

Superforecaster — Kalshi Soft Markets

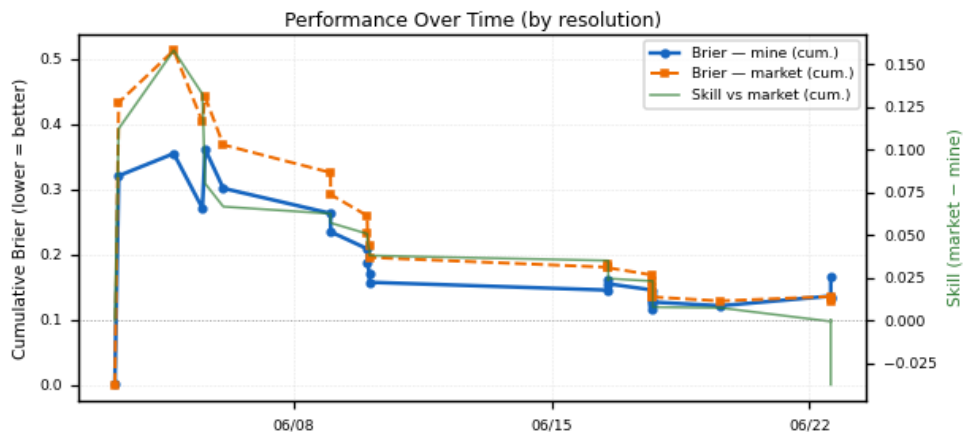

Generated: 2026-06-23T18:45:52Z

Metric	Value
Active markets	27
Resolved markets	25
Total forecast entries	145
Profitable leans (after fees)	3
Resolved with calibration	25
Brier (mine, mean)	0.1657
Brier (market, mean)	0.1281
Skill vs market	-0.0376

Performance Over Time

Resolved: **25** Brier (mine): **0.166** vs market **0.128** Skill: **-0.038** (trailing the market)

Provisional — only 25 resolved market(s). A skill gap is not statistically distinguishable from luck below ~30 resolutions; read the trend, not the point estimate.

Where the edge is — by segment

Strongest: **politics / us-governor-primary** (skill +0.074, n=3). Weakest: **culture / box-office** (skill -0.078, n=2).

By category

Category	n	Brier (mine)	Brier (mkt)	Skill
politics	15	0.153	0.174	+0.021
economy	7	0.051	0.030	-0.021
culture	2	0.251	0.173	-0.078
statements	1	0.980	0.034	-0.946

By sub-category

Category / sub-category	n	Brier (mine)	Brier (mkt)	Skill
politics / foreign-election	1	0.423	0.672	+0.250

politics / us-governor-primary	3	0.214	0.289	+0.074
economy / jobs-unemployment	1	0.020	0.076	+0.056
politics / mayoral	2	0.034	0.063	+0.028

Profit & Loss (realized)

Resolved trades: **8** Realized P&L: **-\$1.19** per contract ROI: **-22.9%** Win rate: **50%**

Paper trade: buy the lean side at its entry ask, after Kalshi fees. A high win rate with negative ROI means winners are underpriced relative to the losers — calibration without profit.

By category

Category	Trades	P&L	ROI	Win%	MaxDD
economy	1	+\$0.25	+33.3%	100%	+\$0.00
culture	2	-\$0.36	-26.5%	50%	-\$0.58
politics	4	-\$0.85	-29.8%	50%	-\$0.85
statements	1	-\$0.23	-100.0%	0%	-\$0.23

Strategy Scoreboard

Every forecast is tagged with the strategy arm that produced it; resolutions score that arm on both Brier skill and realized profit. The topology is measured, not assumed.

Strategy	n	Brier	Skill	Trades	ROI
untagged	13	0.145	+0.035	4	-2.6%
L0-local-single	2	0.031	+0.020	0	—
S0-single	8	0.186	-0.138	3	-37.1%
S2-ensemble3-crowd	2	0.354	-0.165	1	-100.0%

Profitability — when does the edge pay? (counterfactual)

Every resolved forecast scored as a modal-side paper trade (25 total, vs only the taken leans in the realized section above). Overall counterfactual ROI: **-9.3%**, win rate 76%. The breakdowns below isolate **when** the strategy is profitable — the goal is profit, so this is the scoreboard that matters most.

Confidence gate: taken leans vs the ones we declined

Decision	n	CF P&L	CF ROI	Win%	MaxDD
taken	8	-\$0.20	-3.8%	62%	-\$0.80
gated/none	17	-\$1.76	-11.1%	82%	-\$1.79

By edge vs market (|my prob – market|) — where profit survives fees

Edge band	n	CF P&L	CF ROI	Win%	MaxDD
0-5pt	16	+\$0.98	+6.5%	100%	-\$0.01
5-10pt	3	-\$0.27	-11.9%	67%	-\$0.80
10-20pt	4	-\$2.11	-67.9%	25%	-\$2.11
20pt+	2	-\$0.55	-100.0%	0%	-\$0.55

By stated confidence — does confidence predict profit?

Confidence	n	CF P&L	CF ROI	Win%	MaxDD
high	15	+\$0.22	+1.6%	93%	-\$0.16
medium	7	-\$1.23	-23.6%	57%	-\$1.74
low	3	-\$0.94	-48.5%	33%	-\$0.94

By category

Category	n	CF P&L	CF ROI	Win%	MaxDD
economy	7	-\$0.11	-1.8%	86%	-\$0.39
politics	15	-\$1.33	-10.0%	80%	-\$2.59
culture	2	-\$0.36	-26.5%	50%	-\$0.58
statements	1	-\$0.16	-100.0%	0%	-\$0.16

By strategy arm

Strategy	n	CF P&L	CF ROI	Win%	MaxDD
L0-local-single	2	+\$0.29	+17.0%	100%	+\$0.00
S2-ensemble3-crowd	2	+\$0.03	+3.1%	50%	-\$0.39
S0-single	8	-\$0.49	-7.6%	75%	-\$0.58
untagged	13	-\$1.79	-15.2%	77%	-\$2.34

Open positions — expected P&L (forward-looking)

Forward-looking expected P&L on **63** open modal-side positions (mark-to-model): **-\$0.17/contract** total (20 are +EV). Of that, **+\$0.81** is on actionable leans (the rest is counterfactual — positions the confidence gate is holding us out of).

Provisional — 25 resolved. Profit ROI is even noisier than Brier at small n; read the direction, not the digits.

Autonomous Learning — policy & proposals

The decision policy (when to take a position) is data, not frozen code. The learning pass reads the system's own resolved record and proposes nudges, but anti-overfit guardrails (min-n, max-step) gate every change. **Policy v7**; proposals as of 2026-06-23.

