

Superforecaster — Kalshi Soft Markets

Generated: 2026-06-13T22:19:59Z

Metric	Value
Active markets	20
Resolved markets	12
Total forecast entries	61
Profitable leans (after fees)	2
Resolved with calibration	12
Brier (mine, mean)	0.1543
Brier (market, mean)	0.1957
Skill vs market	0.0414

Performance Over Time

Resolved: **12** Brier (mine): **0.154** vs market **0.196** Skill: **+0.041** (beating the market)

Provisional — only 12 resolved market(s). A skill gap is not statistically distinguishable from luck below ~30 resolutions; read the trend, not the point estimate.

Where the edge is — by segment

Strongest: **politics / us-governor-primary** (skill +0.065, n=3). Weakest: **politics / us-senate** (skill -0.033, n=4).

By category

Category	n	Brier (mine)	Brier (mkt)	Skill
economy	1	0.014	0.076	+0.061
politics	11	0.167	0.207	+0.040

By sub-category

Category / sub-category	n	Brier (mine)	Brier (mkt)	Skill
politics / foreign-election	1	0.384	0.697	+0.313
politics / us-governor-primary	3	0.215	0.280	+0.065
economy / jobs-unemployment	1	0.014	0.076	+0.061

politics / mayoral	2	0.038	0.068	+0.029
politics / us-governor	1	0.000	0.000	+0.000
politics / us-senate	4	0.183	0.150	-0.033

Active Markets

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before July 1, 2026? (KXHORMUZNORM-26MAR17-B260701)

Category: politics | Closes: 2026-06-15 14:00 UTC

My prob: **6.0%** Confidence: **medium** Market: **16.5%** Edge: **-10.5%**

Lean: **NO** Conviction: **medium**

Trade (spot): BUY NO @ \$0.84 now (taker, fee \$0.01/contract) -> net EV **+\$0.09/contract**

Trade (limit): rest BUY NO @ \$0.83 GTC until 2026-06-15 -> net EV **+\$0.10/contract** if filled

Rationale: Reaching a 7-day MA of 60 (~50% of normal) by July 1 from today's ~3/day requires full physical reopening within ~18 days; mine clearing (months), war-risk insurance reinstatement, and vessel repositioning make this near-impossible even if a deal is signed this week.

Key drivers: MA ~3/day vs 60 threshold; mine clearing takes months; war-risk insurance lag; vessel backlog; 18-day window

Will the unemployment rate (U-3) be above 4.1% in June? (KXU3-26JUN-T4.1)

Category: economy | Closes: 2026-07-02 14:00 UTC

My prob: **93.0%** Confidence: **high** Market: **89.5%** Edge: **3.5%**

Lean: **YES** Conviction: **low**

Trade (spot): BUY YES @ \$0.90 now (taker, fee \$0.01/contract) -> net EV **+\$0.02/contract**

Trade (limit): rest BUY YES @ \$0.89 GTC until 2026-07-02 -> net EV **+\$0.03/contract** if filled

Rationale: U-3 has held at 4.3% for April and May 2026; resolving NO requires a rare 0.2pp single-month drop against Iran-war and tariff headwinds and rising jobless claims.

Key drivers: U-3 stable at 4.3%; rare 0.2pp monthly drop needed; rising initial claims; CBO/Vanguard project 4.5-4.6% by year-end

How many dissenting votes at the next Fed meeting? (KXFOMCDISSENTCOUNT-26JUN-0)

Category: economy | Closes: 2026-06-17 14:00 UTC

My prob: **42.0%** Confidence: **low** Market: **63.5%** Edge: **-21.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence — estimate too uncertain to fade the market (Indicative raw EV +\$0.19/contract at my probability, not recommended.)

Rationale: Held: at least one dissent (likely dove Miran) remains more probable than market's 64% zero-dissent pricing; tempered by new-chair unity effect.

Key drivers: Miran dissent risk; fractious FOMC; new-chair unity

Will Toby Doeden be the Republican nominee for Governor in South Dakota? (KXGOVSDNOMR-26-TDOE)

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **45.0%** Confidence: **low** Market: **52.5%** Edge: **-7.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence — estimate too uncertain to fade the market (Indicative raw EV +\$0.05/contract at my probability, not recommended.)

