Open positions — expected P&L (forward-looking)

Forward-looking expected P&L on **63** open modal-side positions (mark-to-model): **+\$1.44**/contract total (19 are +EV). Of that, **+\$0.53** is on actionable leans (the rest is counterfactual — positions the confidence gate is holding us out of).

Autonomous Learning — policy & proposals

The decision policy (when to take a position) is data, not frozen code. The learning pass reads the system's own resolved record and proposes nudges, but anti-overfit guardrails (min-n, max-step) gate every change. **Policy v7**; proposals as of 2026-06-30.

Knob (decision threshold)	Value
min profitable EV (\$/contract)	0.020
max market-fade gap (no-high-conf)	0.050
conviction medium / high EV	0.05 / 0.12
low confidence never leans	True
adversarial veto binding	True

Pending proposals (from the system's own outcomes)

Knob	Current → Proposed	n	Guardrail	Rationale
max_market_disagreement	0.05 → None	31	INSUFFICIENT_DATA	No coherent 'wider fades lose' ladder yet (signal not monotone / tail band
hard_gap_ceiling	0.2 → None	31	INSUFFICIENT_DATA	No catastrophic wide-fade band yet — the absolute ceiling stays put.
min_confidence_for_lean	medium → None	31	INSUFFICIENT_DATA	Confidence gating evidence inconclusive (or floor already raised).
adversarial_veto_binding	True → None	5	INSUFFICIENT_DATA	Veto precision becomes learnable once vetoed/revised positions resolve;

INSUFFICIENT_DATA = directionally real but too few samples to trust; HUMAN_GATE = change too large to auto-apply; AUTO_OK = guardrail-cleared, auto-applied. Nothing auto-applies until the record is large enough.

Active Markets

Will CPI rise more than 0.0% in June 2026? (KXCPI-26JUN-T0.0)

Category: economy | Closes: 2026-07-14 13:56 UTC

My prob: **92.0%** Confidence: **high** Market: **3.5%** Edge: **88.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 88pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.87/contract at my probability, not recommended.)

Rationale: The evidence strongly supports the likelihood of CPI rising more than 0.0% in June 2026. The May 2026 CPI is projected to rise 4.2% year-over-year, which is consistent with historical trends during periods of strong economic growth or supply shocks. Multiple reputable sources, including FactSet Insight, CNBC, and Morningstar, all indicate continued lofty inflation. These projections are also align

Key drivers: Year-over-year CPI increase in May 2026; Historical inflation trends; Forecasts from multiple reputable sources

Will CPI rise more than 0.1% in June 2026? (KXCPI-26JUN-T0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

My prob: **79.3%** Confidence: **high** Market: **2.5%** Edge: **76.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: 77pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.75/contract at my probability, not recommended.)

Rationale: The base rate for monthly CPI increases is typically small, often in the range of 0.1% to 0.3% in normal economic conditions. However, given the current global economic environment, including potential inflationary pressures from supply chain disruptions, rising energy prices, and strong consumer demand, the likelihood of a CPI increase exceeding 0.1% in June 2026 is elevated. Multiple sources, th

Key drivers: Global inflationary pressures; Energy prices; Consumer demand; Supply chain disruptions

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T4.1)

Category: economy | Closes: 2026-07-14 14:00 UTC

My prob: **64.0%** Confidence: **low** Market: **4.0%** Edge: **60.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence below the medium floor — estimate too uncertain to fade the market (Indicative raw EV +\$0.55/contract at my probability, not recommended.)

Rationale: The question asks for the year-over-year CPI in June 2026, but no specific evidence or data points were provided in the 'facts' field of the evidence notes. The reference class for CPI trends typically includes historical inflation rates, central bank policies, and macroeconomic indicators. While sources like the Bureau of Labor Statistics and OECD are consulted, there is insufficient granular dat

Key drivers: Historical CPI trends; Central bank monetary policy; Macroeconomic conditions; Energy and commodity prices

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **58.0%** Confidence: **high** Market: **79.5%** Edge: **-21.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: 22pt gap exceeds the hard ceiling (20pt) — beyond this divergence from a liquid market, even high confidence is treated as model error, not edge (Indicative raw EV +\$0.19/contract at my probability, not recommended.)

Rationale: There is currently no evidence in the provided sources indicating that Mike Mazzei is the Republican nominee for Governor in Oklahoma as of 2026-06-30. The base rate for any specific individual being nominated in a state-level race is generally low, especially without explicit support or endorsement from major political figures or organizations. The lack of news coverage or statements from Mazzei

Key drivers: Lack of public endorsements or campaign activity; No news coverage indicating nomination status; Low base rate for specific individual nomination

Will Graham Platner drop out of the 2026 United States Senate election in Maine before Jul 14, 2026?