Knob (decision threshold)	Value
min profitable EV (\$/contract)	0.020
max market-fade gap (no-high-conf)	0.050
conviction medium / high EV	0.05 / 0.12
low confidence never leans	True
adversarial veto binding	True

Pending proposals (from the system's own outcomes)

Knob	Current → Proposed	n	Guardrail	Rationale
------	--------------------	---	-----------	-----------

max_market_disagreement	0.1 → 0.05	25	AUTO_OK	Counterfactual ROI falls monotonically as the fade widens and is profitable
hard_gap_ceiling	0.25 → 0.2	25	AUTO_OK	The widest fades (20pt+) lost catastrophically (ROI<=-50%) -> lower the a
min_confidence_for_lean	medium → high	25	HUMAN_GATE	medium-confidence ROI -24% (n=7) while high-confidence profits 2% (n=
adversarial_veto_binding	True → None	4	INSUFFICIENT_DATA	Veto precision becomes learnable once vetoed/revised positions resolve;

INSUFFICIENT_DATA = directionally real but too few samples to trust; HUMAN_GATE = change too large to auto-apply; AUTO_OK = guardrail-cleared, auto-applied. Nothing auto-applies until the record is large enough.

Active Markets

The Odyssey Rotten Tomatoes score? (KXRT-ODY-90)

Category: culture | Closes: 2026-07-20 14:00 UTC

My prob: **34.0%** Confidence: **medium** Market: **42.5%** Edge: **-8.5%**

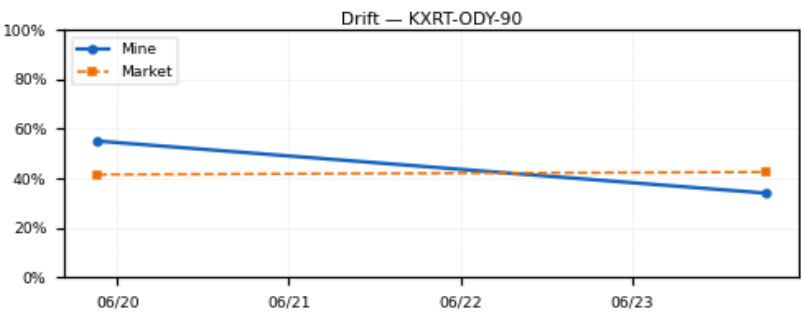

Lean: **NO** Conviction: **low**

Trade (spot): BUY NO @ \$0.59 now (taker, fee \$0.02/contract) -> net EV **+\$0.05/contract**

Trade (limit): rest BUY NO @ \$0.56 GTC until 2026-07-20 -> net EV **+\$0.08/contract** if filled

Rationale: Strict >90 bar: only ~half of Nolan's recent majors cleared 90 (Oppenheimer 93/Dunkirk 92/TDK 94 vs Inception 87/Interstellar 73/Tenet 69), and a big spectacle adaptation with negative trailer buzz skews toward the lower band.

Key drivers: strict >90 bar; Nolan split track record; negative promo buzz; epic-genre risk

Will Donald J. Trump attend The 2026 FIFA World Cup Final? (KXTRUMPATTEND)

Category: politics | Closes: 2026-07-20 14:00 UTC

My prob: **95.0%** Confidence: **high** Market: **89.0%** Edge: **6.0%**

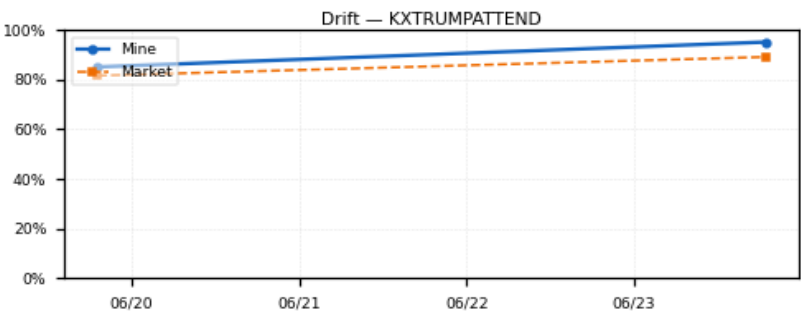

Lean: **YES** Conviction: **low**

Trade (spot): BUY YES @ \$0.90 now (taker, fee \$0.01/contract) -> net EV **+\$0.04/contract**

Trade (limit): rest BUY YES @ \$0.88 GTC until 2026-07-20 -> net EV **+\$0.06/contract** if filled

Rationale: Sitting president with a publicly confirmed ceremonial role (Infantino: Trump will help hand over the trophy), stated intent + schedule held, trivial NJ logistics, and direct precedent attending the 2025 Club World Cup final at the same venue; residual is acute crisis tail risk.

Key drivers: confirmed trophy role; schedule held; 2025 precedent; easy logistics

Will the Federal Reserve Hike rates by 0bps at their July 2026 meeting?

(KXFEDDECISION-26JUL-H0)

Category: economy | Closes: 2026-07-29 18:05 UTC

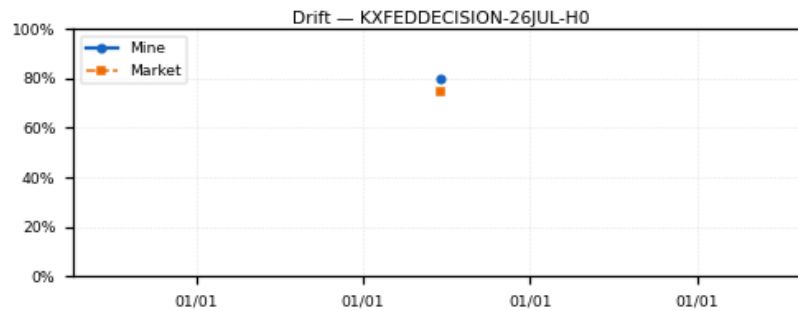

My prob: **80.0%** Confidence: **medium** Market: **74.5%** Edge: **5.5%**

Lean: **YES** Conviction: **low**

Trade (spot): BUY YES @ \$0.75 now (taker, fee \$0.02/contract) -> net EV **+\$0.03/contract**

Rationale: June was a UNANIMOUS hold; next-meeting persistence after a unanimous hold is ~85%. The 9/8 dot split is full-year, not July-specific (any hike can land later). Persistent 3.6% PCE removes cut risk but Fed signaled patience. ~0.80, slightly above market 0.745 (which folds path risk into one meeting).

Key drivers: unanimous June hold -> high next-meeting persistence; dot split is full-year not July; PCE persistence biases alt to hike not cut; market underweights single-meeting inertia

Will Trump make 0 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-0)

Category: politics | Closes: 2026-06-30 14:00 UTC

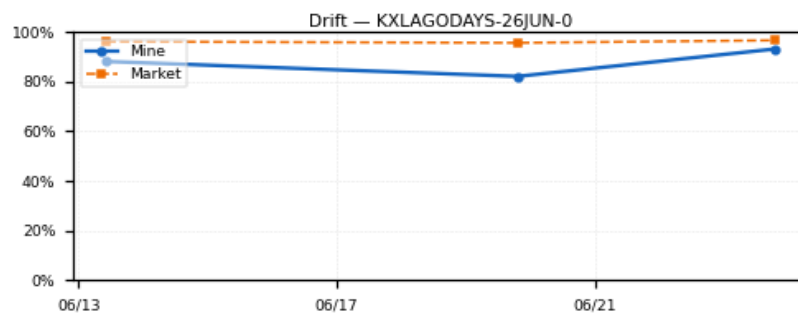

My prob: **93.0%** Confidence: **high** Market: **96.5%** Edge: **-3.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 93%, modal YES) — staying out. (Indicative raw EV +\$0.02/contract at my probability, not recommended.)

