statements	1	-\$0.16	-100.0%	0%	-\$0.16

By strategy arm

Strategy	n	CF P&L	CF ROI	Win%	MaxDD
L0-local-single	2	+\$0.29	+17.0%	100%	+\$0.00
S2-ensemble3-crowd	2	+\$0.03	+3.1%	50%	-\$0.39
S0-single	9	-\$0.49	-6.5%	78%	-\$0.58
untagged	13	-\$1.79	-15.2%	77%	-\$2.34
LQ5-ensemble5	5	-\$0.83	-21.7%	60%	-\$0.83

Open positions — expected P&L (forward-looking)

Forward-looking expected P&L on **63** open modal-side positions (mark-to-model): **+\$4.53**/contract total (27 are +EV). Of that, **+\$0.53** is on actionable leans (the rest is counterfactual — positions the confidence gate is holding us out of).

Autonomous Learning — policy & proposals

The decision policy (when to take a position) is data, not frozen code. The learning pass reads the system's own resolved record and proposes nudges, but anti-overfit guardrails (min-n, max-step) gate every change. **Policy v7**; proposals as of 2026-06-29.

Knob (decision threshold)	Value
min profitable EV (\$/contract)	0.020
max market-fade gap (no-high-conf)	0.050
conviction medium / high EV	0.05 / 0.12
low confidence never leans	True
adversarial veto binding	True

Pending proposals (from the system's own outcomes)

Knob	Current → Proposed	n	Guardrail	Rationale
max_market_disagreement	0.05 → None	31	INSUFFICIENT_DATA	No coherent 'wider fades lose' ladder yet (signal not monotone / tail band
hard_gap_ceiling	0.2 → None	31	INSUFFICIENT_DATA	No catastrophic wide-fade band yet — the absolute ceiling stays put.
min_confidence_for_lean	medium → None	31	INSUFFICIENT_DATA	Confidence gating evidence inconclusive (or floor already raised).
adversarial_veto_binding	True → None	5	INSUFFICIENT_DATA	Veto precision becomes learnable once vetoed/revised positions resolve;

INSUFFICIENT_DATA = directionally real but too few samples to trust; HUMAN_GATE = change too large to auto-apply; AUTO_OK = guardrail-cleared, auto-applied. Nothing auto-applies until the record is large enough.

Active Markets

Will CPI rise more than 0.0% in June 2026? (KXCPI-26JUN-T0.0)

Category: economy | Closes: 2026-07-14 13:56 UTC

My prob: **92.0%** Confidence: **high** Market: **3.5%** Edge: **88.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 88pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.87/contract at my probability, not recommended.)

Rationale: The evidence strongly supports the likelihood of CPI rising more than 0.0% in June 2026. The May 2026 CPI is projected to rise 4.2% year-over-year, which is consistent with historical trends during periods of strong economic growth or supply shocks. Multiple reputable sources, including FactSet Insight, CNBC, and Morningstar, all indicate continued lofty inflation. These projections are also align

Key drivers: Year-over-year CPI increase in May 2026; Historical inflation trends; Forecasts from multiple reputable sources

Will Trump make 0 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-0)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **21.7%** Confidence: **high** Market: **99.5%** Edge: **-77.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: 78pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.76/contract at my probability, not recommended.)

Rationale: Based on the evidence, Trump has a history of visiting Mar-a-Lago for political and personal reasons, and there is a report indicating he is headed back to Mar-a-Lago for a crypto conference. However, the question specifically focuses on whether he will make 0 trips in June 2026, and there is no direct confirmation of a trip during this exact timeframe. The uncertainty lies in the timing and purpo

Key drivers: Report of Trump heading back to Mar-a-Lago for a crypto conference; Historical pattern of frequent visits to Mar-a-Lago; Lack of direct confirmation of a trip in June 2026; Uncertainty regarding political and personal schedules

Will CPI rise more than 0.1% in June 2026? (KXCPI-26JUN-T0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

My prob: **79.3%** Confidence: **high** Market: **2.5%** Edge: **76.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: 77pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.75/contract at my probability, not recommended.)