(KXPLATNERDROPOUT-26)

Category: politics | Closes: 2026-07-14 14:00 UTC

My prob: **15.0%** Confidence: **high** Market: **1.7%** Edge: **13.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: ADVERSARIAL VETO: The forecast lacks sufficient evidence to support a high confidence in a 'yes' outcome. The absence of public information does not constitute evidence of low probability, and the divergence from the market suggests overconfidence. The posit (Indicative raw EV +\$0.12/contract at my probability, not recommended.)

Rationale: There is currently no public evidence of any scandal or issue involving Graham Platner that would suggest he is likely to drop out of the 2026 Senate election in Maine before July 14, 2026. The lack of news coverage or reports from reputable sources indicates that no major developments have occurred that would compel him to withdraw. However, the absence of information does not rule out the possib

Key drivers: No public scandal or issue reported; No indication of internal pressures or health concerns

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **52.8%** Confidence: **high** Market: **56.5%** Edge: **-3.7%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 53%, modal YES) — staying out. (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: The evidence indicates that Toby Doeden has advanced to the runoff in the Republican governor primary, but there is currently no definitive information about the final outcome. The runoff is likely to be competitive, with shifting loyalties and lower turnout potentially influencing the result. While Doeden is a strong contender, the presence of another candidate (Rhoden) and the uncertainty around

Key drivers: Doeden's advancement to the runoff; Uncertainty around voter turnout and shifting loyalties; Competitiveness of the runoff between Doeden and Rhoden

The Odyssey Rotten Tomatoes score? (KXRT-ODY-90)

Category: culture | Closes: 2026-07-20 14:00 UTC

My prob: **50.0%** Confidence: **high** Market: **47.0%** Edge: **3.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 50%, modal YES) — staying out. (Indicative raw EV +\$0.00/contract at my probability, not recommended.)

Rationale: The evidence notes indicate that as of 2026-08-14, there is no information available about the Rotten Tomatoes score for The Odyssey (2026) in the provided search results. While the film is confirmed to be directed by Christopher Nolan, this does not provide any direct insight into its Rotten Tomatoes score. The base rate suggests that scores for other films are available, but not for this specifi

Key drivers: Lack of information in the provided sources; Confirmation of the film's director but not its score

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The base rate of US-Iran nuclear deals historically indicates a low likelihood of successful agreements due to mutual distrust and geopolitical tensions. Recent evidence suggests that while discussions are ongoing, there are significant challenges and no clear signs of compromise from either side. Trump's involvement and edits to potential agreements indicate continued US skepticism or hesitation,

Key drivers: Mutual distrust between the US and Iran; Domestic political pressures in the US; Trump's influence on the negotiation process; Lack of significant progress in Iran's nuclear program; Potential role of international actors in mediation

Will Trump make 1 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-1)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: Based on the evidence, Trump has already visited Mar-a-Lago multiple times in 2026, including at least 24 visits as of March 2026, and there are additional reports indicating he is expected to return during a crypto conference. This suggests a high likelihood that he will make at least one more trip to Mar-a-Lago by June 2026. The key uncertainties relate to the exact number of trips and potential

Key drivers: Multiple confirmed visits to Mar-a-Lago in 2026; including over 24 visits as of March 2026.; Expected return to Mar-a-Lago during a crypto conference in April 2026.; Continued activity in Florida and public appearances suggest ongoing interest in Mar-a-Lago.

Will Trump make 2 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-2)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **0.0%** Confidence: **medium** Market: **0.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: Multiple reports indicate that Trump has visited Mar-a-Lago multiple times in 2026, including one specifically noted as the 24th visit. However, there is also evidence that he skipped his usual Friday trips to Mar-a-Lago in 2026, suggesting some variability in his schedule. Given his history of frequent visits and the reported 24th visit, it is plausible that he will make at least two trips by Jun

Key drivers: Multiple confirmed visits to Mar-a-Lago in 2026; including a 24th visit as of March 2026.; Evidence of skipped usual Friday trips to Mar-a-Lago; indicating potential variability in schedule.; Trump's travel schedule in 2026 includes both Mar-a-Lago visits and nationwide trips

Will the unemployment rate (U-3) be above 4.1% in June? (KXU3-26JUN-T4.1)

Category: economy | Closes: 2026-07-02 14:00 UTC

My prob: **93.8%** Confidence: **high** Market: **92.5%** Edge: **1.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 94%, modal YES) — staying out.

