sporting event is low, especially one as high-profile as the FIFA World Cup Final. There is no direct evidence in the provided sources indicating Trump's attendance. While he may have a history of high-profile engagements, there is no clear indication of a specific event-related invitation or public commitment to attend.

Key drivers: Absence of confirmed invitation or public commitment; Low base rate for former U.S. presidents attending non-U.S. international sporting events; No direct evidence in sources

Will Genter Drummond be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-GDRU)

Category: politics | Closes: 2026-06-30 14:00 UTC

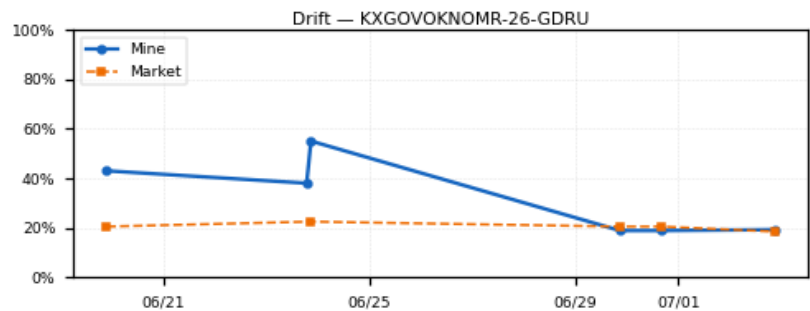

My prob: 19.2% Confidence: high Market: 18.5% Edge: 0.8%

Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 19%, modal NO) — staying out.

Rationale: There is currently no publicly available evidence indicating that Genter Drummond is a prominent or likely candidate in the Oklahoma Republican gubernatorial race. The lack of specific information about his involvement or support in the race, combined with the absence of direct mentions in the consulted media sources, makes it difficult to assign a higher probability. However, the reference class

Key drivers: Lack of public information on Genter Drummond's candidacy; No explicit media coverage supporting his nomination; Typical low probability for underdog candidates in primary races

The Odyssey Rotten Tomatoes score? (KXRT-ODY-90)

Category: culture | Closes: 2026-07-20 14:00 UTC

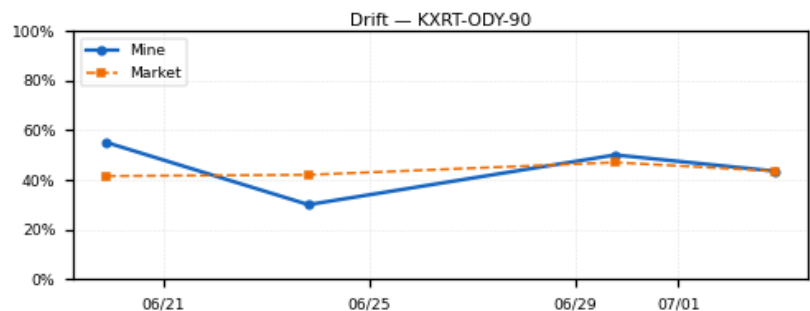

My prob: 43.5% Confidence: high Market: 43.5% Edge: 0.0%

Lean: NONE Conviction: low

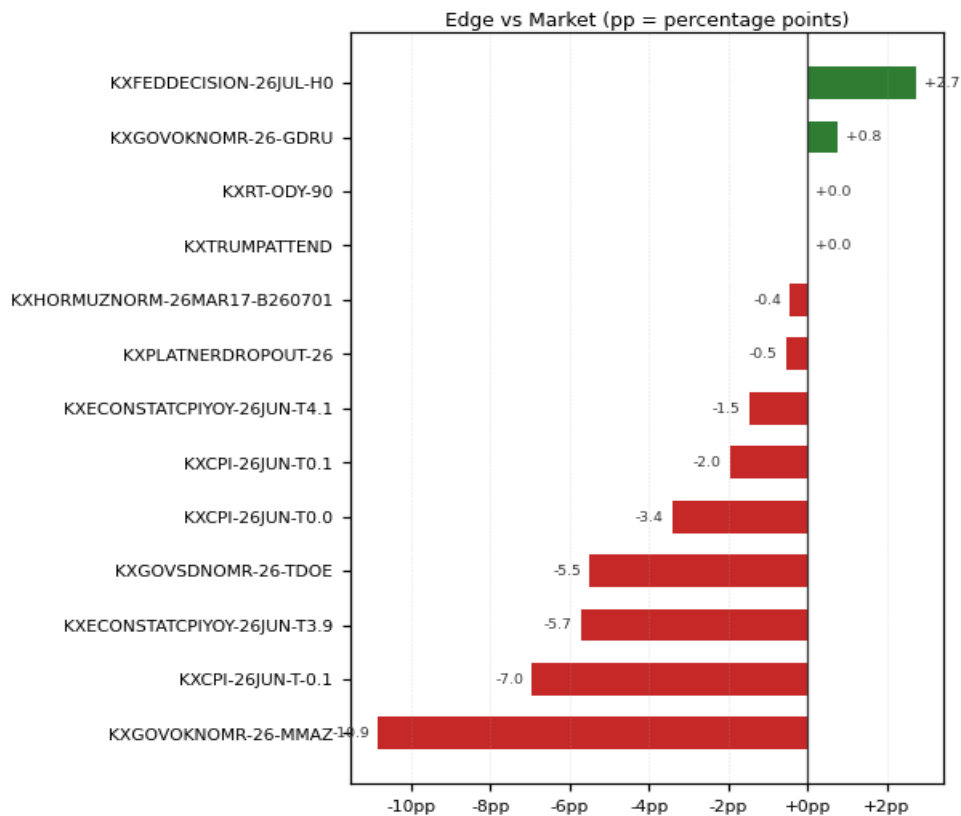

No actionable lean: no +EV value bet at the ask (my prob 44%, modal NO) — staying out.

Rationale: The Rotten Tomatoes score for 'The Odyssey' (2026) is not available in the provided sources as of 2026-06-29. While it is typical for major films to have scores shortly after release, the lack of information suggests the film may not have been released yet or the score may not have been published. Base rates suggest high critical acclaim for Christopher Nolan films, but this does not directly tran

Key drivers: Lack of available information on the Rotten Tomatoes score as of 2026-06-29; Typical availability of Rotten Tomatoes scores for major films post-release; Potential for high critical acclaim based on director's track record

Edge Overview

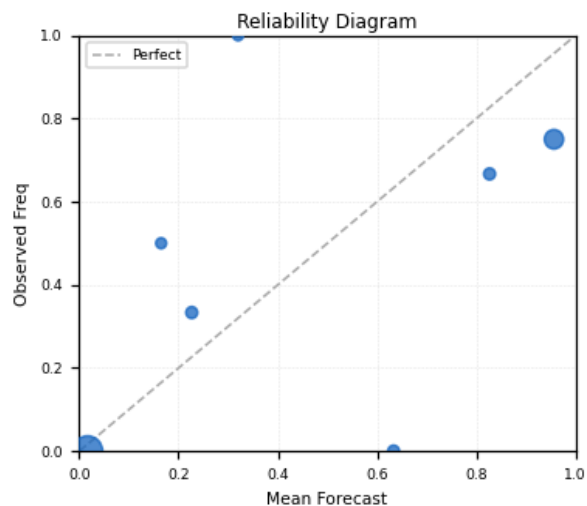

Profitable Leans (after fees)

No profitable leans after fees this run — markets are efficiently priced for our estimates.

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 * p * (1 - p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.