Rationale: Zero Mar-a-Lago trips through ~June 23 (75% of month), confirmed summer-Bedminster pattern, and a crisis-driven DC posture leave almost no path to a trip in the final week.

Key drivers: 0 trips so far; summer Bedminster pattern; Iran crisis DC posture

Will the unemployment rate (U-3) be above 4.1% in June? (KXU3-26JUN-T4.1)

Category: economy | Closes: 2026-07-02 14:00 UTC

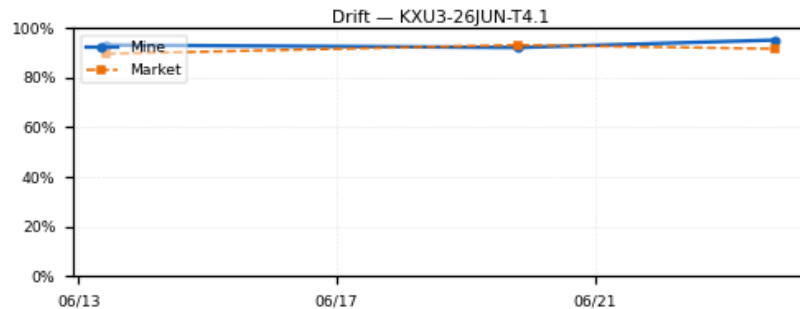

My prob: **95.0%** Confidence: **high** Market: **91.5%** Edge: **3.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 95%, modal YES) — staying out. (Indicative raw EV +\$0.02/contract at my probability, not recommended.)

Rationale: U-3 pinned 4.3-4.5% for 11 months with solid May payrolls; a drop to $\leq 4.1\%$ would break the regime with no signal.

Key drivers: sticky 4.3-4.5 range; 172k May payrolls

Will the President sign more than 0 Executive Orders between Jun 7, 2026 and Jun 13, 2026? (KXEOWEEK-26JUN13-0)

Category: politics | Closes: 2026-06-27 14:00 UTC

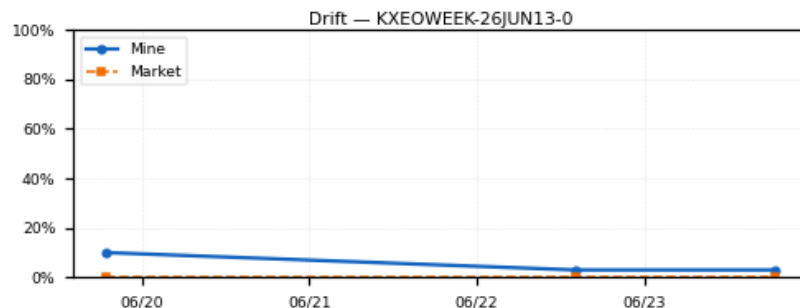

My prob: **3.0%** Confidence: **high** Market: **0.5%** Edge: **2.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 3%, modal NO) — staying out. (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: White House EO-signing events near this window are dated Jun 3 and Jun 22 (both outside Jun 7-13); no EO-signing falls in the window, and the market's ~0.5% YES (untaken 1c YES) confirms zero EOs that week.

Key drivers: WH signings Jun3 & Jun22; none in window; market near-certain NO

Will Iván Cepeda Castro win the next Colombian presidential election?

(KXCOLOMBIAPRES-26-ICAS)

Category: politics | Closes: 2026-06-25 04:00 UTC

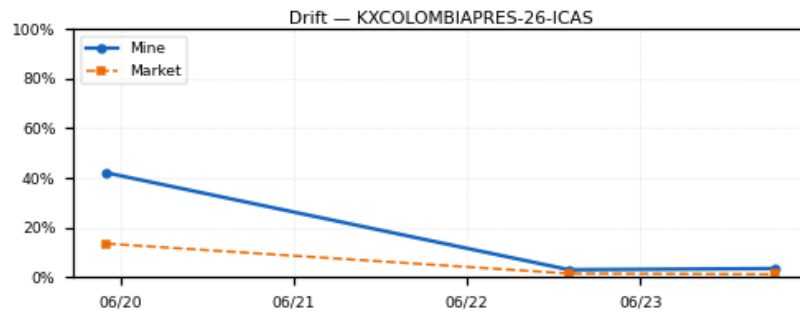

My prob: **3.5%** Confidence: **high** Market: **1.2%** Edge: **2.3%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 4%, modal NO) — staying out. (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: Cepeda trails by ~249K votes; overturning a sub-1pt national result via challenge is essentially unprecedented in Colombia.

Key drivers: trails 249K; challenge filed

Will Abelardo de la Esparriella win the next Colombian presidential election?

(KXCOLOMBIAPRES-26-AESP)

Category: politics | Closes: 2026-06-25 04:00 UTC

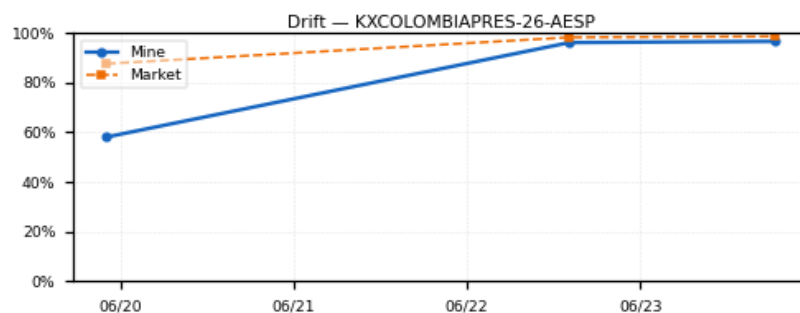

My prob: **96.5%** Confidence: **high** Market: **98.5%** Edge: **-2.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 96%, modal YES) — staying out. (Indicative raw EV +\$0.01/contract at my probability, not recommended.)

Rationale: De la Esparriella won the June 21 runoff by ~249K votes (49.66 vs 48.70) with 99.96% counted; no Colombian presidential recount has reversed a result. Cepeda's broad challenge is the only tail.