Rationale: The evidence suggests mixed signals regarding the U.S. labor market in early 2026. While headline jobs numbers indicate strength (e.g., 'Strong, Strong Jobs' in May), there are indications of underlying slack (e.g., 'May's Headline Jobs Numbers Mask Underlying Labor Market Slack'). Regional data, such as Hawaii's unemployment rate at 2.5% and Arizona's softening labor market, suggest local variati

Key drivers: Mixed signals in headline jobs numbers vs. underlying labor market slack; Regional variations in unemployment and job gains; Potential underreporting of labor market slack

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before July 1, 2026? (KXHORMUZNORM-26MAR17-B260701)

Category: politics | Closes: 2026-06-15 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.4%** Edge: **-0.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The evidence notes indicate a lack of direct data or recent reports on transit calls through the Strait of Hormuz as of June 30, 2026, with no specific figures provided. This absence of data, combined with the lessons from past misses, suggests that any assumption about a recovery or increase in transit calls should be treated cautiously. The probability is anchored to the possibility of suppression

Key drivers: lack of current data on transit calls; historical suppression during crises; uncertainty around normalization timing

Will JD Vance visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-JVAN)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.4%** Edge: **-0.4%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: JD Vance is engaged in diplomatic efforts with Iran, including talks on nuclear programs and potential military coordination, but there is no direct evidence or confirmed statements indicating that he will visit Iran before July 1, 2026. The evidence points to ongoing dialogue rather than a specific visit. Base rates suggest that diplomatic talks do not always translate into physical visits by high

Key drivers: Ongoing diplomatic engagement with Iran; but no confirmation of a visit.; Lack of direct evidence or statements indicating a planned visit.; Historical base rates suggest that diplomatic talks do not always lead to physical visits.

Will Trump make 0 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-0)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **98.8%** Confidence: **high** Market: **99.5%** Edge: **-0.7%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 99%, modal YES) — staying out.

Rationale: The evidence suggests that Trump has a consistent pattern of visiting Mar-a-Lago, with recent reports indicating he is headed back during a crypto conference and has been present there in May 2026. However, one source indicates he did not take a usual trip to Mar-a-Lago in early April 2026, suggesting variability in his schedule. The uncertainty around political and diplomatic events, as well as t

Key drivers: Recent reports of Trump heading to Mar-a-Lago during a crypto conference in April 2026.; Presence at Mar-a-Lago in May 2026 as noted by The Palm Beach Post.; Absence of a usual Friday trip to Mar-a-Lago in early April 2026.; Uncertainty regarding specific plans for 2026 and potential political/diplomat

Will Genter Drummond be the Republican nominee for Governor in Oklahoma? (KXGOVOKNOMR-26-GDRU)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **18.9%** Confidence: **high** Market: **20.5%** Edge: **-1.6%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 19%, modal NO) — staying out.

Rationale: There is currently no direct evidence in the provided sources indicating that Genter Drummond is the Republican nominee for Governor in Oklahoma. The base rate for any specific individual becoming a gubernatorial nominee in a state is typically low unless they are a prominent political figure or have already established a strong campaign. No recent news or statements about Drummond's candidacy or

Key drivers: Lack of direct evidence of candidacy; No recent endorsements or campaign announcements; No indication of political momentum

Will Marco Rubio visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-MRUB)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.2%** Edge: **-0.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: The evidence suggests there is some level of U.S.-Iran engagement (e.g., Trump's claim of talks in Qatar), but other reports indicate ongoing conflict and uncertainty about the feasibility of talks. Marco Rubio's involvement is not directly mentioned, but his political alignment with Trump and potential interest in foreign policy matters could influence his actions. However, this is speculative

Key drivers: U.S.-Iran diplomatic engagement (or lack thereof) as of late June 2026; Marco Rubio's political alignment with Trump and potential interest in foreign policy; Historical patterns of U.S.-Iran relations and limited diplomatic interactions

Will any U.S. House member visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-AHOU)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **0.0%** Confidence: **high** Market: **0.1%** Edge: **-0.1%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: There is currently no evidence of any U.S. House member visiting Iran before July 1, 2026. However, given the historical precedent of U.S. officials engaging in diplomatic outreach to Iran, especially during periods of political change or negotiation, there remains a non-trivial possibility that a House member might make such a visit. The lack of confirmed news or statements does not rule out the

Key drivers: Absence of confirmed reports or statements about such a visit; Historical precedent of U.S. officials engaging with Iran in diplomatic contexts; Potential for unexpected political developments influencing such actions

Will Donald J. Trump attend The 2026 FIFA World Cup Final? (KXTRUMPATTEND)

Category: politics | Closes: 2026-07-20 14:00 UTC

My prob: **84.0%** Confidence: **high** Market: **83.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 84%, modal YES) — staying out.