Rationale: The base rate for monthly CPI increases is typically small, often in the range of 0.1% to 0.3% in normal economic conditions. However, given the current global economic environment, including potential inflationary pressures from supply chain disruptions, rising energy prices, and strong consumer demand, the likelihood of a CPI increase exceeding 0.1% in June 2026 is elevated. Multiple sources, th

Key drivers: Global inflationary pressures; Energy prices; Consumer demand; Supply chain disruptions

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **15.0%** Confidence: **high** Market: **78.5%** Edge: **-63.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 64pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.61/contract at my probability, not recommended.)

Rationale: There is currently no significant evidence or public indication that Mike Mazzei is positioning himself as a candidate for the Republican nomination for Governor in Oklahoma. The absence of news coverage or statements from Mazzei or his campaign suggests that he is not a prominent figure in the race at this time.

Key drivers: Lack of public announcements or campaign activity from Mike Mazzei; No news coverage indicating his involvement in the race

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T4.1)

Category: economy | Closes: 2026-07-14 14:00 UTC

My prob: **64.0%** Confidence: **low** Market: **4.0%** Edge: **60.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence below the medium floor — estimate too uncertain to fade the market (Indicative raw EV +\$0.55/contract at my probability, not recommended.)

Rationale: The question asks for the year-over-year CPI in June 2026, but no specific evidence or data points were provided in the 'facts' field of the evidence notes. The reference class for CPI trends typically includes historical inflation rates, central bank policies, and macroeconomic indicators. While sources like the Bureau of Labor Statistics and OECD are consulted, there is insufficient granular data.

Key drivers: Historical CPI trends; Central bank monetary policy; Macroeconomic conditions; Energy and commodity prices

Will the unemployment rate (U-3) be above 4.1% in June? (KXU3-26JUN-T4.1)

Category: economy | Closes: 2026-07-02 14:00 UTC

My prob: **36.0%** Confidence: **high** Market: **90.5%** Edge: **-54.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 55pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.53/contract at my probability, not recommended.)

Rationale: The evidence suggests mixed signals about the U.S. labor market in May 2026. While some reports indicate strong job gains and stable unemployment rates, others highlight underlying labor market slack and regional variations. The fact that Hawaii's unemployment rate was 2.5% in May might suggest a relatively strong labor market in some regions, but it is not representative of the national trend. Th

Key drivers: Mixed signals from labor market reports (both positive and negative); Regional variations in unemployment and job growth; The potential for headline jobs numbers to mask underlying labor market slack; The importance of alternative measures like U-6 in understanding labor underutilization

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **53.3%** Confidence: **high** Market: **0.5%** Edge: **52.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: 53pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.51/contract at my probability, not recommended.)

Rationale: The evidence suggests that a 14-point agreement between the U.S. and Iran was reached, with provisions on Iran's nuclear program and specific issues like enriched uranium and the Strait of Hormuz. However, there are also reports of renewed hostilities and criticism of the deal, which could impact its stability. The presence of multiple sources and the specificity of the agreement increase the prob

Key drivers: The existence of a 14-point agreement between the U.S. and Iran.; Provisions on Iran's nuclear program and specific geopolitical issues.; Renewed hostilities and criticism of the deal.; Potential edits to the deal by Trump and the impact of ongoing tensions.

Will Trump make 2 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-2)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **53.3%** Confidence: **high** Market: **0.5%** Edge: **52.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: 53pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.51/contract at my probability, not recommended.)

Rationale: Based on the evidence, Trump has visited Mar-a-Lago multiple times in 2026, including at least 24 times as of March 2026, suggesting a strong pattern of frequent visits. However, the exact number of trips in June 2026 is not specified, and there is limited information on his schedule for that specific period. While the evidence supports that he is active in Florida and has plans for events such as

Key drivers: Trump's frequent visits to Mar-a-Lago as of March 2026; Planned events in Florida (e.g.; crypto conference) that may influence his schedule; Uncertainty in the specific number of trips in June 2026

Will Trump make 1 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-1)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **50.0%** Confidence: **high** Market: **0.5%** Edge: **49.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 50pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.48/contract at my probability, not recommended.)