Key drivers: 249K absolute margin; 99.96% counted; no precedent for reversal; Cepeda challenge

Will Trump make 1 trips to Mar-a-Lago as President in Jun 2026? (KXLAGODAYS-26JUN-1)

Category: politics | Closes: 2026-06-30 14:00 UTC

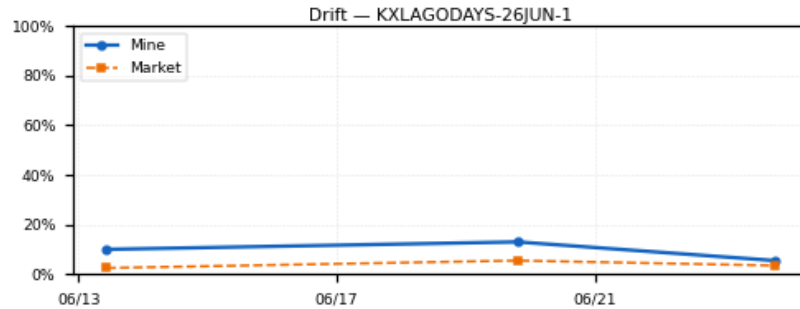

My prob: **5.5%** Confidence: **high** Market: **3.5%** Edge: **2.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 6%, modal NO) — staying out. (Indicative raw EV +\$0.00/contract at my probability, not recommended.)

Rationale: Only a single unplanned last-weekend dash to low-season Mar-a-Lago could yield one trip, against every active signal.

Key drivers: summer pattern; one weekend left

Will the US agree to a new Iranian nuclear deal this year? (KXUSAIRANAGREEMENT-27-26JUL)

Category: politics | Closes: 2026-07-01 14:00 UTC

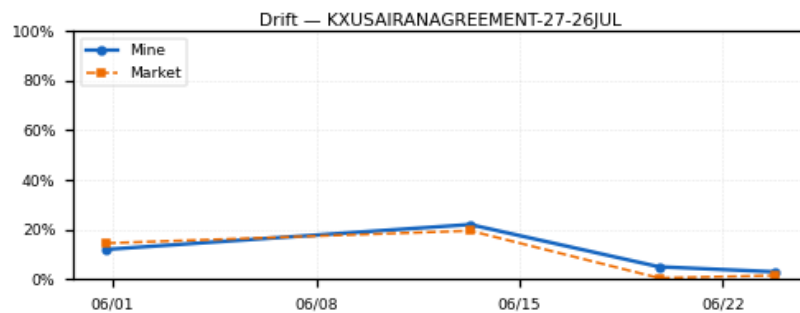

My prob: **3.0%** Confidence: **high** Market: **1.5%** Edge: **1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 3%, modal NO) — staying out.

Rationale: A comprehensive nuclear deal within ~7 days is near-impossible while enrichment (the core dispute) is openly unresolved; the live MOU is explicitly not a nuclear deal.

Key drivers: enrichment impasse; MOU not nuclear deal; 7-day window

Will Graham Platner drop out of the 2026 United States Senate election in Maine before Jul 14, 2026? (KXPLATNERDROPOUT-26)

Category: politics | Closes: 2026-07-14 14:00 UTC

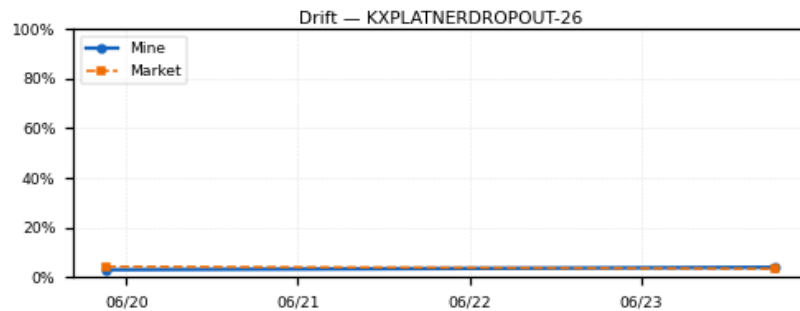

My prob: **4.0%** Confidence: **high** Market: **3.4%** Edge: **0.6%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 4%, modal NO) — staying out.

Rationale: Platner won the nomination ~72% on June 9 with the scandals already public and is actively campaigning against Collins; a just-elected defiant nominee dropping out within a 3-week window is very rare, residual is new-bombshell tail risk.

Key drivers: won primary 72%; scandals priced in; defiant; active campaign

Will legislation that reauthorizes FISA Section 702 authority become law before Jun 25, 2026? (KXFISAEXTEND-26JUN-26JUN25)

Category: politics | Closes: 2026-07-01 14:00 UTC

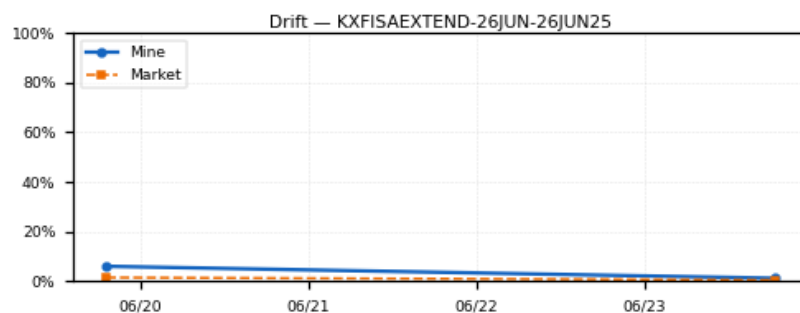

My prob: **1.2%** Confidence: **high** Market: **0.5%** Edge: **0.7%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 1%, modal NO) — staying out.

Rationale: With 702 surveillance locked in via March 2026 FISC certifications through March 2027 (no urgency) and the House having just failed 198-218 amid an unresolved standoff, both chambers passing + signature in ~2 days is near-impossible.

Key drivers: FISC certs remove urgency; House failed 198-218; 2-day window

Will Toby Doeden be the Republican nominee for Governor in South Dakota?

(KXGOVSDNOMR-26-TDOE)

Category: politics | Closes: 2026-06-30 14:00 UTC

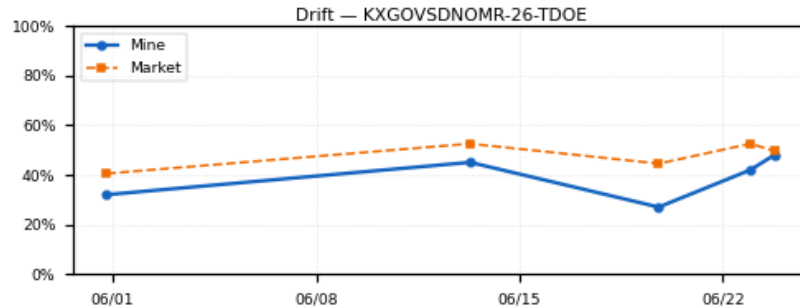

My prob: **48.0%** Confidence: **low** Market: **49.5%** Edge: **-1.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 48%, modal NO) — staying out.

Rationale: Doeden led round 1 (31 vs 25) and the anti-establishment lane (~52%) slightly outnumberes the establishment lane, but Johnson's bloc breaks toward incumbent Rhoden in the July 28 runoff — a genuine coin flip.

Key drivers: Doeden round-1 lead; anti-establishment lane 52%; Johnson voters to Rhoden

Will Trump make 2 trips to Mar-a-Lago as President in Jun 2026?