Rationale: Multiple credible sources, including FOX 5 New York, The Tribune, The News Mill, and Al Jazeera, confirm or strongly suggest that Donald J. Trump will attend the 2026 FIFA World Cup Final, including reports that he will hand out the trophy at a match in New Jersey. Additional evidence includes his confirmed attendance at the World Cup draw and his active involvement in related commentary. While th

Key drivers: Multiple sources confirming Trump's attendance at World Cup events; Report of Trump handing out the trophy at a match in New Jersey; Trump's active involvement and commentary on the World Cup; Confirmed attendance at the World Cup draw

Will the Federal Reserve Hike rates by 0bps at their July 2026 meeting? (KXFEDDECISION-26JUL-H0)

Category: economy | Closes: 2026-07-29 18:05 UTC

My prob: **78.3%** Confidence: **medium** Market: **81.5%** Edge: **-3.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 78%, modal YES) — staying out.

Rationale: The base rate for a 0bps rate hike by the Federal Reserve during a meeting is historically low, as the Fed typically adjusts rates in response to economic conditions. However, in a scenario where inflation is under control, unemployment is stable, and economic growth is moderate, the Fed may opt for a pause. The current economic environment as of June 2026 appears to align with such conditions, su

Key drivers: inflation trends; unemployment rates; economic growth forecasts

Will CPI rise more than -0.1% in June 2026? (KXCPI-26JUN-T-0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC
My prob: **48.3%** Confidence: **low** Market: **15.0%** Edge: **33.3%**
Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 48%, modal NO) — staying out.
Rationale: The base rate for CPI changes in June is historically modest, with mixed trends depending on seasonality and economic conditions. While no direct evidence of CPI rising more than -0.1% in June 2026 was found in the sources consulted, the absence of strong deflationary signals and the general trend of stable inflation in recent forecasts suggests a moderate likelihood of CPI rising above -0.1%. Key
Key drivers: inflation expectations; energy prices; labor market dynamics

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T3.9)

Category: economy | Closes: 2026-07-14 14:00 UTC
My prob: **42.7%** Confidence: **low** Market: **8.0%** Edge: **34.7%**
Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 43%, modal NO) — staying out.
Rationale: Base rate inferred from historical CPI data and current economic trends suggesting moderate inflation. Limited specific evidence available for June 2026, so relying heavily on base rates and general economic indicators.
Key drivers: Historical CPI trends; Economic forecasts; General market sentiment

Edge Overview

Profitable Leans (after fees)

No profitable leans after fees this run — markets are efficiently priced for our estimates.

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 * p * (1 - p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

On down-ballot foreign nominations, do not diverge from a liquid market without ≥ 3 independent primary sources — now enforced by the Qwen-browser retrieval (>5 disparate).

2026-06-29 | resolution | KXCOLOMBIAPRES-26-ICAS | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.1764 | Brier (market): 0.0182 | lost to market

Incumbent congressional primaries: anchor to the strong incumbent base rate unless ≥ 3 independent sources show a real threat.

2026-06-29 | resolution | KXNY13D-26-AESP | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.3136 | Brier (market): 0.2352 | lost to market

RT-score threshold markets: pull multiple review-aggregator snapshots near close; a single snapshot is thin.

2026-06-29 | resolution | KXRT-SUPE-75 | culture [\[thin-independent-sourcing\]](#)
Brier (mine): 0.0484 | Brier (market): 0.0056 | lost to market

Even on near-certainties, log ≥ 3 independent sources so the rubric and audit trail hold.

2026-06-29 | resolution | KXEOWEEK-26JUN13-0 | politics [\[thin-independent-sourcing\]](#)
Brier (mine): 0.0100 | Brier (market): 0.0000 | lost to market

For KXTRUMPSAY-style verbatim-utterance markets, resolution is a literal tracked quote from the resolution source, NOT topical salience — never forecast above the market without a CONFIRMED verbatim quote, and treat any 80pt fade against a liquid market as model error. This is exactly the case the new hard_gap_ceiling now hard-blocks regardless of confidence.

2026-06-22 | resolution | KXTRUMPSAY-26JUN22-URAN | statements [\[unjustified-market-divergence\]](#)
Brier (mine): 0.9801 | Brier (market): 0.0342 | lost to market

When diverging below a liquid market that is pricing a strong institutional base rate, require a specific, verifiable reason; narrative of 'division' is not evidence of a formally recorded dissent. Anchor on the base rate.

2026-06-19 | resolution | KXFOMCDISSENTCOUNT-26JUN-0 | economy [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3364 | Brier (market): 0.1332 | lost to market

During an active supply-disruption crisis, anchor flow estimates to the SUPPRESSED regime, not an assumed recovery, until data confirms normalization; and do not enter a position when divergence from a liquid market is small and rests on an unverified assumption.

2026-06-19 | resolution | KXHORMUZWEEKLY-26JUN14-T25 | politics [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3721 | Brier (market): 0.2450 | lost to market

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.

2026-05-31 | user_feedback | politics [\[overreaction-and-confidence\]](#)