Rationale: The evidence provided does not directly address whether Trump will make 1 trip to Mar-a-Lago in June 2026. The only relevant information is about Trump's son potentially buying waterfront land in West Palm, which is unrelated to the number of trips to Mar-a-Lago. With no direct evidence or historical context about Trump's travel patterns to Mar-a-Lago as President, the probability is estimated as

Key drivers: No direct evidence about Trump's travel plans to Mar-a-Lago in June 2026; Lack of historical data on Trump's trips to Mar-a-Lago as President

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before July 1, 2026? (KXHORMUZNORM-26MAR17-B260701)

Category: politics | Closes: 2026-06-15 14:00 UTC

My prob: **31.7%** Confidence: **high** Market: **0.7%** Edge: **31.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: 31pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.30/contract at my probability, not recommended.)

Rationale: The evidence suggests that traffic through the Strait of Hormuz has been significantly disrupted and that it may not return to normal until late 2026 or later. Multiple sources, including CNBC and Statista, report that traffic has virtually stopped or is only trickling through. Kalshi traders have predicted traffic would not return to normal until July or even August or later. These signals imply

Key drivers: Disruption and slow recovery of traffic through the Strait of Hormuz as reported by multiple sources.; Kalshi trader predictions indicating delayed return to normal traffic levels.; Uncertainty around geopolitical tensions and conflicts affecting shipping routes.

Will JD Vance visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-JVAN)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **19.3%** Confidence: **high** Market: **0.4%** Edge: **19.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The forecast is overconfident and lacks sufficient evidence to justify the proposed probability. The divergence from the market is large and not supported by the reasoning provided, which is incomplete and speculative. (Indicative raw EV +\$0.18/contract at my probability, not recommended.)

Rationale: The evidence suggests that JD Vance's visits to Iran have been postponed or delayed multiple times, and there is no clear indication that he will visit Iran before July 1, 2026. The diplomatic efforts between the U.S. and Iran are ongoing but uncertain, with delays and shifting priorities complicating any definitive timeline. While there are signs of progress in peace talks, such as the 'road map'

Key drivers: Postponements and delays in Vance's scheduled diplomatic engagements with Iran; Uncertainty in the timeline of U.S.-Iran peace talks; Shifting diplomatic priorities and political considerations affecting Vance's travel plans

Will any U.S. House member visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-AHOU)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **15.0%** Confidence: **high** Market: **0.2%** Edge: **14.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The position is overconfident and lacks sufficient evidence to justify the proposed probability. The divergence from the market is not supported by credible reasoning, and the edge is not real due to the lack of actionable information or ev (Indicative raw EV +\$0.14/contract at my probability, not recommended.)

Rationale: Historically, U.S. House members have rarely visited Iran due to the politically sensitive nature of such trips. No specific evidence of planned visits between 2025 and 2026 has been found in the consulted sources. However, the possibility cannot be ruled out entirely due to the dynamic nature of international relations and potential unreported diplomatic efforts.

Key drivers: Historical rarity of such visits; No direct evidence of planned visits; Potential for unreported diplomatic activity

Will Graham Platner drop out of the 2026 United States Senate election in Maine before Jul 14, 2026? (KXPLATNERDROPOUT-26)

Category: politics | Closes: 2026-07-14 14:00 UTC

My prob: **15.0%** Confidence: **high** Market: **1.7%** Edge: **13.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The forecast lacks sufficient evidence to support a high confidence in a 'yes' outcome. The absence of public information does not constitute evidence of low probability, and the divergence from the market suggests overconfidence. The posit (Indicative raw EV +\$0.12/contract at my probability, not recommended.)

Rationale: There is currently no public evidence of any scandal or issue involving Graham Platner that would suggest he is likely to drop out of the 2026 Senate election in Maine before July 14, 2026. The lack of news coverage or reports from reputable sources indicates that no major developments have occurred that would compel him to withdraw. However, the absence of information does not rule out the possib

Key drivers: No public scandal or issue reported; No indication of internal pressures or health concerns

Will Marco Rubio visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-MRUB)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **12.0%** Confidence: **high** Market: **0.2%** Edge: **11.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The position is overconfident and lacks a credible edge over the market, which has already priced in a much lower probability. The reasoning is speculative and does not justify the proposed probability. (Indicative raw EV +\$0.11/contract at my probability, not recommended.)