(KXLAGODAYS-26JUN-2)

Category: politics | Closes: 2026-06-30 14:00 UTC

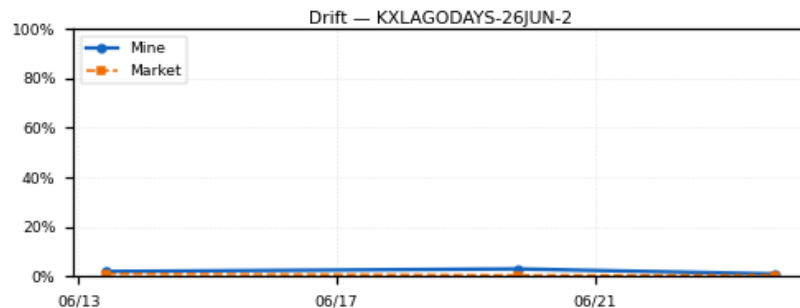

My prob: **1.0%** Confidence: **high** Market: **0.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 1%, modal NO) — staying out.

Rationale: Two distinct Palm Beach trips in the remaining ~7 days is near-impossible.

Key drivers: summer pattern

Will JD Vance visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-JVAN)

Category: politics | Closes: 2026-07-01 14:00 UTC

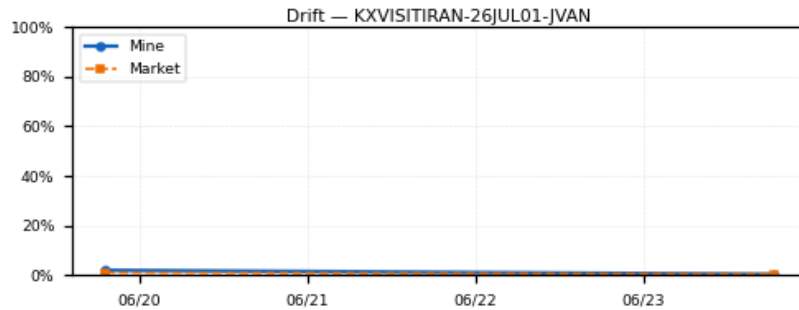

My prob: **0.4%** Confidence: **high** Market: **0.4%** Edge: **-0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: A sitting VP in Iran is unprecedented and less plausible than a SecState visit.

Key drivers: no precedent; security

Will Marco Rubio visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-MRUB)

Category: politics | Closes: 2026-07-01 14:00 UTC

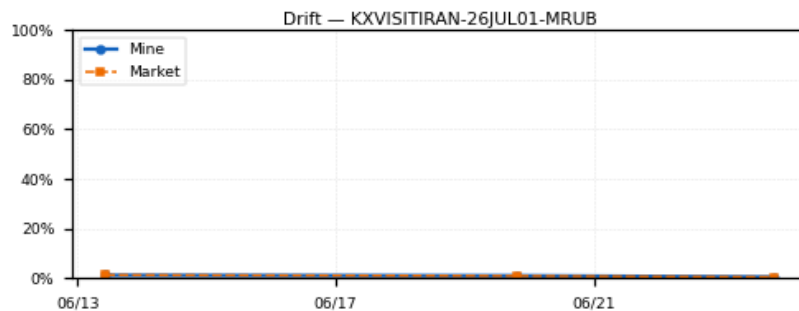

My prob: **0.5%** Confidence: **high** Market: **0.5%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 0%, modal NO) — staying out.

Rationale: No sitting US SecState has set foot in Iran since 1979; a Tehran trip in 7 days amid a fragile ceasefire is effectively impossible.

Key drivers: no US-Iran relations; no precedent

Will any U.S. House member visit Iran before Jul 1, 2026? (KXVISITIRAN-26JUL01-AHOU)

Category: politics | Closes: 2026-07-01 14:00 UTC

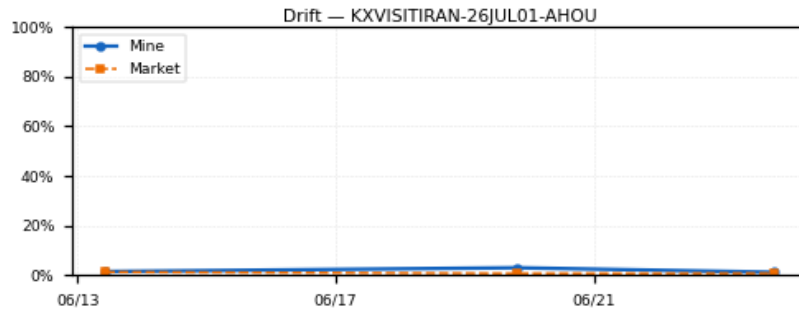

My prob: **1.2%** Confidence: **medium** Market: **0.8%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 1%, modal NO) — staying out.

Rationale: Any 1 of 435 members lifts the floor above a named principal, but active conflict + logistics make a 7-day Iran trip very unlikely.

Key drivers: 435-member pool; travel warnings; logistics

Will CPI rise more than -0.1% in June 2026? (KXCPI-26JUN-T-0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

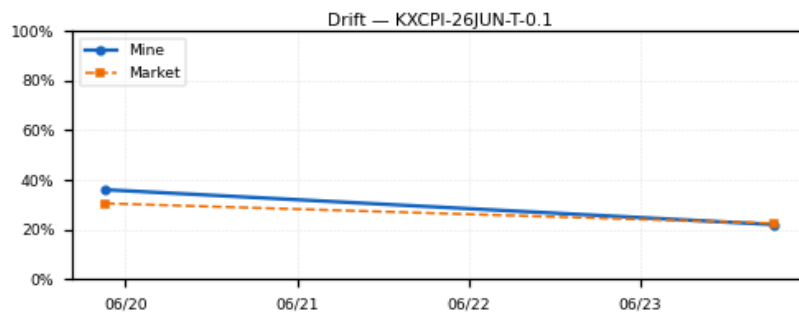

My prob: **22.0%** Confidence: **medium** Market: **22.5%** Edge: **-0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 22%, modal NO) — staying out.

Rationale: Post-ceasefire oil crash (Brent ~\$78, ~20% off 2026 highs, near pre-war) makes June energy a large negative CPI contributor, flipping headline MoM likely negative; defer to market over my initial upward-momentum read.

Key drivers: energy collapse; oil ~20% off highs; core +0.25 floor; seasonal adj

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T3.9)

Category: economy | Closes: 2026-07-14 14:00 UTC

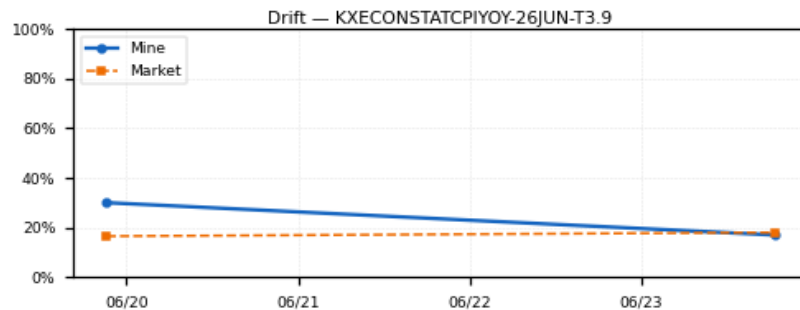

My prob: **17.0%** Confidence: **medium** Market: **18.0%** Edge: **-1.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 17%, modal NO) — staying out.

