Generated: 2026-06-13T21:46:39Z

Metric	Value
Active markets	7
Resolved markets	12
Total forecast entries	43
Profitable leans (after fees)	1
Resolved with calibration	12
Brier (mine, mean)	0.1543
Brier (market, mean)	0.1957
Skill vs market	0.0414

Performance Over Time

Resolved: **12** Brier (mine): **0.154** vs market **0.196** Skill: **+0.041** (beating the market)

Provisional — only 12 resolved market(s). A skill gap is not statistically distinguishable from luck below ~30 resolutions; read the trend, not the point estimate.

Where the edge is — by segment

Strongest: **politics / us-governor-primary** (skill +0.065, n=3). Weakest: **politics / us-senate** (skill -0.033, n=4).

By category

Category	n	Brier (mine)	Brier (mkt)	Skill
economy	1	0.014	0.076	+0.061
politics	11	0.167	0.207	+0.040

By sub-category

Category / sub-category	n	Brier (mine)	Brier (mkt)	Skill
politics / foreign-election	1	0.384	0.697	+0.313
politics / us-governor-primary	3	0.215	0.280	+0.065
economy / jobs-unemployment	1	0.014	0.076	+0.061

politics / mayoral	2	0.038	0.068	+0.029
politics / us-governor	1	0.000	0.000	+0.000
politics / us-senate	4	0.183	0.150	-0.033

Active Markets

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: 32.0% Confidence: medium Market: 40.5% Edge: -8.5%

Lean: NO Conviction: medium

Trade (spot): BUY NO @ \$0.60 now (taker, fee \$0.02/contract) -> net EV +\$0.06/contract

Trade (limit): rest BUY NO @ \$0.59 GTC until 2026-06-30 -> net EV +\$0.07/contract if filled

Rationale: Doeden leads one poll (26%) but trails 17-34 in another; with no Trump endorsement, a likely runoff favors the establishment (Johnson's 113-lawmaker bloc) consolidating against the outsider. Market's ~40% looks rich.

Key drivers: poll divergence (26% vs 17%); no Trump endorsement; runoff consolidation favors establishment

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: 12.0% Confidence: medium Market: 14.5% Edge: -2.5%

Lean: NONE Conviction: low

No actionable lean: I lean NO (my prob 12%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast). (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: A tentative US-Iran MOU to launch 60-day nuclear talks is unsigned; a full nuclear deal (the resolution bar) is downstream with unresolved enrichment/sanctions issues — unlikely within 30 days.

Key drivers: MOU unsigned; deal downstream of 60-day talks; JCPOA took 3 months

Will the Federal Reserve Cut rates by >25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C26)

Category: economy | Closes: 2026-06-17 18:05 UTC

My prob: **0.3%** Confidence: **high** Market: **0.5%** Edge: **-0.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 0%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: A >25bp cut would require emergency easing — incoherent with CPI at 4.2% YoY. Negligible tail; market agrees.

Key drivers: cpi_4.2pct; no_emergency_easing

Will the Federal Reserve Cut rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C25)

Category: economy | Closes: 2026-06-17 17:59 UTC

My prob: **1.0%** Confidence: **high** Market: **0.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 1%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Futures imply ~97% HOLD; May CPI at 4.2% YoY forecloses a June cut. A 25bp cut is a tail. Market agrees (~0.5%).

Key drivers: cpi_4.2pct; fed_funds_futures; no_cut_signal

Will the Federal Reserve Hike rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H25)

Category: economy | Closes: 2026-06-17 18:05 UTC

My prob: **2.5%** Confidence: **medium** Market: **0.5%** Edge: **2.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: CPI's surge to 4.2% YoY plus a hawkish new Chair create a small hike tail the market (0.5%) underweights, but a first-meeting unprimed hike is near-unprecedented; modal is still no-hike, so no actionable lean.

Key drivers: cpi_4.2pct; chair_warsh_hawkish; no_pre_signaling

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **79.0%** Confidence: **medium** Market: **80.5%** Edge: **-1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 79%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Polling leader (~23-24%) in a 5-way race headed to an Aug 25 runoff; Trump's May 29 endorsement is the dominant signal in OK GOP primaries and his \$10.9M self-funding leads the ad war. Market (0.805) ~ my estimate, so no edge.

Key drivers: trump_endorsement; polling_lead; self_funding_10.9M; runoff_likely

Will the Federal Reserve Hike rates by 0bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H0)

Category: economy | Closes: 2026-06-17 17:59 UTC

My prob: **96.0%** Confidence: **high** Market: **98.5%** Edge: **-2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 96%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Fed-funds futures imply ~97% HOLD for the June 17 meeting; three consecutive holds and May CPI at 4.2% YoY foreclose any cut. I sit marginally below the market (96% vs 98.5%) on a small hike-tail from hawkish new Chair Warsh's debut; market overprices YES so no value bet.

Key drivers: fed_funds_futures; cpi_4.2pct; chair_warsh_hawkish; three_consecutive_holds

Edge Overview

Profitable Leans (after fees)

Ticker	Side	Spot EV/contract	Limit EV/contract	Conviction
KXGOVSDNOMR-26-TDOENO		+\$0.06	+\$0.07	medium

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 \cdot p \cdot (1-p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.