Rationale: The base rate indicates that U.S.-Iran diplomatic efforts have historically faced significant challenges due to mutual distrust and regional tensions. Recent evidence suggests that U.S.-Iran peace talks are in question due to recent Gulf attacks, and Gulf allies have concerns about any Iran deal, which may hinder diplomatic progress. While Rubio is involved in discussions around the Iran deal, the

Key drivers: Historical challenges in U.S.-Iran diplomacy; Recent Gulf attacks complicating peace talks; Gulf allies' concerns about Iran deals; No direct evidence of Rubio visiting Iran

Will Toby Doeden be the Republican nominee for Governor in South Dakota? (KXGOVSDNOMR-26-TDOE)

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **45.0%** Confidence: **high** Market: **57.5%** Edge: **-12.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The forecaster's position is overconfident and lacks a credible justification for diverging from the market-implied probability. The reasoning is incomplete and does not convincingly establish that the 'NO' position is more likely than the (Indicative raw EV +\$0.10/contract at my probability, not recommended.)

Rationale: Toby Doeden is one of two Republican candidates advancing to the gubernatorial runoff, indicating he is a strong contender. However, the runoff is the first-ever in South Dakota's gubernatorial race, which introduces uncertainty regarding voter behavior and campaign dynamics. While Doeden has a diverse business background, the outcome will depend on factors such as voter preferences, campaign strategies

Key drivers: Outcome of the runoff election; Voter preferences on key issues such as prison policy; Campaign strategies of both candidates

Will Genter Drummond be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-GDRU)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: 15.0% Confidence: high Market: 20.5% Edge: -5.5%

Lean: NONE Conviction: low

No actionable lean: ADVERSARIAL VETO: The position is overconfident and lacks sufficient evidence to justify the high confidence level. The divergence from the market is small, but the forecaster's reasoning does not convincingly establish an edge over the market, which may be (Indicative raw EV +\$0.03/contract at my probability, not recommended.)

Rationale: There is currently no substantial evidence suggesting that Genter Drummond is positioning himself as a candidate for the Republican nomination for Governor of Oklahoma. The absence of direct statements from Drummond or his campaign, combined with the lack of news coverage indicating his involvement in the race, makes it unlikely at this stage. However, the political landscape can shift rapidly, an

Key drivers: Lack of public statements from Genter Drummond; No news coverage indicating his candidacy; No official campaign announcements

The Odyssey Rotten Tomatoes score? (KXRT-ODY-90)

Category: culture | Closes: 2026-07-20 14:00 UTC

My prob: 50.0% Confidence: high Market: 47.0% Edge: 3.0%

Lean: NONE Conviction: low

No actionable lean: no +EV value bet at the ask (my prob 50%, modal YES) — staying out. (Indicative raw EV +\$0.00/contract at my probability, not recommended.)

Rationale: The evidence notes indicate that as of 2026-08-14, there is no information available about the Rotten Tomatoes score for The Odyssey (2026) in the provided search results. While the film is confirmed to be directed by Christopher Nolan, this does not provide any direct insight into its Rotten Tomatoes score. The base rate suggests that scores for other films are available, but not for this specifi

Key drivers: Lack of information in the provided sources; Confirmation of the film's director but not its score

Will Donald J. Trump attend The 2026 FIFA World Cup Final? (KXTRUMPATTEND)

Category: politics | Closes: 2026-07-20 14:00 UTC

My prob: **84.0%** Confidence: **high** Market: **83.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 84%, modal YES) — staying out.

Rationale: Multiple credible sources, including FOX 5 New York, The Tribune, The News Mill, and Al Jazeera, confirm or strongly suggest that Donald J. Trump will attend the 2026 FIFA World Cup Final, including reports that he will hand out the trophy at a match in New Jersey. Additional evidence includes his confirmed attendance at the World Cup draw and his active involvement in related commentary. While th

Key drivers: Multiple sources confirming Trump's attendance at World Cup events; Report of Trump handing out the trophy at a match in New Jersey; Trump's active involvement and commentary on the World Cup; Confirmed attendance at the World Cup draw

Will the Federal Reserve Hike rates by 0bps at their July 2026 meeting? (KXFEDDECISION-26JUL-H0)

(KXFEDDECISION-26JUL-H0)

Category: economy | Closes: 2026-07-29 18:05 UTC

My prob: **78.3%** Confidence: **medium** Market: **81.5%** Edge: **-3.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 78%, modal YES) — staying out.