Rationale: YoY falling from 4.2% as energy base/monthly reverses; 3.9 is a plausible landing bucket.

Key drivers: energy YoY base; monthly decline

Will CPI rise more than 0.1% in June 2026? (KXCPI-26JUN-T0.1)

Category: economy | Closes: 2026-07-14 13:56 UTC

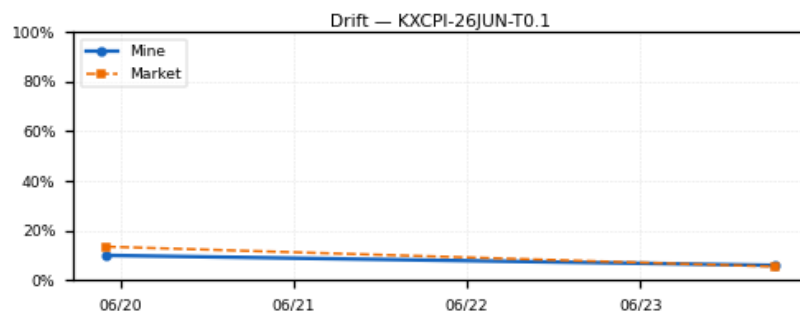

My prob: **6.0%** Confidence: **medium** Market: **5.5%** Edge: **0.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 6%, modal NO) — staying out.

Rationale: MoM > 0.2% unlikely given June energy crash.

Key drivers: energy collapse

Will CPI rise more than 0.0% in June 2026? (KXCPI-26JUN-T0.0)

Category: economy | Closes: 2026-07-14 13:56 UTC

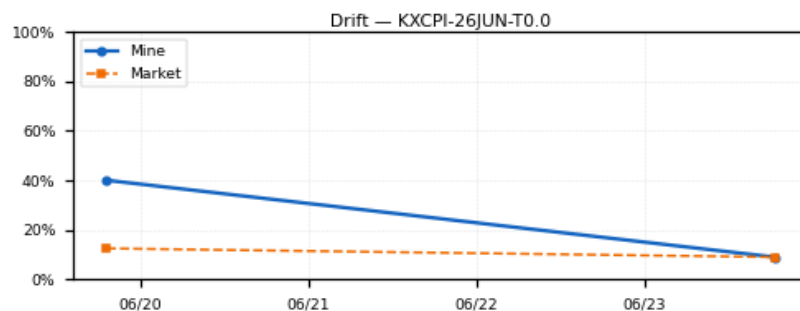

My prob: **9.0%** Confidence: **medium** Market: **9.0%** Edge: **0.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 9%, modal NO) — staying out.

Rationale: Energy reversal in June drags headline MoM toward/below zero; market-consistent.

Key drivers: energy collapse; core floor

CPI year-over-year in Jun 2026? (KXECONSTATCPIYOY-26JUN-T4.1)

Category: economy | Closes: 2026-07-14 14:00 UTC

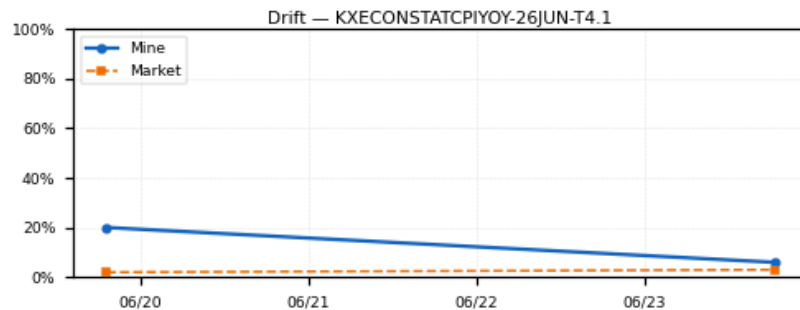

My prob: **6.0%** Confidence: **medium** Market: **3.0%** Edge: **3.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 6%, modal NO) — staying out.

Rationale: If YoY drops it likely passes below 4.1 toward ~3.9-4.0; thin mass exactly at 4.1.

Key drivers: energy reversal; YoY drop

Will the 7-day moving average of transit calls through the Strait of Hormuz as reported by the IMF PortWatch be above 60 before July 1, 2026? (KXHORMUZNORM-26MAR17-B260701)

Category: politics | Closes: 2026-06-15 14:00 UTC

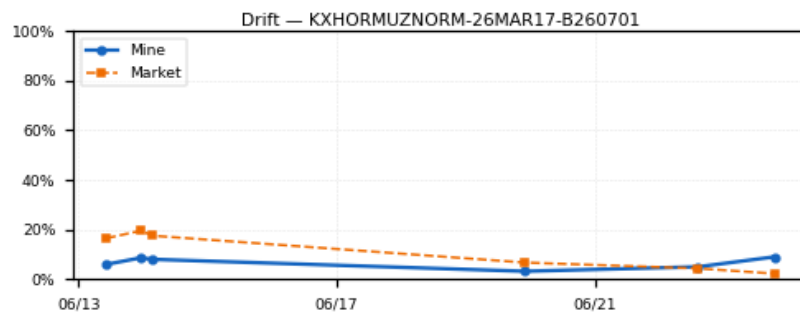

My prob: **9.0%** Confidence: **medium** Market: **2.2%** Edge: **6.8%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 9%, modal NO) — staying out.

Rationale: A 7-day moving average cannot cross 60 on one good day; needs ~7 days far above the best post-war day (55) while the latest reading collapsed to 12 amid a fresh June 22 closure. Recovery is real but choppy and far below the 100+ pre-war norm.

Key drivers: 7day-MA smoothing; volatile low dailies 12-55; fragile days-old ceasefire; short 7-day window; latent backlog surge upside

Will Mike Mazzei be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-MMAZ)

Category: politics | Closes: 2026-06-30 14:00 UTC

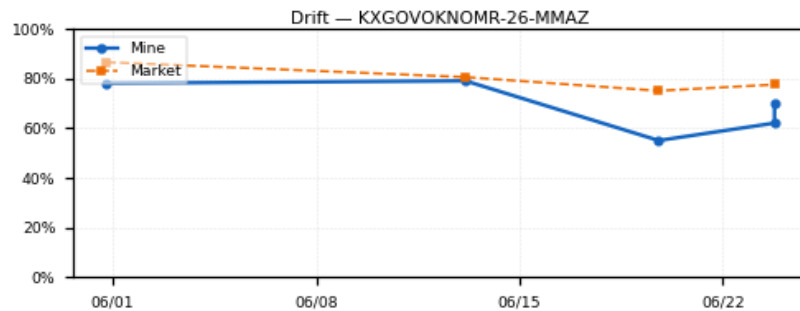

My prob: **70.0%** Confidence: **low** Market: **77.5%** Edge: **-7.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 70%, modal YES) — staying out.