Rationale: Doeden led the June 2 primary (31% vs Rhoden 25%) forcing a first-ever July 28 runoff; establishment/donor consolidation behind Rhoden and lower runoff turnout slightly favor Rhoden, putting Doeden just under even. Market resolves on the actual nominee (closes Nov 3).

Key drivers: Doeden primary lead; establishment consolidation to Rhoden; lower runoff turnout favors establishment; no Trump endorsement; Doeden self-funding

Will there be more than 30 transit calls through the Strait of Hormuz from Jun 8, 2026 to Jun 14, 2026? (KXHORMUZWEEKLY-26JUN14-T30)

Category: politics | Closes: 2026-06-16 14:00 UTC

My prob: **25.0%** Confidence: **low** Market: **32.0%** Edge: **-7.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: low confidence — estimate too uncertain to fade the market (Indicative raw EV +\$0.04/contract at my probability, not recommended.)

Rationale: Same week as T25 but a higher bar (>30); with near-zero commercial transits and the hard closure, exceeding 30 is less likely than 25, though PortWatch's broad counting and prior 25-49 resolutions keep it live.

Key drivers: higher threshold; near-zero commercial transits; PortWatch broad counting; prior weeks 25-49

Will there be more than 25 transit calls through the Strait of Hormuz from Jun 8, 2026 to Jun 14, 2026? (KXHORMUZWEEKLY-26JUN14-T25)

Category: politics | Closes: 2026-06-16 14:00 UTC

My prob: **42.0%** Confidence: **low** Market: **44.5%** Edge: **-2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 42%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast). (Indicative raw EV +\$0.00/contract at my probability, not recommended.)

Rationale: The Jun 8-14 week ran at near-zero commercial transits after the Jun 10-11 IRGC hard closure, but IMF PortWatch counts traffic broadly (both directions, naval) and the prior three weeks all resolved in the 25-49 range, leaving real uncertainty whether the total clears 25.

Key drivers: near-zero commercial transits this week; IRGC hard closure Jun 10-11; prior 3 weeks resolved 25-49; PortWatch counts broadly

Will the Federal Reserve Cut rates by >25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C26)

Category: economy | Closes: 2026-06-17 18:05 UTC

My prob: **1.0%** Confidence: **high** Market: **0.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 1%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: >25bps cut near-impossible absent recession.

Key drivers: no recession; no easing case

Will the Federal Reserve Hike rates by >25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-H26)

Category: economy | Closes: 2026-06-17 18:05 UTC

My prob: **1.0%** Confidence: **high** Market: **0.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 1%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: >25bps hike near-impossible absent a crisis.

Key drivers: no crisis

Will Marco Rubio visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-MRUB)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **1.2%** Confidence: **high** Market: **1.3%** Edge: **-0.1%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 1%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: All US-Iran negotiations occur in third countries (Oman, Pakistan, Geneva), the prospective signing is in Geneva with VP Vance not Rubio, and no US Secretary of State has visited Iran since 1979 — a Rubio visit to Tehran before July 1 is virtually impossible.

Key drivers: talks held in third countries; Vance not Rubio is signatory; no SecState visit since 1979; Level 4 travel advisory

Will any U.S. House member visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-AHOU)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **1.5%** Confidence: **high** Market: **1.3%** Edge: **0.2%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: No sitting US House member has visited Iran in the modern era; with an active conflict, a Level 4 advisory, and no planned CODEL, a visit before July 1 is virtually impossible (marginally above Rubio as an informal trip is less institutionally constrained).

Key drivers: no modern sitting-member visits; active conflict; Level 4 advisory; no planned CODEL

Will the Federal Reserve Cut rates by 25bps at their June 2026 meeting?

(KXFEDDECISION-26JUN-C25)

Category: economy | Closes: 2026-06-17 17:59 UTC

My prob: **2.0%** Confidence: **high** Market: **0.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: a cut is unjustified with core PCE 3.3%.

Key drivers: inflation far above target; no easing case

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before June 15, 2026?

(KXHORMUZNORM-26MAR17-B260615)

Category: politics | Closes: 2026-06-15 14:00 UTC

My prob: **2.0%** Confidence: **high** Market: **0.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: 7-day MA ~3-6 vs 60 threshold; cannot reach 60 by Jun 15.