Rationale: The base rate for a 0bps rate hike by the Federal Reserve during a meeting is historically low, as the Fed typically adjusts rates in response to economic conditions. However, in a scenario where inflation is under control, unemployment is stable, and economic growth is moderate, the Fed may opt for a pause. The current economic environment as of June 2026 appears to align with such conditions, su

Key drivers: inflation trends; unemployment rates; economic growth forecasts

Will CPI rise more than -0.1% in June 2026? (KXCPI-26JUN-T-0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC
My prob: **48.3%** Confidence: **low** Market: **15.0%** Edge: **33.3%**
Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 48%, modal NO) — staying out.
Rationale: The base rate for CPI changes in June is historically modest, with mixed trends depending on seasonality and economic conditions. While no direct evidence of CPI rising more than -0.1% in June 2026 was found in the sources consulted, the absence of strong deflationary signals and the general trend of stable inflation in recent forecasts suggests a moderate likelihood of CPI rising above -0.1%. Key
Key drivers: inflation expectations; energy prices; labor market dynamics

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T3.9)

Category: economy | Closes: 2026-07-14 14:00 UTC
My prob: **42.7%** Confidence: **low** Market: **8.0%** Edge: **34.7%**
Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 43%, modal NO) — staying out.
Rationale: Base rate inferred from historical CPI data and current economic trends suggesting moderate inflation. Limited specific evidence available for June 2026, so relying heavily on base rates and general economic indicators.
Key drivers: Historical CPI trends; Economic forecasts; General market sentiment

Edge Overview

Profitable Leans (after fees)

No profitable leans after fees this run — markets are efficiently priced for our estimates.

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 * p * (1 - p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

On down-ballot foreign nominations, do not diverge from a liquid market without ≥ 3 independent primary sources — now enforced by the Qwen-browser retrieval (>5 disparate).

2026-06-29 | resolution | KXCOLOMBIAPRES-26-ICAS | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.1764 | Brier (market): 0.0182 | lost to market

Incumbent congressional primaries: anchor to the strong incumbent base rate unless ≥ 3 independent sources show a real threat.

2026-06-29 | resolution | KXNY13D-26-AESP | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.3136 | Brier (market): 0.2352 | lost to market

RT-score threshold markets: pull multiple review-aggregator snapshots near close; a single snapshot is thin.

2026-06-29 | resolution | KXRT-SUPE-75 | culture [\[thin-independent-sourcing\]](#)
Brier (mine): 0.0484 | Brier (market): 0.0056 | lost to market

Even on near-certainties, log ≥ 3 independent sources so the rubric and audit trail hold.

2026-06-29 | resolution | KXEOWEEK-26JUN13-0 | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.0100 | Brier (market): 0.0000 | lost to market

For KXTRUMPSAY-style verbatim-utterance markets, resolution is a literal tracked quote from the resolution source, NOT topical salience — never forecast above the market without a CONFIRMED verbatim quote, and treat any 80pt fade against a liquid market as model error. This is exactly the case the new hard_gap_ceiling now hard-blocks regardless of confidence.

2026-06-22 | resolution | KXTRUMPSAY-26JUN22-URAN | statements [\[unjustified-market-divergence\]](#)
Brier (mine): 0.9801 | Brier (market): 0.0342 | lost to market

When diverging below a liquid market that is pricing a strong institutional base rate, require a specific, verifiable reason; narrative of 'division' is not evidence of a formally recorded dissent. Anchor on the base rate.

2026-06-19 | resolution | KXFOMCDISSENTCOUNT-26JUN-0 | economy [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3364 | Brier (market): 0.1332 | lost to market

During an active supply-disruption crisis, anchor flow estimates to the SUPPRESSED regime, not an assumed recovery, until data confirms normalization; and do not enter a position when divergence from a liquid market is small and rests on an unverified assumption.

2026-06-19 | resolution | KXHORMUZWEEKLY-26JUN14-T25 | politics [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3721 | Brier (market): 0.2450 | lost to market

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.