Rationale: Trump's COMPLETE-and-TOTAL endorsement + attacks on Drummond in maximally Trump-loyal OK favor Mazzei, though Drummond's round-1 lead/name-ID keep it from a lock; I sit slightly below market.

Key drivers: Trump endorsement; base-skewed runoff; self-funding

Will Genter Drummond be the Republican nominee for Governor in Oklahoma?

(KXGOVOKNOMR-26-GDRU)

Category: politics | Closes: 2026-06-30 14:00 UTC

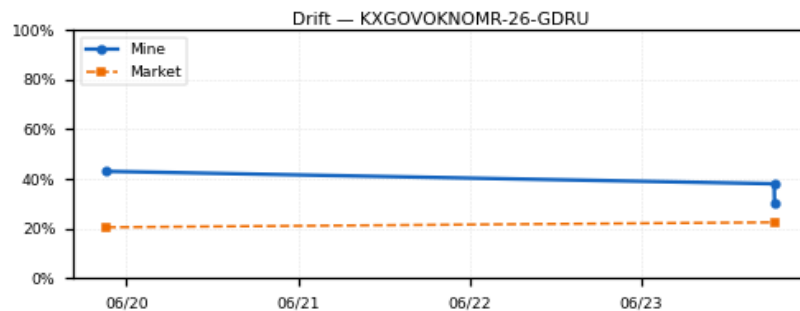

My prob: **30.0%** Confidence: **low** Market: **22.5%** Edge: **7.5%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 30%, modal NO) — staying out.

Rationale: Drummond led round 1 narrowly (26.3 vs 26.0) with AG name-ID, but Trump's active Mazzei endorsement + anti-Drummond attacks in deep-red OK tilt the Aug 25 runoff toward Mazzei; I sit slightly above market on Drummond.

Key drivers: Trump endorsed Mazzei; Drummond round-1 lead+name ID; low-turnout base runoff

Will Adriano Espaillat be the Democratic nominee for NY-13? (KXNY13D-26-AESP)

Category: politics | Closes: 2026-06-30 14:00 UTC

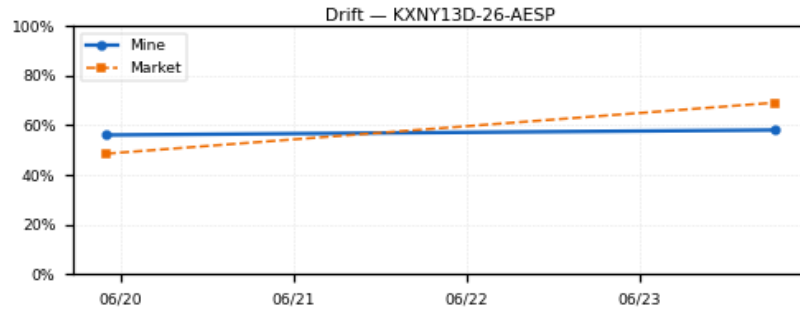

My prob: **58.0%** Confidence: **low** Market: **69.0%** Edge: **-11.0%**

Lean: **NONE** Conviction: **low**

No actionable lean: no +EV value bet at the ask (my prob 58%, modal YES) — staying out.

Rationale: Genuine tossup leaning incumbent: Espaillat's 5-term name-ID, Dominican-plurality older electorate, money and Jeffries backing modestly outweigh a real Mamdani/DSA insurgency; I sit a bit below the Kalshi crowd given turnout variance in a low-turnout June primary.

Key drivers: incumbent name-ID; Dominican electorate; Mamdani/DSA ground game; high undecided

Supergirl Rotten Tomatoes score? (KXRT-SUPE-75)