Key drivers: near-total closure; MA physical lag

Will Trump make 2 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-2)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **2.0%** Confidence: **low** Market: **1.0%** Edge: **1.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 2%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Two June Mar-a-Lago trips is very unlikely given seasonal closure and a packed Iran/G7/NATO schedule.

Key drivers: summer closure; packed schedule

Will the Federal Reserve Hike rates by 25bps at their June 2026 meeting? (KXFEDDECISION-26JUN-H25)

(KXFEDDECISION-26JUN-H25)

Category: economy | Closes: 2026-06-17 18:05 UTC

My prob: **3.0%** Confidence: **medium** Market: **0.5%** Edge: **2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 3%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: no new info; a 25bps hike unlikely at first meeting absent forward guidance.

Key drivers: no hike guidance; new-chair caution

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

My prob: **79.0%** Confidence: **medium** Market: **80.5%** Edge: **-1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 79%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Polling leader (~23-24%) in a 5-way race headed to an Aug 25 runoff; Trump's May 29 endorsement is the dominant signal in OK GOP primaries and his \$10.9M self-funding leads the ad war. Market (0.805) ~ my estimate, so no edge.

Key drivers: trump_endorsement; polling_lead; self_funding_10.9M; runoff_likely

Will legislation that reauthorizes FISA Section 702 authority become law before Jun 19, 2026?

(KXFISAEXTEND-26JUN-26JUN19)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **4.0%** Confidence: **high** Market: **0.5%** Edge: **3.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 4%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: FISA 702 lapsed June 12/13 after the House voted it down and recessed until June 23; with Speaker Johnson declining an emergency recall, enactment before June 19 is mechanically near-impossible.

Key drivers: House in recess until June 23; no emergency recall; failed Senate UC; Pulte-DNI impasse

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

My prob: **22.0%** Confidence: **medium** Market: **19.5%** Edge: **2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 22%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Diplomatic momentum has improved (reports of a 'final agreed text' and officials voicing high confidence), but the actual nuclear terms required to resolve YES remain deferred to follow-on talks, and Trump has repeatedly claimed a deal 'imminent' without one materializing; a qualifying formal deal before the ~July 1 close is more likely than not to fail.

Key drivers: nuclear terms deferred to later talks; repeated false 'deal imminent' claims; Iran enrichment red line; new Supreme Leader hardening stance; 18-day window

Will the Federal Reserve Hike rates by 0bps at their June 2026 meeting? (KXFEDDECISION-26JUN-H0)

Category: economy | Closes: 2026-06-17 17:59 UTC

My prob: **95.0%** Confidence: **medium** Market: **98.5%** Edge: **-3.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 95%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Held: no new information since this morning's forecast; pre-meeting blackout. Hold overwhelmingly likely at Warsh's first meeting with inflation elevated.

Key drivers: inflation above target; new-chair continuity norm

Will Trump make 1 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-1)

Category: politics | Closes: 2026-06-30 14:00 UTC
My prob: **10.0%** Confidence: **low** Market: **2.5%** Edge: **7.5%**
Lean: **NONE** Conviction: **low**

No actionable lean: I lean NO (my prob 10%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: A single personal-use Florida visit in the Jun 18-30 window is possible but unlikely given seasonal closure and Iran/G7 schedule.

Key drivers: summer closure; Iran/G7 schedule; small personal-visit chance

Will Trump make 0 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-0)

Category: politics | Closes: 2026-06-30 14:00 UTC
My prob: **88.0%** Confidence: **medium** Market: **96.0%** Edge: **-8.0%**
Lean: **NONE** Conviction: **low**

No actionable lean: I lean YES (my prob 88%) but it isn't +EV at the ask — no value bet (betting the other side would contradict my forecast).

Rationale: Mar-a-Lago is seasonally closed in summer (Trump made zero June visits in every first-term year), zero trips have occurred through mid-June, and Iran-war management plus G7 travel keep him DC-anchored, making 0 trips the strongly modal outcome.

Key drivers: summer seasonal closure; zero trips through mid-June; Iran war keeps him in DC; G7 travel; Bedminster is summer retreat

Edge Overview

Profitable Leans (after fees)

Ticker	Side	Spot EV/contract	Limit EV/contract	Conviction
KXHORMUZNORM-26MAR17-B260701	NO	+\$0.09	+\$0.10	medium
KXU3-26JUN-T4.1	YES	+\$0.02	+\$0.03	low

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 * p * (1 - p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Lessons Learned

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.