Category: culture | Closes: 2026-06-22 14:00 UTC

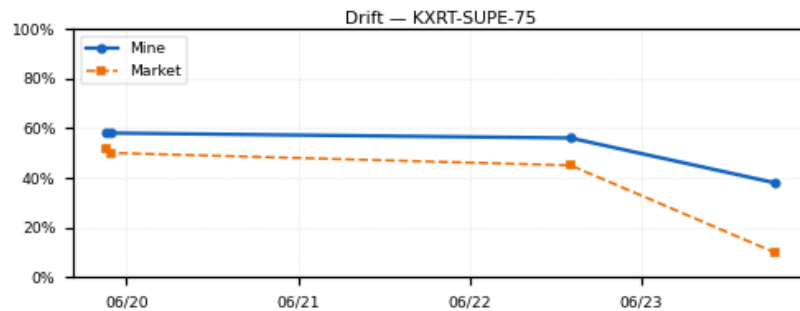

My prob: **38.0%** Confidence: **low** Market: **10.0%** Edge: **28.0%**

Lean: **NONE** Conviction: **low**

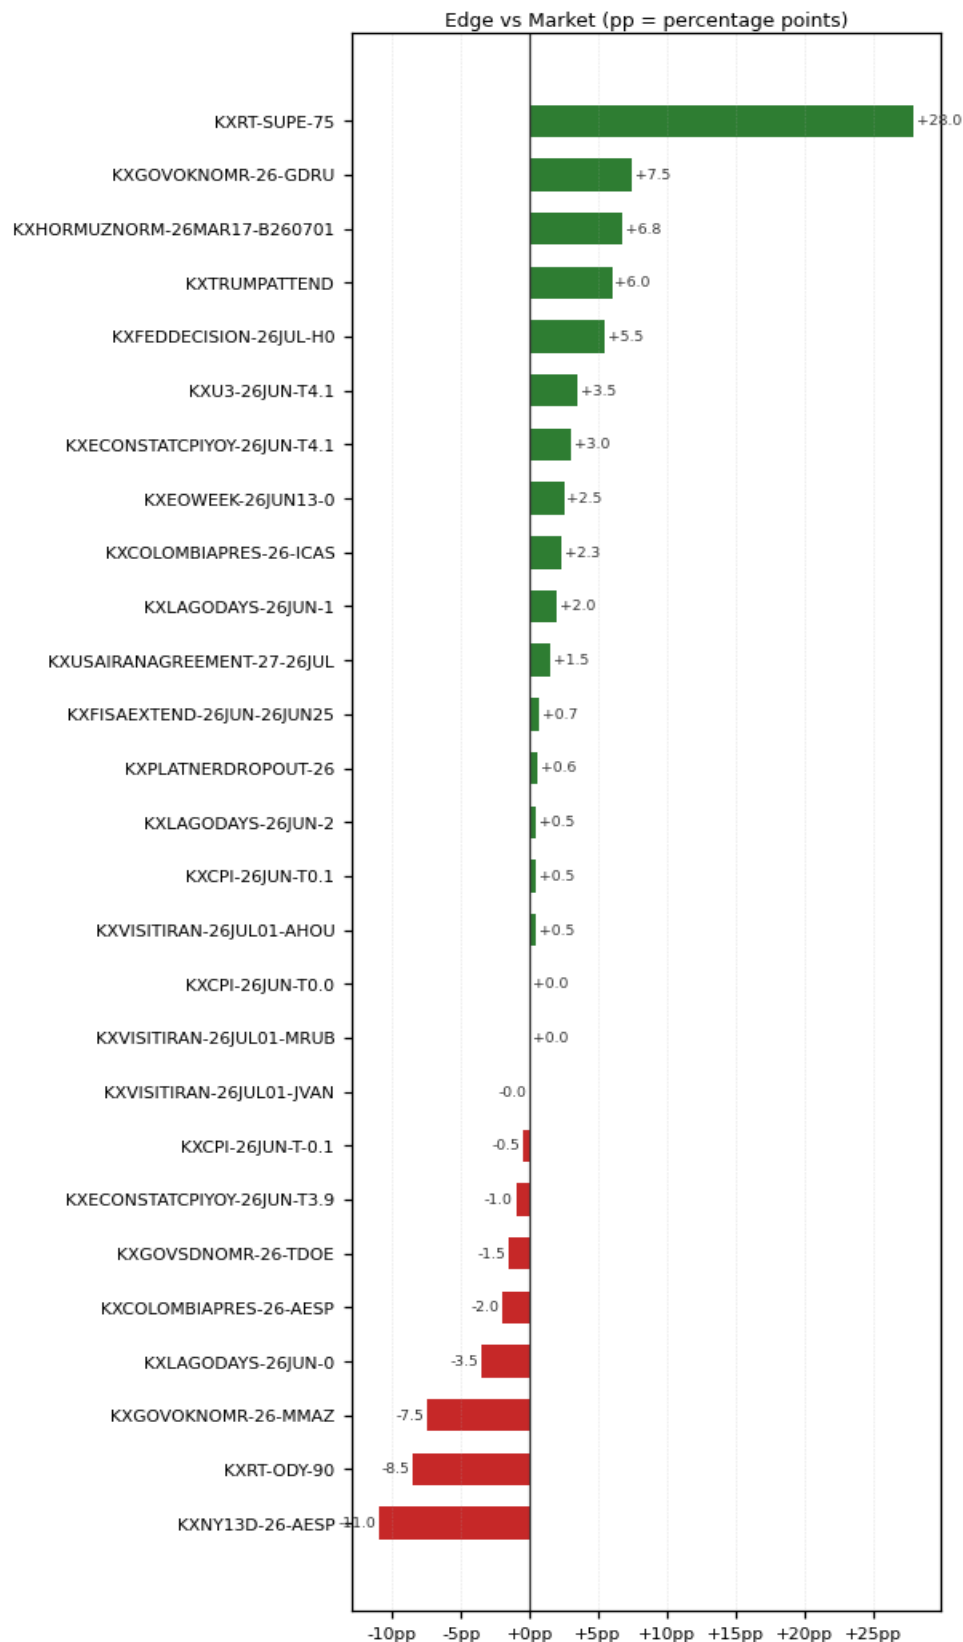

No actionable lean: no +EV value bet at the ask (my prob 38%, modal NO) — staying out.

Rationale: Split reactions (universal Alcock praise vs recurring bland-villain knock) cluster mixed-positive DCU films ~60-80% straddling the 75 line; one outlet predicts 76%. I sit above the market's ~10% but below my forecaster's 0.43 given downward score-drift and sliding tracking.

Key drivers: Alcock praise upside; bland-villain knock; 76% industry prediction; wide-release score drift; sliding tracking

Edge Overview

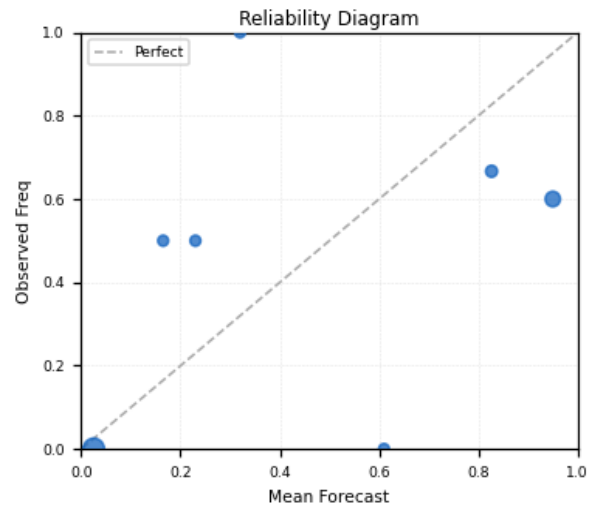

Profitable Leans (after fees)

Ticker	Side	Spot EV/contract	Limit EV/contract	Conviction
KXRT-ODY-90	NO	+\$0.05	+\$0.08	low
KXTRUMPATTEND	YES	+\$0.04	+\$0.06	low

KXFEDDECISION-26JUL-HVES	YES	+\$0.03	—	low
--------------------------	-----	---------	---	-----

Fees use Kalshi's standard taker formula $\text{ceil}(0.07 \cdot p \cdot (1-p)) / \text{contract}$; resting (maker) limit fills may be cheaper on some series. Paper only - read-only key places no orders.

Calibration

KXTRUMPSAY-26JUN22-URAN	WANT Trump say "Uranium" before Jun...	NO	0.9801	0.0342

Lessons Learned

For KXTRUMPSAY-style verbatim-utterance markets, resolution is a literal tracked quote from the resolution source, NOT topical salience — never forecast above the market without a CONFIRMED verbatim quote, and treat any 80pt fade against a liquid market as model error. This is exactly the case the new hard_gap_ceiling now hard-blocks regardless of confidence.

2026-06-22 | resolution | KXTRUMPSAY-26JUN22-URAN | statements [\[unjustified-market-divergence\]](#)
Brier (mine): 0.9801 | Brier (market): 0.0342 | lost to market

When diverging below a liquid market that is pricing a strong institutional base rate, require a specific, verifiable reason; narrative of 'division' is not evidence of a formally recorded dissent. Anchor on the base rate.

2026-06-19 | resolution | KXFOMCDISSENTCOUNT-26JUN-0 | economy [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3364 | Brier (market): 0.1332 | lost to market

During an active supply-disruption crisis, anchor flow estimates to the SUPPRESSED regime, not an assumed recovery, until data confirms normalization; and do not enter a position when divergence from a liquid market is small and rests on an unverified assumption.

2026-06-19 | resolution | KXHORMUZWEEKLY-26JUN14-T25 | politics [\[unjustified-market-divergence\]](#)
Brier (mine): 0.3721 | Brier (market): 0.2450 | lost to market

Never move a forecast materially on one noisy data point (esp. a single poll); weight by reliability and require corroboration. Don't recommend fading a liquid market on a low-confidence estimate.
